DEFINITIONS

For convenience, we will use the following defined terms throughout this SAI.

<u>Defined Term</u>	<u>Definition</u>
Advisor	Day Hagan Asset Management
Advisers Act	Investment Advisers Act of 1940, as amended.
Authorized Participant	An entity that has entered a Participant Agreement with the Distributor that has been accepted by the Custodian with respect to the offer and sale of the Fund's Creation Units and is either a participant in the CNS System or is a DTC Participant.
Board	Board of Trustees of the Trust.
Business Day	Any day that the Exchange is open for business. As of the date of this SAI, the Exchange observes the following holidays: New Year's Day, Martin Luther King, Jr. Day, President's Day (Washington's Birthday), Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.
Citi	Citi Fund Services Ohio, Inc., the financial administrator, fund accountant, and transfer agent of the Trust.
CNS System	Continuous Net Settlement System of the NSCC.
CNS Participant	An entity that participates in the CNS System.
Code	Internal Revenue Code of 1986, as amended.
Creation Unit	Block of 25,000 Fund shares.
Custodian	Citibank, N.A.
Day Hagan ETF	Day Hagan/Ned Davis Research Smart Sector ETF
Distributor	Foreside Fund Services, LLC
DTC	Depository Trust Company.
DTC Participant	An entity for which DTC holds securities and which has access to the DTC system.
ETF	Exchange-traded fund.
Exchange	NYSE Arca, Inc.
Funds	Day Hagan/Ned Davis Research Smart Sector ETF, Day Hagan/Ned Davis Research Smart Sector Fixed Income ETF, and Day Hagan/Ned Davis Research Smart Sector International ETF. Unless otherwise noted, references to a single Fund apply to all three Funds.
Independent Trustees	Trustees who are not "interested persons" of the Trust, as defined in the 1940 Act.
Interested Trustees	Trustees who are "interested persons" of the Trust, as defined in the 1940 Act.
NAV	Net asset value.
NRSRO	Nationally Recognized Statistical Ratings Organization such as Moody's Investor Service ("Moody's") or S&P Global Ratings ("S&P").
NSCC	National Securities Clearing Corporation, a clearing agency registered with the SEC.
SEC	U.S. Securities and Exchange Commission.
Smart Fixed Income ETF	Day Hagan/Ned Davis Research Smart Sector Fixed Income ETF
Smart International ETF	Day Hagan/Ned Davis Research Smart Sector International ETF
Transfer Agent	Citi.
1933 Act	The Securities Act of 1933, as amended.
1934 Act	The Securities Exchange Act of 1934, as amended.
1940 Act	The Investment Company Act of 1940, as amended.

OVERVIEW OF THE TRUST

The Trust was organized on September 7, 2010 as a Delaware statutory trust and is registered under the 1940 Act as an open-end management investment company.

The Declaration of Trust permits the Trust to issue an unlimited number of shares of beneficial interest in one or more series representing interests in separate portfolios of securities. The Declaration of Trust also permits the Trust to offer two or more classes of shares. Currently, the Trust offers its shares in several separate series. Each Fund is a non-diversified exchange-traded series of the Trust. The Day Hagan ETF's investment objective is to seek long-term capital appreciation and preservation of capital. The Smart Fixed Income ETF's investment objective is total return, consisting of income and capital appreciation. The Smart International ETF's investment objective is to seek total return, consisting of income and capital appreciation. The Day Hagan ETF, Smart Fixed Income ETF, and Smart International ETF commenced operations on January 16, 2020, September 28, 2021, and July 1, 2022, respectively. Additional series may be created from time to time.

Each Fund only offers, sells, and redeems shares on a continuous basis at NAV in large aggregations or "Creation Units." The Funds' shares are not individually redeemable.

Currently, each Fund's Creation Unit is comprised of 25,000 shares. Under the Declaration of Trust, the Board has the unrestricted right and power to alter the number of shares of a Fund that constitute a Creation Unit. Therefore, in the event of a termination of a Fund, the Board, in its sole discretion, could determine to permit the Fund's shares to be individually redeemable. In such circumstances, the Trust might elect to pay cash redemptions to all shareholders with an "in-kind" election for shareholders owning in excess of a certain stated minimum amount.

Generally, each Fund sells and redeems Creation Units on an in-kind basis. Except for the circumstances specified in this SAI (see "Cash Transactions - Generally" and "Custom Transactions," below), investors will generally be required to purchase Creation Units by making an in-kind deposit of specified instruments ("Deposit Instruments"), and shareholders redeeming their shares will generally receive an in-kind transfer of specified instruments ("Redemption Instruments"). The names and quantities of the instruments that constitute the Deposit Instruments and the names and quantities of the instruments that constitute the Redemption Instruments will be specified by each Fund each day, and these instruments are referred to, in the case of either a purchase or a redemption, as the "Creation Basket." If there is a difference between the NAV of a Creation Unit and the aggregate market value of the Creation Basket exchanged for a Creation Unit, the party conveying instruments with the lower value will also pay to the other an amount in cash equal to that difference ("Cash Amount").

Each Fund may impose a transaction fee in connection with the purchase and redemption of its Creation Units. Such fees will be limited in accordance with the requirements of the SEC applicable to management investment companies offering redeemable securities.

Once "created," each Fund's shares trade in the secondary market at market prices that change throughout the day.

EXCHANGE LISTING AND TRADING

Shares of the Fund are approved for listing and trading on the Exchange, subject to notice of issuance, and will be available for purchase and sale through a broker-dealer at market price on each day that the Exchange is open for business. The market price of a Fund's shares may trade below, at, or above the most recently calculated NAV per share of the Fund. As is the case of other publicly traded securities, your purchase or sale of Fund shares in the secondary market will be subject to brokerage commissions which will be based on negotiated commission rates at customary levels.

There can be no assurance that the requirements of the Exchange necessary to maintain the listing of shares of a Fund will continue to be met. The Exchange maintains certain listing standards and requires listed companies like the Fund to continue to comply with such standards while their shares are available for trading on the Exchange. The Exchange may, but is not required to, remove the shares of a Fund from listing if: (1) following the initial twelve-month period beginning upon the commencement of trading of the shares, there are fewer than

50 beneficial holders of the shares; (2) the Fund is no longer eligible to operate in reliance on Rule 6c-11 under the 1940 Act; (3) the Fund fails to meet certain continued listing standards of the Exchange; or (4) such other event shall occur or condition exists that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. In addition, the Exchange will remove the shares from listing and trading upon termination of the Trust or a Fund.

The base and trading currencies of each Fund is the U.S. dollar. The base currency is the currency in which a Fund's NAV is calculated and the trading currency is the currency in which shares of a Fund are listed and traded on the Exchange.

The Trust reserves the right to adjust the share price of each Fund in the future to maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of a Fund.

INVESTMENT PRACTICES

The Prospectus discusses each Fund's principal investment strategies. Below you will find more detail about the types of investments and investment practices permitted by each Fund, including those which are not part of the Fund's principal investment strategy. These investment practices affect each Fund directly as well as through the underlying ETFs in which it invests.

EQUITY SECURITIES

Equity securities include both foreign and domestic common stocks, preferred stocks, exchange-traded funds, other business organizations, real estate investment trusts, and other securities which the Advisor believes have equity characteristics.

Common Stock

Common stock is a type of equity security which represents an ownership interest in a corporation (including real estate investment trusts ("REITs") discussed below) and the right to a portion of the assets of the corporation in the event of liquidation. This right, however, is subordinate to that of preferred stockholders and any creditors, including holders of debt issued by a corporation. Owners of common stock are generally entitled to vote on important matters. A corporation may pay dividends on common stock.

Preferred Stock

Preferred stock is a type of equity security which represents an ownership interest in a corporation and the right to a portion of the assets of the corporation in the event of a liquidation. This right, however, is subordinate to that of any creditors, including holders of debt issued by the corporation. Owners of preferred stock ordinarily do not have voting rights, but are entitled to dividends at a specified rate if the corporation has the financial ability to pay such dividends.

Exchange-Traded Funds

ETFs are traded on stock exchanges or on the over-the-counter market at their market price. Certain ETFs track the performance of a designated index or benchmark and invest in the securities comprising that index or benchmark. Other ETFs do not attempt to track the performance of an index and hold portfolio securities that are actively managed by their investment advisor. ETFs generally issue and redeem shares in creation units (large aggregations of shares) at their NAV per share, generally in exchange for: (1) a portfolio of securities that correspond pro rata to the securities comprising the product's investment portfolio; and (2) a specified amount of cash.

Generally, shares of ETFs are not individually redeemable. To redeem, the Fund must accumulate enough shares to reconstitute a creation unit of the ETF. The liquidity of small holdings of an ETF, therefore, will depend upon the existence of a secondary market.

Interests in Other Business Organizations

Entities such as limited partnerships, limited liability companies, and companies organized outside the U.S. (see “Foreign Securities” below) may issue securities comparable to common or preferred stock. Limited partnerships are partnerships consisting of one or more general partners, by whom the business is conducted, and one or more limited partners who contribute capital to the partnership. Limited liability companies frequently consist of one or more managing members, by whom the business is conducted, and other members who contribute capital to the company. Limited partners and members of limited liability companies generally are not liable for the debts of the partnership beyond their capital contributions or commitments. Limited partners and non-managing members are not involved in the day-to-day management of the partnership or limited liability company. They receive income and capital gains from the partnership or limited liability company in accordance with the terms established in the partnership or operating agreement. Typical limited partnerships and limited liability companies are involved in real estate, oil and gas, and equipment leasing, but they also finance movies, research and development, and other projects.

For an organization classified as a partnership under the Code (including most limited partnerships and limited liabilities companies), each item of income, gain, loss, deduction, and credit is not taxed at the partnership level but flows through with the same character to the partners or members. This allows the partnership to avoid double taxation.

A master limited partnership (“MLP”) is a publicly traded limited partnership or limited liability company. MLPs combine the tax advantages of a partnership with the liquidity of a publicly traded security. MLPs must limit their operations to avoid being taxed as corporations under the Code.

REITs

REITs, or real estate investment trusts, are pooled investment vehicles which invest primarily in income producing real estate or real estate related loans or interests. REITs are generally classified as equity REITs, mortgage REITs or a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling property that has appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of interest payments. The real property and mortgages serving as investment vehicles for REITs may be either residential or commercial in nature and may include healthcare facilities. Similar to investment companies, REITs are not taxed on income distributed to shareholders provided they comply with several requirements of the Code. Such tax requirements may limit a REIT’s ability to respond to changes in the commercial real estate market.

FIXED INCOME SECURITIES

Fixed income securities include convertible securities (other than preferred stock), corporate debt securities, money market instruments, U.S. Government securities, and zero-coupon securities, which provide a stream of fixed payments to the holder.

Convertible Securities

Convertible securities include certain fixed income securities that may be exchanged or converted into a predetermined number of shares of an issuer’s underlying common stock at the option of the holder during a specified period. Convertible securities may take the form of convertible preferred stock, convertible bonds or debentures, units consisting of “usable” bonds and warrants, or a combination of the features of several of these securities. The investment characteristics of each convertible security vary widely, which allows convertible securities to be employed for a variety of investment strategies. The Fund will exchange or convert the convertible securities held in its portfolio into shares of the underlying common stock when, in the Advisor’s opinion, the investment characteristics of the underlying common stock will assist the Fund in achieving its investment objective. Otherwise, the Fund may hold or trade convertible securities.

Corporate Debt Securities (Including Bonds, Notes, and Debentures)

Corporate debt includes any obligation of a corporation to repay a borrowed amount at maturity and usually to pay the holder interest at specific intervals. Corporate debt can have a long or short maturity and is often rated by one or more NRSROs. See the Appendix 1 to this SAI for a description of these ratings.

The credit risk of an issuer's debt security may vary based on its priority for repayment. For example, higher ranking (senior) debt securities have a higher priority than lower ranking (subordinated) securities. This means that the issuer might not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of senior securities may receive amounts otherwise payable to the holders of subordinated securities. Some subordinated securities, such as trust preferred and capital securities notes, also permit the issuer to defer payments under certain circumstances. For example, insurance companies issue securities known as surplus notes that permit the insurance company to defer any payment that would reduce its capital below regulatory requirements.

Money Market Instruments

Except where otherwise noted, the Fund may, pending investment or for liquidity purposes, invest its assets in money market instruments.

Bank Obligations. Bank obligations are short-term obligations issued by U.S. and foreign banks, including bankers' acceptances, certificates of deposit, time deposits, and similar securities.

Bankers' acceptances are negotiable drafts or bills of exchange typically drawn by an importer or exporter to pay for specific merchandise that are "accepted" by a bank, meaning, in effect, that the issuing bank unconditionally agrees to pay the face value of the instrument on maturity. Investments in bankers' acceptances will be limited to those guaranteed by domestic and foreign banks having, at the time of investment, total assets of \$1 billion or more (as of the date of the institution's most recently published financial statements).

Certificates of deposit and time deposits represent funds deposited in a commercial bank or a savings and loan association for a definite period of time and earn a specified return.

Investments in certificates of deposit and time deposits may include Eurodollar Certificates of Deposit, which are U.S. dollar denominated certificates of deposit issued by offices of foreign and domestic banks located outside the U.S., Yankee Certificates of Deposit, which are certificates of deposit issued by a U.S. branch of a foreign bank denominated in U.S. dollars and held in the U.S., Eurodollar Time Deposits, which are U.S. dollar denominated deposits in a foreign branch of a U.S. bank or a foreign bank, and Canadian Time Deposits, which are U.S. dollar denominated certificates of deposit issued by Canadian offices of major Canadian banks. All investments in certificates of deposit and time deposits will be limited to those (a) of domestic and foreign banks and savings and loan associations which, at the time of investment, have total assets of \$1 billion or more (as of the date of the institution's most recently published financial statements) or (b) the principal amount of which is insured by the Federal Deposit Insurance Corporation.

Commercial Paper and Variable Amount Master Demand Notes. Commercial paper (including Section 4(2) commercial paper) consists of unsecured promissory notes issued by corporations normally having maturities of 270 days or less and rates of return which are fixed. These investments may include Canadian Commercial Paper, which is U.S. dollar denominated commercial paper issued by a Canadian corporation or a Canadian counterpart of a U.S. corporation, and europaper, which is U.S. dollar denominated commercial paper of a foreign issuer.

Variable amount master demand notes are unsecured demand notes that permit the indebtedness thereunder to vary and provide for periodic adjustments in the interest rate according to the terms of the instrument. Because master demand notes are direct lending arrangements between the Fund and the issuer, they are not normally traded. Although there is no secondary market in the notes, the Fund may demand payment of principal and accrued interest at any time. A variable amount master demand note will be deemed to have a maturity equal to the longer of the period of time remaining until the next readjustment of its interest rate or the period of time remaining until the principal amount can be recovered from the issuer through demand.

Variable Rate Demand Notes. Variable rate demand notes (“VRDNs”) are unsecured, direct lending arrangements between the Fund, as the lender, and a corporation, financial institution, government agency, municipality or other entity.

VRDNs have interest rates which float or which are adjusted at regular intervals ranging from daily to annually. Although VRDNs are not generally traded, the Fund may demand payment of principal and accrued interest according to its arrangement with the borrower (usually upon no more than seven days’ notice). VRDNs are, therefore, treated as maturing on the later of the next interest adjustment or the date on which the Fund may next demand payment. Some VRDNs are backed by bank letters of credit.

The Fund may only invest in VRDNs which satisfy its credit requirements for commercial paper.

Other Money Market Instruments. These instruments may include: obligations (certificates of deposit, time deposits, bank master notes, and bankers’ acceptances) of thrift institutions, and savings and loans, provided that such institutions have total assets of \$1 billion or more as shown on their last published financial statements at the time of investment; short-term corporate obligations rated within the three highest rating categories by an NRSRO (e.g., at least A by S&P or A by Moody’s) at the time of investment, or, if not rated, determined by the Advisor to be of comparable quality; general obligations issued by the U.S. Government and backed by its full faith and credit, and obligations issued or guaranteed as to principal and interest by agencies or instrumentalities of the U.S. Government (e.g., obligations issued by Farmers Home Administration, Government National Mortgage Association, Federal Farm Credit Bank, and Federal Housing Administration); receipts, including Treasury Receipts, Treasury Income Growth Receipts, and Certificates of Accrual on Treasuries; repurchase agreements involving such obligations; money market funds, and foreign commercial paper.

U.S. Government Securities

U.S. Government securities are securities that are either issued or guaranteed as to payment of principal and interest by the U.S. Government, its agencies or instrumentalities. U.S. Government securities are limited to: direct obligations of the U.S. Treasury, such as bills, notes, and bonds of the U.S. Treasury, and notes, bonds, and discount notes of U.S. Government agencies or instrumentalities, including certain mortgage securities.

Agency securities are issued or guaranteed by a federal agency or other government sponsored entity (“GSE”) acting under federal authority. Some GSE securities are supported by the full faith and credit of the U.S. Government and some GSE securities are not. GSE securities backed by the full faith and credit of the U.S. Government include securities issued by the Government National Mortgage Association, Small Business Administration, Farm Credit System Financial Assistance Corporation, Farmers Home Administration, Federal Financing Bank, General Services Administration, Department of Housing and Urban Development, Export-Import Bank, Overseas Private Investment Corporation, and Washington Metropolitan Area Transit Authority Bonds.

GSE securities, which not backed by the full faith and credit of the U.S. Government but receive support through federal subsidies, loans or other benefits include securities issued by the Federal Home Loan Bank System, Federal Home Loan Mortgage Corporation, Federal National Mortgage Association and Tennessee Valley Authority.

Certain other GSE securities are not backed by the full faith and credit of the U.S. Government and have no explicit financial support, including securities issued by the Farm Credit System, Financing Corporation, and Resolution Funding Corporation.

Investors regard agency securities as having low credit risks, but not as low as Treasury securities. A Fund treats mortgage-backed securities guaranteed by a GSE as if issued or guaranteed by a federal agency. Although such a guarantee protects against credit risks, it does not reduce market and prepayment risks.

From time to time uncertainty regarding the status of negotiations in the U.S. Government to increase the statutory debt limit, commonly called the “debt ceiling,” could increase the risk that the U.S. Government may default on payments on certain U.S. Government securities, cause the credit rating of the U.S. Government to

be downgraded, increase volatility in the stock and bond markets, result in higher interest rates, reduce prices of U.S. Treasury securities, and/or increase the costs of various kinds of debt. If a Fund holds securities of a U.S. Government-sponsored entity that is negatively impacted by legislative or regulatory action, is unable to meet its obligations, or its creditworthiness declines, the performance of the Fund will be adversely impacted.

Zero Coupon Securities

Zero-coupon securities are debt obligations which are generally issued at a discount, are payable in full at maturity, and do not provide for current payments of interest prior to maturity. Zero-coupon securities usually trade at a deep discount from their face or par value and are subject to greater market value fluctuations from changing interest rates than debt obligations of comparable maturities which make current distributions of interest. As a result, the NAV of shares of the Fund investing in zero-coupon securities may fluctuate over a greater range than shares of other investment companies investing in securities making current distributions of interest and having similar maturities.

Zero-coupon securities may include U.S. Treasury bills issued directly by the U.S. Treasury or other short-term debt obligations, and longer-term bonds or notes and their unmatured interest coupons which have been separated by their holder, typically a custodian bank or investment brokerage firm. A number of securities firms and banks have stripped the interest coupons from the underlying principal (the “corpus”) of U.S. Treasury securities and resold them in custodial receipt programs with a number of different names, including TIGRS and CATS. The underlying U.S. Treasury bonds and notes themselves are held in book-entry form at the Federal Reserve Bank or, in the case of bearer securities (i.e., unregistered securities that are owned ostensibly by the bearer or holder thereof), in trust on behalf of the owners thereof.

In addition, the U.S. Treasury has facilitated transfers of ownership of zero-coupon securities by accounting separately for the beneficial ownership of particular interest coupons and corpus payments on U.S. Treasury securities through the Federal Reserve book-entry record-keeping system. The Federal Reserve program, as established by the U.S. Treasury Department, is known as “STRIPS” or “Separate Trading of Registered Interest and Principal of Securities.” Under the STRIPS program, the Fund will be able to have its beneficial ownership of U.S. Treasury zero-coupon securities recorded directly in the book-entry record-keeping system in lieu of having to hold certificates or other evidence of ownership of the underlying U.S. Treasury securities.

When debt obligations have been stripped of their unmatured interest coupons by the holder, the stripped coupons are sold separately. The principal or corpus is sold at a deep discount because the buyer receives only the right to receive a future fixed payment on the security and does not receive any rights to periodic cash interest payments. Once stripped or separated, the corpus and coupons may be sold separately. Typically, the coupons are sold separately or grouped with other coupons with like maturity dates and sold in such bundled form. Purchasers of stripped obligations acquire, in effect, discount obligations that are economically identical to the zero-coupon securities issued directly by the obligor.

FOREIGN SECURITIES (including emerging markets)

Generally, foreign securities are those securities which are issued by companies organized outside the U.S. and principally traded in foreign markets (“Foreign Companies”). This includes equity and fixed income securities of Foreign Companies and obligations of foreign branches of U.S. banks and foreign or U.S. branches of foreign banks, including European Certificates of Deposit, European Time Deposits, Canadian Time Deposits, Canadian Yankee Bonds, Canadian Certificates of Deposit, investments in Canadian Commercial Paper, and europaper. In addition, the Fund may invest in depositary receipts. The Fund may also invest in securities issued or guaranteed by Foreign Companies or foreign governments, their political subdivisions, agencies or instrumentalities, and obligations of supranational entities such as the World Bank and the Asian Development Bank.

Foreign securities are normally denominated and traded in foreign currencies. Although foreign exchange dealers do not charge a fee for currency conversion, they do realize a profit based on the difference (the “spread”) between prices at which they buy and sell various currencies. Thus, a dealer may offer to sell a foreign currency

to the Fund at one rate, while offering a lesser rate of exchange should the Fund desire to resell that currency to the dealer. For additional information see “Foreign Currency Transactions” above.

The Fund may also invest in securities of emerging markets issuers. A nation's economy that is progressing toward becoming advanced, as shown by some liquidity in local debt and equity markets and the existence of some form of market exchange and regulatory body is considered to be an emerging market.

Emerging markets generally do not have the level of market efficiency and strict standards in accounting and securities regulation to be on par with advanced economies (such as the United States, Europe and Japan), but emerging markets will typically have a physical financial infrastructure including banks, a stock exchange and a unified currency. Emerging markets may be sought by investors for the prospect of high returns, as they often experience faster economic growth as measured by GDP. Investments in emerging markets may involve greater risk due to political instability, domestic infrastructure problems, currency volatility and limited equity opportunities. Also, local stock exchanges may not offer liquid markets for outside investors.

Some emerging markets countries may have fixed or managed currencies that are not free-floating against the U.S. dollar. Further, certain currencies may not be traded internationally. Certain of these currencies have experienced a steady devaluation relative to the U.S. dollar. Any devaluation in the currencies in which the Fund’s securities are denominated may have a detrimental impact on the Fund.

The taxation systems at the federal, regional and local levels in developing or emerging market countries may be less transparent and inconsistently enforced, and subject to sudden change. Developing or emerging market countries may also have a higher degree of corruption and fraud than developed market countries, as well as counterparties and financial institutions with less financial sophistication, creditworthiness and/or resources. Emerging markets countries may have less developed legal systems allowing for enforcement of private property rights and/or redress for injuries to private property, such as bankruptcy. The ability to bring and enforce actions in developing or emerging market countries, or to obtain information needed to pursue or enforce such actions, may be limited and shareholder claims may be difficult or impossible to pursue.

Emerging markets countries may also have less stringent regulatory, disclosure, financial reporting, accounting, auditing and recordkeeping standards than companies in more developed countries and, as a result, the nature and quality of such information may vary. Information about such companies may be less available and reliable and, therefore, the ability to conduct adequate due diligence in developing or emerging markets may be limited which can impede the Fund’s ability to evaluate such companies. In addition, certain developing or emerging market countries may impose material limitations on Public Company Accounting Oversight Board (“PCAOB”) inspection, investigation and enforcement capabilities which hinder the ability to engage in independent oversight or inspection of accounting firms located in or operating in certain developing or emerging markets; there is no guarantee that the quality of financial reporting or the audits conducted by audit firms of developing or emerging market issuers meet PCAOB standards.

Some countries with emerging securities markets have experienced substantial, and in some periods, extremely high, rates of inflation for many years. Inflation and rapid fluctuation in inflation rates have had and may continue to have negative effects on the economies and securities markets of certain countries. Moreover, the economies of some countries may differ favorably or unfavorably from the U.S. economy in such respects as rate of growth of gross domestic product, the rate of inflation, capital reinvestment, resource self-sufficiency, number and depth of industries forming the economy’s base, governmental controls and investment restrictions that are subject to political change and balance of payments position. Further, there may be greater difficulties or restrictions with respect to investments made in emerging markets countries.

Emerging markets typically have substantially less volume than U.S. markets. In addition, securities in many such markets are less liquid, and their prices often are more volatile, than securities of comparable U.S. companies. Such markets often have different clearance and settlement procedures for securities transactions, and in some markets there have been times when settlements have been unable to keep pace with the volume of transactions, making it difficult to conduct transactions. Delays in settlement could result in temporary periods when assets may be uninvested. Settlement problems in emerging markets countries also could cause the Fund to miss attractive investment opportunities. Satisfactory custodial services may not be available in some

emerging markets countries, which may result in the Fund incurring additional costs and delays in the transportation and custody of such securities. Emerging securities markets may also be subject to unexpected market closures.

For more information regarding the risks associated with investing in emerging markets, please see “Emerging Markets Risk” below.

Depositary Receipts

American Depositary Receipts (“ADRs”) are securities, typically issued by a U.S. financial institution (a “depository”), that evidence ownership interests in a security or a pool of securities issued by a foreign issuer and deposited with the depository. ADRs include American Depositary Shares and New York Shares. European Depositary Receipts (“EDRs”), which are sometimes referred to as Continental Depositary Receipts (“CDRs”), are securities, typically issued by a non-U.S. financial institution, that evidence ownership interests in a security or a pool of securities issued by either a U.S. or foreign issuer. Global Depositary Receipts (“GDRs”) are issued globally and evidence a similar ownership arrangement. Generally, ADRs are designed for trading in the U.S. securities markets, EDRs are designed for trading in European securities markets and GDRs are designed for trading in non-U.S. securities markets. The Fund will only invest in ADRs, EDRs, CDRs, and GDRs available for investment through “sponsored facilities.” A sponsored facility is established jointly by the issuer of the security underlying the receipt and a depository.

Foreign Government Securities

Foreign government securities generally consist of fixed income securities supported by national, state or provincial governments or similar political subdivisions. Foreign government securities also include debt obligations of supranational entities, such as international organizations designed or supported by governmental entities to promote economic reconstruction or development, international banking institutions and related government agencies. Examples of these include, but are not limited to, the International Bank for Reconstruction and Development (the “World Bank”), the Asian Development Bank, the European Investment Bank, and the Inter-American Development Bank.

Foreign government securities also include fixed income securities of quasi-governmental agencies that are either issued by entities owned by a national, state or equivalent government or are obligations of a political unit that are not backed by the national government’s full faith and credit.

Foreign Currency Transactions

Foreign currency transactions include purchasing and selling foreign currencies, entering into forward or futures contracts to purchase or sell foreign currencies (see “Forward Foreign Currency Contracts and Foreign Currency Futures Contracts,” below), and purchasing and selling options on foreign currencies (see “Foreign Currency Options,” below). Foreign currency transactions may be used to hedge against uncertainty in the level of future foreign currency exchange rates and to increase current return.

Purchases and sales of foreign currencies on a spot basis are used to increase current return. They are also used in connection with both “transaction hedging” and “position hedging.”

Transaction hedging involves entering into foreign currency transactions with respect to specific receivables or payables generally arising in connection with the purchase or sale of portfolio securities. Transaction hedging is used to “lock in” the U.S. dollar price of a security to be purchased or sold, or the U.S. dollar equivalent of a dividend or interest payment in a foreign currency. The goal is to protect against a possible loss resulting from an adverse change in the relationship between the U.S. dollar and the applicable foreign currency during the period between the date on which the security is purchased or sold or on which the dividend or interest payment is declared, and the date on which such payments are made or received.

Position hedging involves entering into foreign currency transactions either to protect against: (1) a decline in the value of a foreign currency in which a security held or to be sold is denominated; or (2) an increase in the

value of a foreign currency in which a security to be purchased is denominated. In connection with position hedging, the Fund may purchase put or call options on foreign currency and foreign currency futures contracts and buy or sell forward contracts and foreign currency futures contracts.

Neither transaction nor position hedging eliminates fluctuations in the underlying prices of the securities that the Fund owns or intends to purchase or sell. They simply establish a rate of exchange that can be achieved at some future point in time. Additionally, although these techniques tend to minimize the risk of loss due to a decline in the value of the hedged currency, they also tend to limit any potential gain that might result from the increase in the value of such currency.

Hedging transactions are subject to correlation risk due to the fact that the amounts of foreign currency exchange transactions and the value of the portfolio securities involved will not generally be perfectly matched. This is because the future value of such securities in foreign currencies will change as a consequence of market movements in the values of those securities between the dates the currency exchange transactions are entered into and the dates they mature.

DERIVATIVE CONTRACTS

Derivative contracts are financial instruments that require payments based upon changes in the values of designated (or underlying) securities, currencies, commodities, financial indices or other assets. Some derivative contracts (such as futures, forwards and options) require payments relating to a future trade involving the underlying asset. Other derivative contracts (such as swaps) require payments relating to the income or returns from the underlying asset. The other party to a derivative contract is referred to as a counterparty.

Depending upon how the Fund uses derivative contracts and the relationships between the market value of a derivative contract and the underlying asset, derivative contracts may increase or decrease the Fund's exposure to interest rate and currency risks, and may also expose the Fund to liquidity and leverage risks. Over-the-counter ("OTC") contracts also expose the Fund to credit risks in the event that a counterparty defaults on the contract.

Options on Equities, Fixed Income Securities, and Stock Indices

A call option gives the purchaser of the option the right to buy a security at a stated price from the writer (seller) of the option. A put option gives the purchaser of the option the right to sell a security at a stated price to the writer of the option. In a covered call option and during the option period, the writer owns the security (or a comparable security sufficient to satisfy securities exchange requirements) which may be sold pursuant to the option. In a covered put option, the writer holds cash and/or short-term debt instruments in an amount equal to the exercise price of the option. In addition, a call or put will be considered covered if and to the extent that some or all of the risk of the option has been offset by another position. The Fund may write combinations of covered puts and calls on the same underlying security. In general, the Fund may write options in an attempt to increase returns or purchase options for hedging purposes.

The premium received from writing a put or call option increases the Fund's return on the underlying security in the event that the option expires unexercised or is closed out at a profit. The amount of the premium reflects, among other things, the relationship between the exercise price and the current market value of the underlying security, the volatility of the underlying security, the amount of time remaining until expiration, current interest rates, and the effect of supply and demand in the options market and in the market for the underlying security. A put option locks in the price at which the Fund may sell a security it holds, thus hedging against market declines. Such protection is provided during the life of the put option since the Fund, as holder of the option, is able to sell the underlying security at the option's exercise price regardless of any decline in the underlying security's market price. A call option locks in the price at which the Fund may purchase a security, thus hedging against an increase in the market price of a security.

By writing a call option, the Fund limits its opportunity to profit from any increase in the market value of the underlying security above the exercise price of the option but continues to bear the risk of a decline in the value of the underlying security. By writing a put option, the Fund assumes the risk that it may be required to purchase

the underlying security for an exercise price higher than its then current market value, resulting in a potential capital loss unless the security subsequently appreciates in value.

The Fund may terminate an option that it has written prior to its expiration by entering into a closing purchase transaction, in which it purchases an offsetting option. The Fund realizes a profit or loss from a closing transaction if the cost of the transaction (option premium plus transaction costs) is less or more than the premium received from writing the option. Because increases in the market price of a call option generally reflect increases in the market price of the security underlying the option, any loss resulting from a closing purchase transaction may be offset in whole or in part by unrealized appreciation of the underlying security owned by the Fund.

In order for a put option to be profitable, the value of the underlying security/index must decline sufficiently below the exercise price to cover the premium and transaction costs. By using put options in this manner, the Fund will reduce any profit it might otherwise have realized from appreciation of the underlying security/index by the premium paid for the put option and by transaction costs.

In order for a call option to be profitable, the market price of the underlying security/index must rise sufficiently above the exercise price to cover the premium and transaction costs. The successful use of options depends on the ability of the Advisor to forecast interest rate and market movements. For example, if the Fund were to write a call option based on the Advisor's expectation that the price of the underlying security will fall, but the price rises instead, the Fund could be required to sell the security upon exercise at a price below the current market price. Similarly, if the Fund were to write a put option based on the Advisor's expectations that the value of the underlying security will rise, but the price falls instead, the Fund could be required to purchase the security upon exercise at a price higher than the current market price.

Foreign Currency Options

Options on foreign currencies operate similarly to options on securities and are traded primarily in the over-the-counter market ("OTC options"), although options on foreign currencies may also be listed on several exchanges. Options will be purchased or written only when the Advisor believes that a liquid secondary market exists for such options. There can be no assurance that a liquid secondary market will exist for a particular option at any specific time. Options on foreign currencies are affected by all of those factors which influence exchange rates and investments generally.

Purchases and sales of options may be used to increase current return. They are also used in connection with hedging transactions. (See "Foreign Currency Transactions," above).

Writing covered call options on currencies may offset some of the costs of hedging against fluctuations in currency exchange rates. For transaction hedging purposes the Fund may also purchase exchange-listed and OTC put and call options on foreign currency futures contracts and on foreign currencies. A put option on a futures contract gives the Fund the right to assume a short position in the futures contract until expiration of the option. A call option on a futures contract gives the Fund the right to assume a long position in the futures contract until the expiration of the option.

The value of a foreign currency option is dependent upon the value of the foreign currency and the U.S. dollar, and may have no relationship to the investment merits of a foreign security. Because foreign currency transactions occurring in the interbank market involve substantially larger amounts than those that may be involved in the use of foreign currency options, investors may be disadvantaged by having to deal in an odd lot market (generally consisting of transactions of less than \$1 million) for the underlying foreign currencies at prices that are less favorable than for round lots.

There is no systematic reporting of last sale information for foreign currencies and there is no regulatory requirement that quotations available through dealers or other market sources be firm or revised on a timely basis. Available quotation information is generally representative of very large transactions in the interbank market and thus may not reflect relatively smaller transactions (less than \$1 million) where rates may be less favorable. The interbank market in foreign currencies is a global, around-the-clock market. To the extent that

the U.S. options markets are closed while the markets for the underlying currencies remain open, significant price and rate movements may take place in the underlying markets that cannot be reflected in the U.S. options markets. Options contracts are generally valued at the mean of the bid and asked price as reported on the highest-volume exchange (in terms of the number of option contracts traded for that issue) on which such options are traded.

Futures Contracts and Options on Futures Contracts

A futures contract is a binding contractual commitment which, if held to maturity, will result in an obligation to make or accept delivery of a security at a specified future time and price. By purchasing futures (assuming a “long” position), the Fund will legally obligate itself to accept the future delivery of the underlying security and pay the agreed price. By selling futures (assuming a “short” position), it will legally obligate itself to make the future delivery of the security against payment of the agreed price. Positions taken in the futures markets are not normally held to maturity, but are instead liquidated through offsetting transactions which may result in a profit or a loss. While futures positions taken by the Fund will usually be liquidated in this manner, the Fund may instead make or take delivery of the underlying securities whenever it appears economically advantageous to the Fund to do so. Futures contracts in the U.S. have been designed by exchanges that have been designated “contract markets” by the CFTC and must be executed through a futures commission merchant (“FCM”), which is a brokerage firm that is a member of the relevant contract market. Each exchange guarantees performance of the contracts as between the clearing members of the exchange, thereby reducing the risk of counterparty default. Futures contracts may also be entered into on certain exempt markets, including exempt boards of trade and electronic trading facilities, available to certain market participants. Because all transactions in the futures market are made, offset or fulfilled by an FCM through a clearinghouse associated with the exchange on which the contracts are traded, the Fund will incur brokerage fees when it buys or sells futures contracts. A clearing corporation associated with the exchange on which futures are traded assumes responsibility for such closing transactions and guarantees that the Fund’s sale and purchase obligations under closed-out positions will be performed at the termination of the contract. Futures contracts are considered to be commodity contracts.

The Fund may purchase and write put and call options on futures contracts, as they become available. Such options are similar to options on securities except that options on futures contracts give the purchaser the right, in return for the premium paid, to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put) at a specified exercise price at any time during the period of the option. As with options on securities, the holder or writer of an option may terminate its position by selling or purchasing an option of the same series. There is no guarantee that such closing transactions can be effected. The Fund will be required to deposit initial margin and variation margin with respect to put and call options on futures contracts written by it pursuant to brokers’ requirements, and, in addition, net option premiums received will be included as initial margin deposits. See “Margin Payments” below. Compared to the purchase or sale of futures contracts, the purchase of call or put options on futures contracts involves less potential risk to the Fund because the maximum amount at risk is the premium paid for the options plus transactions costs. However, there may be circumstances when the purchases of call or put options on a futures contract would result in a loss to the Fund when the purchase or sale of the futures contracts would not, such as when there is no movement in the prices of debt securities. The writing of a put or call option on a futures contract involves risks similar to those risks relating to the purchase or sale of futures contracts.

Futures contracts and options thereon may also be used for non-hedging purposes, including to seek to increase liquidity, provide efficient portfolio management, broaden investment opportunities, implement a tax or cash management strategy, gain exposure to a particular security or segment of the market, modify the effective duration of the Fund’s portfolio investments and/or enhance total return. However, these instruments are used, their successful use is not assured and will depend upon, among other factors the Advisor’s ability to predict and understand relevant market movements.

Margin Payments. When the Fund purchases or sells a futures contract, it is required to deposit with the Custodian an amount of cash, U.S. Treasury bills, or other permissible collateral equal to a small percentage of the amount of the futures contract. This amount is known as “initial margin.” The nature of initial margin is different from that of margin in security transactions in that it does not involve borrowing money to finance transactions. Rather, initial margin is similar to a performance bond or good faith deposit that is returned to the Fund upon termination of the contract, assuming the Fund satisfies its contractual obligations.

Subsequent payments to and from the broker occur on a daily basis in a process known as “marking to market.” These payments are called “variation margin,” and are made as the value of the underlying futures contract fluctuates. For example, when the Fund sells a futures contract and the price of the underlying security rises above the delivery price, the Fund’s position declines in value. The Fund then pays a broker a variation margin payment equal to the difference between the delivery price of the futures contract and the market price of the securities underlying the futures contract. Conversely, if the price of the underlying security falls below the delivery price of the contract, the Fund’s futures position increases in value. The broker then must make a variation margin payment equal to the difference between the delivery price of the futures contract and the market price of the currency underlying the futures contract.

When the Fund terminates a position in a futures contract, a final determination of variation margin is made, additional cash is paid by or to the Fund, and the Fund realizes a loss or gain. Such closing transactions involve additional commission costs.

Index Futures Contracts and Options on Index Futures Contracts

A stock index futures contract is a contract to buy or sell units of a stock index at a specified future date at a price agreed upon when the contract is made. A debt index futures contract is a contract to buy or sell units of a specified debt index at a specified future date at a price agreed upon when the contract is made. A unit is the current value of the index.

The following example illustrates generally the manner in which index futures contracts operate. The Standard & Poor’s 100 Stock Index (“S&P 100”) is composed of 100 selected common stocks, most of which are listed on the New York Stock Exchange (“NYSE”). The S&P 100 assigns relative weightings to the common stocks included in the Index, and the Index fluctuates with changes in the market values of those common stocks. In the case of the S&P 100, contracts are to buy or sell 100 units. Thus, if the value of the S&P 100 were \$180, one contract would be worth \$18,000 (100 units x \$180). The stock index futures contract specifies that no delivery of the actual stocks making up the index will take place. Instead, settlement in cash must occur upon the termination of the contract, with the settlement being the difference between the contract price and the actual level of the stock index at the expiration of the contract. For example, if the Fund enters into a futures contract to buy 100 units of the S&P 100 at a specified future date at a contract price of \$180 and the S&P 100 is at \$184 on that future date, the Fund will gain \$400 (100 units x gain of \$4).

If the Fund enters into a futures contract to sell 100 units of the stock index at a specified future date at a contract price of \$180 and the S&P 100 is at \$182 on that future date, the Fund will lose \$200 (100 units x loss of \$2). The Fund may purchase or sell futures contracts with respect to any stock index. Positions in index futures may be closed out only on an exchange or board of trade which provides a secondary market for such futures. Purchases and sales of index futures may be used to hedge an investment. To hedge an investment successfully, however, the Fund must invest in futures contracts with respect to indices or sub-indices the movements of which will have a significant correlation with movements in the prices of the Fund’s securities.

Options on index futures contracts are similar to options on securities except that options on index futures contracts give the purchaser the right, in return for the premium paid, to assume a position in an index futures contract (a long position if the option is a call and a short position if the option is a put) at a specified exercise price at any time during the period of the option. Upon exercise of the option, the holder assumes the underlying futures position and receives a variation margin payment of cash or securities approximating the increase in the value of the holder’s option position. If an option is exercised on the last trading day prior to the expiration date of the option, the settlement is made entirely in cash based on the difference between the exercise price of the option and the closing level of the index on which the futures contract is based on the expiration date. Purchasers of options who fail to exercise their options prior to the exercise date suffer a loss of the premium paid. As an alternative to purchasing call and put options on index futures contracts, the Fund may purchase put and call options on the underlying indices themselves to the extent that such options are traded on national securities exchanges. Index options are similar to options on individual securities in that the purchaser of an index option acquires the right to buy, and the writer undertakes the obligation to sell, an index at a stated exercise price during the term of the option. Instead of giving the right to take or make actual delivery of securities, the holder of an index option has the right to receive a cash “exercise settlement amount.” This amount is equal to the amount by which the fixed exercise price of the option exceeds (in the case of a put) or is less than (in the case of a call) the closing value of the underlying index on the date of the exercise, multiplied by a fixed “index multiplier.” The Fund will enter into an option position

only if there appears to be a liquid secondary market for such options.

The aggregate premium paid on all options on stock indices will not exceed 20% of the Fund's total assets.

Forward Foreign Currency Contracts and Foreign Currency Futures Contracts

A forward foreign currency contract involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract as agreed by the parties, at a price set at the time of the contract. In the case of a cancelable forward contract, the holder has the unilateral right to cancel the contract at maturity by paying a specified fee. The contracts are traded in the interbank market conducted directly between currency traders (usually large commercial banks) and their customers. A forward contract generally has no deposit requirement, and no commissions are charged at any stage for trades.

A foreign currency futures contract is a standardized contract for the future delivery of a specified amount of a foreign currency at a future date at a price set at the time of the contract. Foreign currency futures contracts traded in the U.S. are designed by and traded on exchanges regulated by the Commodity Futures Trading Commission ("CFTC"), such as the New York Mercantile Exchange.

Forward foreign currency contracts differ from foreign currency futures contracts in certain respects. For example, the maturity date of a forward contract may be any fixed number of days from the date of the contract agreed upon by the parties, rather than a predetermined date in a given month. Forward contracts may be in any amounts agreed upon by the parties rather than predetermined amounts. Also, forward foreign currency contracts are traded directly between currency traders so that no intermediary is required. A forward contract generally requires no margin or other deposit.

At the maturity of a forward or futures contract, the Fund may either accept or make delivery of the currency specified in the contract, or at or prior to maturity enter into a closing transaction involving the purchase or sale of an offsetting contract. Closing transactions with respect to forward contracts are usually effected with the currency trader who is a party to the original forward contract. Closing transactions with respect to futures contracts are effected on a commodities exchange; a clearing corporation associated with the exchange assumes responsibility for closing out such contracts.

Forward foreign currency contracts and foreign currency futures contracts can be used to increase current return. They are also used in connection with both "transaction hedging" and "position hedging." ("Foreign Currency Transactions," above).

Swap Agreements

The Fund may enter into interest rate, index and currency exchange rate swap agreements in an attempt to obtain a particular desired return at a lower cost to the Fund than if it had been invested directly in an instrument that yielded that desired return. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard "swap" transaction, two parties agree to exchange the returns (or differentials in rates of returns) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or "swapped" between the parties are calculated with respect to a "notional amount," i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. The "notional amount" of the swap agreement is only a fictive basis on which to calculate the obligations the parties to a swap agreement have agreed to exchange. The Fund's obligations (or rights) under a swap agreement will generally be equal only to the amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount"). The Fund's obligations under a swap agreement will be accrued daily (offset against any amounts owing to the Fund).

Whether the Fund's use of swap agreements enhance the Fund's total return will depend on the Advisor's ability correctly to predict whether certain types of investments are likely to produce greater returns than other investments. Because they are two-party contracts and may have terms of greater than seven days, swap agreements may be considered to be illiquid. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. The Advisor or sub-advisor, if any, will cause the Fund to enter into swap agreements only with counterparties that would be eligible

for consideration as repurchase agreement counterparties under the Fund's repurchase agreement guidelines. The swap market is a relatively new market and is largely unregulated. It is possible that developments in the swaps market, including potential government relation, could adversely affect the Fund's ability to terminate existing swap agreements or to realize amounts to be received under such agreements.

Certain swap agreements are exempt from most provisions of the Commodity Exchange Act and, therefore, are not regulated as futures or commodity option transactions under the Commodity Exchange Act., pursuant to regulations of the CFTC. To qualify for this exemption, a swap agreement must be entered into by "eligible participants," which include the following, provided the participants' total assets exceed established levels: a bank or trust company, savings association or credit union, insurance company, investment company subject to regulation under the 1940 Act, commodity pool, corporation, partnership, proprietorship, organization, trust or foreign person. To be eligible, natural persons and most other entities must have total assets exceeding \$10 million; commodity pools and employee benefit plans must have assets exceeding \$5 million. In addition, an eligible swap transaction must meet three conditions. First, the swap agreement may not be part of a fungible class of agreements that are standardized as to their material economic terms. Second, the creditworthiness of parties with actual or potential obligations under the swap agreement must be a material consideration in entering into or determining the terms of the swap agreement, including pricing, cost or credit enhancement terms. Third, swap agreements may not be entered into and traded on or through multilateral transaction execution facility.

Exclusion of Investment Advisor from Commodity Pool Operator Definition

With respect to the Fund, the Advisor has claimed an exclusion from the definition of "commodity pool operator" (CPO) under the Commodity Exchange Act ("CEA") and the rules of the CFTC and, therefore, is not subject to CFTC registration or regulation as a CPO. In addition, with respect to the Fund, the Advisor is relying upon a related exclusion from the definition of "commodity trading advisor" ("CTA") under the CEA and the rules of the CFTC.

The terms of the CPO exclusion require the Fund, among other things, to adhere to certain limits on its investments in "commodity interests." Commodity interests include commodity futures, commodity options and swaps, which in turn include non-deliverable currency forward contracts, as further described below. Because the Advisor and the Fund intend to comply with the terms of the CPO exclusion, the Fund may, in the future, need to adjust its investment strategies, consistent with its investment objective, to limit its investments in these types of instruments. The Fund is not intended as a vehicle for trading in the commodity futures, commodity options or swaps markets. The CFTC has neither reviewed nor approved the Advisor's reliance on these exclusions, or the Fund, its investment strategies or this SAI.

Generally, the exclusion from CPO regulation on which the Advisor relies requires the Fund to meet one of the following tests for its commodity interest positions, other than positions entered into for bona fide hedging purposes (as defined in the rules of the CFTC): either (1) the aggregate initial margin and premiums required to establish the Fund's positions in commodity interests may not exceed 5% of the liquidation value of the Fund's portfolio (after taking into account unrealized profits and unrealized losses on any such positions); or (2) the aggregate net notional value of the Fund's commodity interest positions, determined at the time the most recent such position was established, may not exceed 100% of the liquidation value of the Fund's portfolio (after taking into account unrealized profits and unrealized losses on any such positions). In addition to meeting one of these trading limitations, the Fund may not be marketed as a commodity pool or otherwise as a vehicle for trading in the commodity futures, commodity options or swaps markets. If, in the future, the Fund can no longer satisfy these requirements, the Advisor would withdraw its notice claiming an exclusion from the definition of a CPO, and the Advisor would be subject to registration and regulation as a CPO with respect to the Fund, in accordance with CFTC rules that apply to CPOs of registered investment companies. Generally, these rules allow for substituted compliance with CFTC disclosure and shareholder reporting requirements, based on the Advisor's compliance with comparable SEC requirements. However, as a result of CFTC regulation with respect to the Fund, the Fund may incur additional compliance and other expenses.

OTHER TRANSACTIONS/INVESTMENTS

Exchange-Traded Notes

The Fund may invest in exchange-traded notes (“ETNs”). ETNs are generally notes representing the debt of the issuer, usually a financial institution. ETNs combine both aspects of bonds and ETFs. An ETN’s returns are based on the performance of one or more underlying assets, reference rate or indexes, minus fees and expenses. Similar to ETFs, ETNs are listed on an exchange and traded in the secondary market. However, unlike an ETF, an ETN can be held until the ETN’s maturity, at which time the issuer will pay a return linked to the performance of the specific asset, index or rate (“reference instrument”) to which the ETN is lined minus certain fees. Unlike regular bonds, ETNs do not make periodic interest payments, and principal is not protected.

The value of an ETN may be influenced by, among other things, time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in underlying markets, changes in the applicable interest rates, the performance of the reference instrument, changes in the issuer’s credit rating and economic, legal, political or geographic events that affect the reference instrument. ETNs also incur certain expenses not incurred by their applicable reference instrument. Some ETNs that use leverage can, at times, be relatively illiquid and, thus, they may be difficult to purchase or sell at a fair price. Levered ETNs are subject to the same risk as other instruments that use leverage in any form. While leverage allows for greater potential return, the potential for loss is also greater. Finally, additional losses may be incurred if the investment loses value because, in addition to the money lost on the investment, the loan still needs to be repaid.

Other Investment Company Securities

The Fund may invest in securities of other investment companies (“Acquired Funds”), including ETFs and traditional mutual funds, as an efficient means of carrying out its investment policies and managing their uninvested cash. The Fund’s shareholders indirectly bear the expenses of the Acquired Funds in which the Fund invests.

Except under exemptive rules or relief from the SEC, including Rule 12d1-4 discussed below, the Fund may not invest more than 10% of its total assets at any one time in the shares of Acquired Funds, 5% of its total assets in the shares of any one Acquired Fund, or own more than 3% of the shares of any one Acquired Fund. When the Fund invests in the shares of Acquired Funds, investment advisory and other fees will apply, and the investment’s yield will be reduced accordingly.

Rule 12d1-4 under the 1940 Act allows a fund to acquire the securities of another investment company in excess of the limitations imposed by Section 12 of the 1940 Act without obtaining an exemptive order from the SEC, subject to certain terms and conditions. Among other conditions, the rule generally requires that, prior to acquiring the securities of another fund in reliance on the rule, the acquiring fund must enter into a fund of funds investment agreement with the acquired fund.

Rule 12d1-4 also is designed to limit the use of complex fund structures. Under Rule 12d1-4, an acquired fund is prohibited from purchasing or otherwise acquiring the securities of another investment company or private fund if, immediately after the purchase, the securities of investment companies and private funds owned by the acquired fund have an aggregate value in excess of 10% of the value of the acquired fund’s total assets, subject to certain limited exceptions.

In addition to Rule 12d1-4, the 1940 Act and related rules provide other exemptions from these restrictions. For example, these limitations do not apply to investments by a Fund in investment companies that are money market funds, including money market funds that have the Advisor or an affiliate of the Advisor as an investment adviser.

Repurchase Agreements

Repurchase agreements are agreements through which banks, broker-dealers, and other financial institutions approved by the Trustees, sell securities (usually U.S. Government securities) to the Fund and agree to repurchase those securities at a specified price and time (usually not more than seven days from the original

sale). The seller's obligation to pay the repurchase price is secured by the securities to be repurchased. These securities are required to be held by the Fund, the Custodian, or a third-party custodian. In order to protect the Fund's interest, collateral securities must have a value of at least 100% of the resale price at all times. (The seller must provide additional collateral in the event that this condition is not met). In general, the Advisor will require collateral securities to have a value of at least 102% of the resale price at the time the repurchase agreement is made. The collateral is marked to market on a daily basis, thus enabling the Advisor to determine when to request additional collateral from the seller.

If a seller defaults on its repurchase obligation, the Fund could realize a loss on the sale of the underlying securities to the extent that the proceeds of the sale (including accrued interest) are less than the resale price. In addition, even though the U.S. Bankruptcy Code provides protection to the Fund if the seller becomes bankrupt or insolvent, the Fund may suffer losses in such event.

Reverse Repurchase Agreements

Each Fund may borrow funds for temporary purposes by entering into reverse repurchase agreements, provided such action is consistent with the Fund's investment objective and fundamental investment restrictions. As a matter of non-fundamental policy, each Fund intends to limit total borrowings under reverse repurchase agreements to no more than 10% of the value of its total assets. Pursuant to a reverse repurchase agreement, a Fund will sell portfolio securities to financial institutions such as banks or to broker-dealers, and agree to repurchase the securities at a mutually agreed-upon date and price. A Fund intends to enter into reverse repurchase agreements only to avoid otherwise selling securities during unfavorable market conditions to meet redemptions. Reverse repurchase agreements involve the risk that the market value of the securities sold by a Fund may decline below the price at which a Fund is obligated to repurchase the securities. Reverse repurchase agreements and certain other financing transactions that involve a future payment obligation are subject to Rule 18f-4 under the 1940 Act.

Restricted and Illiquid Securities

Generally, an "illiquid security" or "illiquid investment" is any investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. Illiquid investments generally include investments for which no market exists or which are legally restricted as to their transfer (such as those issued pursuant to an exemption from the registration requirements of the federal securities laws). Restricted securities are generally sold in privately negotiated transactions, pursuant to an exemption from registration under the 1933 Act. If registration of a security previously acquired in a private transaction is required, the Fund, as the holder of the security, may be obligated to pay all or part of the registration expense and a considerable period may elapse between the time it decides to seek registration and the time it will be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, the Fund might obtain a less favorable price than prevailed when it decided to seek registration of the security. To the extent it is determined that there is a liquid institutional or other market for certain restricted securities, the Fund would consider them to be liquid securities. An example is a restricted security that may be freely transferred among qualified institutional buyers pursuant to Rule 144A under the 1933 Act, and for which a liquid institutional market has developed. Rule 144A securities may be subject, however, to a greater possibility of becoming illiquid than securities that have been registered with the SEC.

The following factors may be taken into account in determining whether a restricted security is properly considered a liquid security: (i) the frequency of trades and quotes for the security; (ii) the number of dealers willing to buy or sell the security and the number of other potential buyers; (iii) any dealer undertakings to make a market in the security; and (iv) the nature of the security and of the marketplace trades (e.g., any demand, put or tender features, the method of soliciting offers, the mechanics and other requirements for transfer, and the ability to assign or offset the rights and obligations of the security). The nature of the security and its trading includes the time needed to sell the security, the method of soliciting offers to purchase or sell the security, and the mechanics of transferring the security including the role of parties such as foreign or U.S. custodians, subcustodians, currency exchange brokers, and depositories.

The sale of illiquid investments often requires more time and results in higher brokerage charges or dealer discounts and other selling expenses than the sale of investments eligible for trading on national securities exchanges or in the OTC markets. Illiquid investments often sell at a price lower than similar investments that are not subject to restrictions on resale.

The risk to the Fund in holding illiquid investments is that they may be more difficult to sell if the Fund wants to dispose of the investment in response to adverse developments or in order to raise money for redemptions or other investment opportunities. Illiquid trading conditions may also make it more difficult for the Fund to realize an investment's fair value.

The Fund may also be unable to achieve its desired level of exposure to a certain investment, issuer, or sector due to overall limitations on its ability to invest in illiquid investments and the difficulty in purchasing such investments.

The Fund may not acquire any illiquid investment if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments that are assets. Because illiquid investments may not be readily marketable, the portfolio managers and/or investment personnel may not be able to dispose of them in a timely manner. As a result, the Fund may be forced to hold illiquid investments while their price depreciates. Depreciation in the price of illiquid investments may cause the net asset value or market price of the Fund to decline.

Securities Lending

In order to generate additional income, the Fund may lend its portfolio securities on a short-term basis to certain brokers, dealers or other financial institutions. In determining whether to lend to a particular broker, dealer or financial institution, the Advisor will consider all relevant facts and circumstances, including the size, creditworthiness and reputation of the borrower. Any loans made will be continuously secured by collateral in cash at least equal to 100% of the value of the securities on loan for the Fund. The Fund may lend up to 33 ⅓% of its total assets. Such loans must be fully collateralized by cash or U.S. government obligations and marked to market daily. Although the loan is fully collateralized, if the borrower defaults, the Fund could lose money.

While portfolio securities are on loan, the borrower will pay to the lending Fund any dividends or interest received on the securities. In addition, the Fund retains all or a portion of the interest received on investment of the collateral or receives a fee from the borrower. Although voting rights, or rights to consent, with respect to the loaned securities pass to the borrower, the lending Fund retains the right to call the loans at any time on reasonable notice, and it will do so to enable the Fund to exercise voting rights on any matters materially affecting the investment. The Fund may also call such loans in order to sell the securities.

One of the risks in lending portfolio securities, as with other extensions of credit, is the possible delay in recovery of the securities or possible loss of rights in the collateral should the borrower fail financially. There is also the risk that, when lending portfolio securities, the securities may not be available to the Fund on a timely basis and the Fund may, therefore, lose the opportunity to sell the securities at a desirable price. In addition, in the event that a borrower of securities would file for bankruptcy or become insolvent, disposition of the securities may be delayed pending court action.

When-issued and Delayed Delivery Transactions

When-issued securities are securities purchased for delivery beyond the normal settlement date at a stated price and yield and thereby involve risk that the yield obtained in the transaction will be less than that available in the market when the delivery takes place or that the seller will fail to complete the transaction. In addition, because of delayed settlement, a Fund may pay more than market value on the settlement date. The Advisor may choose to dispose of a commitment prior to settlement. A Fund will not pay for such securities or start earning interest on them until they are received.

The Fund does not intend to engage in when-issued and delayed delivery transactions unless it can physically settle the transaction within 35 days of its trade date.

INVESTMENT RISKS

The Prospectus discusses the Fund's principal investment risks. Below you will find more detail about the risks associated with the types of investments and investment practices permitted by the Fund, including those which are not principal investment risks of the Fund.

EQUITY SECURITIES RISK

General Risk

Equity risk is the risk that stock prices will fall quickly and dramatically over short or extended periods of time. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices. Often, dramatic movements in prices occur in response to the overall market environment or reports of a company's earnings, economic statistics, or other factors that affect an issuer's profitability. The price of equity securities can decline and reduce the value of the Fund investing in equities. Stock markets are volatile.

To the extent that the Fund invests in smaller capitalization stocks, it may be subject to greater risks than those associated with investment in larger, more established companies. Smaller companies tend to have limited product lines, markets, or financial resources, and may be dependent on a small management group. Smaller company stocks may be subject to more abrupt or erratic price movements, for reasons such as lower trading volumes, greater sensitivity to changing conditions, and less certain growth prospects. Additionally, there are fewer market makers for these stocks and wider spreads between quoted bid and ask prices in the over-the-counter market for these stocks. Small cap stocks also tend to be subject to greater liquidity risk, particularly during periods of market disruption, and there is often less publicly available information concerning these securities. The Fund that invests in high quality or "blue chip" equity securities or securities of established companies with large market capitalizations (which generally have strong financial characteristics) can also be negatively impacted by overall market and economic conditions.

Exchange-Traded Funds Risk

ETFs generally present the same primary risks as an investment in a conventional fund (e.g., one that is not exchange traded) that has the same investment objectives, strategies, and policies. The price of an ETF can fluctuate up or down, and the Fund could lose money investing in the ETF if the prices of the securities owned by the ETF go down. In addition, an investment in an ETF may be subject to the following risks that do not apply to conventional funds: (1) the market price of the ETF's shares may trade above or below their NAV; (2) an active trading market for the ETF's shares may not develop or be maintained; or (3) trading of the ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are delisted from the exchange, or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally.

Market Price Variance Risk (ETFs). ETFs are listed for trading on a securities exchange and can be bought and sold in the secondary market at market prices. The market prices of ETF shares will fluctuate in response to changes in their respective NAVs and supply and demand for their shares. Differences between secondary market prices and the NAV for an ETF's shares may be due largely to supply and demand forces in the secondary market, which forces may not be the same as those influencing prices for securities or instruments held by the Fund at a particular time. There may, however, be times when the market price and the NAV vary significantly and an investor may pay more than NAV when buying ETF shares on the secondary market, and receive less than NAV when it sells those ETF shares. The market price of ETF shares includes a "bid-ask spread" charged by the lead market maker, market makers or other participants that trade ETF shares. In times of severe market disruption, the bid-ask spread often increases significantly. This means that an ETF's shares may trade at a discount to NAV, and the discount is likely to be greatest when the price of the ETF's shares is falling fastest, which may be the time that investors most want to sell the ETF's shares. An ETF's investment results are measured based upon the daily NAV of the ETF.

Accordingly, the Fund purchasing and selling ETFs in the secondary market may not experience investment results consistent with those purchasing from and redeeming Creation Units with an ETF directly.

Securities Linked to the Real Estate Market and REIT Risk

Investing in securities of companies in the real estate industry subjects the Fund to the risks associated with the direct ownership of real estate. These risks include:

- declines in the value of real estate;
- risks related to local, regional, and national economic conditions;
- possible lack of availability of mortgage funds;
- overbuilding;
- extended vacancies of properties;
- increased competition;
- increases in property taxes and operating expenses;
- change in zoning laws;
- losses due to costs resulting from the clean-up of environmental problems;
- liability to third parties for damages resulting from environmental problems;
- casualty or condemnation losses;
- limitations on rents;
- changes in neighborhood values and the appeal of properties to tenants; and
- changes in interest rates.

Securities of companies in the real estate industry include equity REITs and mortgage REITs. Equity REITs may be affected by changes in the value of the underlying property owned by the trusts, while mortgage REITs may be affected by the quality of any credit extended. Further, equity and mortgage REITs are dependent upon management skills and generally may not be diversified. Equity and mortgage REITs are also subject to heavy cash flow dependency, defaults by borrowers, and self-liquidations. In addition, equity and mortgage REITs could possibly fail to qualify for tax free pass-through of income under the Code, or to maintain their exemptions from registration under the 1940 Act. The above factors may also adversely affect a borrower's or a lessee's ability to meet its obligations to the REIT. In the event of a default by a borrower or lessee, the REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments.

In addition, even the larger REITs in the industry tend to be small to medium-sized companies in relation to the equity markets as a whole. See "Small and Medium Size Company Risk" (below) for a discussion of the risks associated with investments in these companies.

Small and Medium Size Company Risk

Companies that are small or unseasoned (e.g., less than three years of operating history) are more likely than larger or established companies to fail or not to accomplish their goals. As a result, the value of their securities could decline significantly. These companies are less likely to survive since they are often dependent upon a small number of products and may have limited financial resources and a small management group. Small or unseasoned companies often have a greater degree of change in earnings and business prospects than larger or established companies, resulting in more volatility in the price of their securities. The securities of small or unseasoned companies may have limited marketability. This factor could cause the value of the Fund's investments to decrease if it needs to sell such securities when there are few interested buyers. Small or unseasoned companies usually have fewer outstanding shares than larger or established companies. Therefore, it may be more difficult to buy or sell large amounts of these shares without unfavorably impacting the price of the security. There may be less publicly available information about small or unseasoned companies. Therefore, when making a decision to purchase a security for the Fund, the Advisor may not be aware of problems associated with the company issuing the security. Investments in the securities of medium-sized companies present risks similar to those associated with small or unseasoned companies, although to a lesser degree due to the larger size of the companies.

FOREIGN SECURITIES RISK

General Risk

Compared with investing in the U.S., investing in foreign markets involves a greater degree and variety of risk. Investors in international or foreign markets may face delayed settlements, currency controls, and adverse economic developments as well as higher overall transaction costs. Foreign governments may expropriate assets, impose capital or currency controls, impose punitive taxes, impose limits on ownership, or nationalize a company or industry. Any of these actions could have a severe effect on security prices and impair the Fund's ability to bring its capital or income back to the U.S. The value of foreign securities may be affected by incomplete, less frequent or inaccurate financial information about their issuers, social upheavals or political actions ranging from tax code changes to governmental collapse. Foreign Companies may also receive less coverage than U.S. companies by market analysts and the financial press. In addition, foreign countries may lack uniform accounting, auditing, and financial reporting standards or regulatory requirements comparable to those applicable to U.S. companies.

The securities of some Foreign Companies are less liquid and at times more volatile than securities of comparable U.S. companies. Foreign brokerage commissions and other fees are also generally higher than in the U.S.

In addition, with respect to certain foreign countries, there is a possibility of nationalization or expropriation of assets, confiscatory taxation, political or financial instability, and diplomatic developments which could affect the value of investments in those countries. In certain countries, legal remedies available to investors may be more limited than those available with respect to investments in the U.S. or other countries. The laws of some foreign countries may limit the Fund's ability to invest in securities of certain issuers located in those countries. Special tax considerations apply to foreign securities.

ADRs and Domestically Traded Foreign Securities Risk

Because the Fund may invest in ADRs and other domestically traded securities of Foreign Companies, the Fund's share prices may be more affected by foreign economic and political conditions, taxation policies, and accounting and auditing standards than if the Fund did not invest in such securities.

Currency Risk

Exchange rates for currencies fluctuate daily. Fluctuations in the U.S. dollar's value versus other currencies may erode or reverse gains from investments denominated in foreign currencies or widen losses. The combination of currency risk and market risk tends to make securities traded in foreign markets more volatile than securities traded exclusively in the U.S. Exchange rates for currencies fluctuate daily. Foreign securities are normally denominated and traded in foreign currencies. As a result, the value of the Fund's foreign investments and the value of its shares may be affected favorably or unfavorably by changes in currency exchange rates relative to the U.S. dollar. The combination of currency risk and market risks tends to make securities traded in foreign markets more volatile than securities traded exclusively in the U.S. Exchange rate fluctuations also may impair an issuer's ability to repay U.S. dollar denominated debt, thereby increasing credit risk of such debt.

Foreign Custodial Services and Related Investment Costs Risk

Foreign custodial services and other costs relating to investment in international securities markets are generally more expensive than in the U.S. Foreign markets have settlement and clearance procedures that differ from those in the U.S. Foreign settlement procedures and trade regulations also may involve certain risks such as delays in payment or delivery of securities or in the recovery of the Fund's assets held abroad. In certain markets, particularly emerging markets, there have been times when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct such transactions. Inability of the Fund to make intended securities purchases due to settlement problems could cause the Fund to miss attractive investment opportunities. Inability to dispose of a portfolio security caused by settlement problems could result in losses to the Fund due to a subsequent decline in value of the portfolio security. In addition, security settlement and clearance procedures in some emerging market countries may not fully protect the Fund against loss or theft of its assets.

Certain foreign companies may be subject to sanctions, embargoes, or other governmental actions that may impair or otherwise limit the ability to invest in, receive, hold or sell the securities of such companies. These factors may affect the value of investments in those companies. In addition, certain companies may operate in, or have dealings with, countries that the U.S. Government has identified as state sponsors of terrorism. As a result, such companies may be subject to specific constraints or regulations under U.S. law and, additionally, may be subject to negative investor perception, either of which could adversely affect such companies' performance.

Russia's military invasion of Ukraine in February 2022, the resulting responses by the United States and other countries, and the potential for wider conflict could increase volatility and uncertainty in the financial markets and adversely affect regional and global economies. The United States and other countries have imposed broad-ranging economic sanctions on Russia, certain Russian individuals, banking entities and corporations, and Belarus as a response to Russia's invasion of Ukraine, and may impose sanctions on other countries that provide military or economic support to Russia. The extent and duration of Russia's military actions and the repercussions of such actions (including any retaliatory actions or countermeasures that may be taken by those subject to sanctions, including cyber-attacks) are impossible to predict, but could result in significant market disruptions, including in particular industries or sectors, such as the oil and natural gas markets, and may negatively affect global supply chains, inflation and global economic growth. These and any related events could significantly impact a Fund's performance and the value of an investment in the Fund, even if the Fund does not have direct exposure to Russian issuers or issuers in other countries affected by the invasion. Additionally, due to current and potential future sanctions or potential market closures impacting the ability to trade Russian securities, a Fund may experience higher transaction costs, difficulty in valuing affected securities and losses in the value of the Fund's investments.

Emerging Markets Risk

Investing in emerging market securities involves risks which are in addition to the usual risks inherent in foreign investments. Some emerging markets countries may have fixed or managed currencies that are not free-floating against the U.S. dollar. Further, certain currencies may not be traded internationally. Certain of these currencies have experienced a steady devaluation relative to the U.S. dollar. Any devaluation in the currencies in which the Fund's securities are denominated may have a detrimental impact on the Fund.

Some countries with emerging securities markets have experienced substantial, and in some periods, extremely high, rates of inflation for many years. Inflation and rapid fluctuation in inflation rates have had and may continue to have negative effects on the economies and securities markets of certain countries. Moreover, the economies of some countries may differ favorably or unfavorably from the U.S. economy in such respects as rate of growth of gross domestic product, the rate of inflation, capital reinvestment, resource self-sufficiency, number and depth of industries forming the economy's base, governmental controls, and investment restrictions that are subject to political change and balance of payments position. Further, there may be greater difficulties or restrictions with respect to investments made in emerging markets countries.

Emerging markets typically have substantially less volume than U.S. markets. In addition, securities in many such markets are less liquid, and their prices often are more volatile, than securities of comparable U.S. companies. Such markets often have different clearance and settlement procedures for securities transactions, and in some markets there have been times when settlements have been unable to keep pace with the volume of transactions, making it difficult to conduct transactions. Delays in settlement could result in temporary periods when assets may not be invested. Settlement problems in emerging markets countries also could cause the Fund to miss attractive investment opportunities. Satisfactory custodial services may not be available in some emerging markets countries, which may result in the Fund incurring additional costs and delays in the transportation and custody of such securities.

Greater China Investment Risk. Investments in companies located or operating in Greater China (normally considered to be the geographical area that includes mainland China, Hong Kong, Macau and Taiwan) involve risks and considerations not typically associated with investments in the U.S. and other Western nations, such as greater government control over the economy; political, legal and regulatory uncertainty; nationalization, expropriation, or confiscation of property; difficulty in obtaining information necessary for investigations into and/or litigation against Chinese companies, as well as in obtaining and/or enforcing judgments; limited legal remedies for shareholders; alteration or discontinuation of economic reforms; military conflicts, either internal or with other

countries; inflation, currency fluctuations and fluctuations in inflation and interest rates that may have negative effects on the economy and securities markets of Greater China; and Greater China's dependency on the economies of other Asian countries, many of which are developing countries. Events in any one country within Greater China may impact the other countries in the region or Greater China as a whole. For example, changes to their political and economic relationships with mainland China could adversely impact the Fund's investments in Taiwan and Hong Kong. Further, health events, such as the recent coronavirus outbreak, may cause uncertainty and volatility in the Chinese economy, especially in the consumer discretionary (leisure, retail, gaming, tourism), industrials, and commodities sectors. Additionally, any difficulties of the PCAOB to inspect audit work papers and practices of PCAOB-registered accounting firms in China with respect to their audit work of U.S. reporting companies may impose significant additional risks associated with investments in China.

Investments in Chinese companies may be made through a special structure known as a variable interest entity ("VIE") that is designed to provide foreign investors, such as the Fund, with exposure to Chinese companies that operate in certain sectors in which China restricts or prohibits foreign investments. Investments in VIEs may pose additional risks because the investment is made through an intermediary shell company that has entered into service and other contracts with the underlying Chinese operating company in order to provide investors with exposure to the operating company, but does not represent equity ownership in the operating company. As a result, such investment may limit the rights of an investor with respect to the underlying Chinese operating company. VIEs allow the shell company to exert a degree of control and obtain economic benefits arising from the operating company without formal legal ownership. However, the contractual arrangements between the shell company and the operating company may not be as effective in providing operational control as direct equity ownership, and a foreign investor's rights may be limited by, for example, actions of the Chinese government which could determine that the underlying contractual arrangements on which control of the VIE is based are invalid. The contractual arrangement on which the VIE structure is based would likely be subject to Chinese law and jurisdiction, which could raise questions about how recourse is sought. Investments through VIEs may be affected by conflicts of interest and duties between the legal owners of the VIE and the stockholders of the listed holding company, which could adversely impact the value of investments. VIEs historically have not been formally recognized under Chinese law. Recently, the Chinese government provided new guidance to and placed restrictions on China-based companies raising capital offshore, including through VIEs, and investors face uncertainty about future actions by the Chinese government that could significantly affect the operating company's financial performance and the enforceability of the contractual arrangements underlying the VIE structure.

Certain securities issued by companies located or operating in Greater China, such as China A-shares, are subject to trading restrictions and suspensions, quota limitations and sudden changes in those limitations, and operational, clearing and settlement risks. Significant portions of the Chinese securities markets may become rapidly illiquid, as Chinese issuers have the ability to suspend the trading of their equity securities and have shown a willingness to exercise that option in response to market volatility and other events. The liquidity of Chinese securities may shrink or disappear suddenly and without warning as a result of adverse economic, market or political events, or adverse investor perceptions, whether or not accurate. Export growth continues to be a major driver of China's rapid economic growth. As a result, a reduction in spending on Chinese products and services, the institution of tariffs or other trade barriers (or the threat thereof), or a downturn in any of the economies of China's key trading partners may have an adverse impact on the Chinese economy. The ongoing trade dispute and imposition of tariffs between China and the United States continues to introduce uncertainty into the Chinese economy and may result in reductions in international trade, the oversupply of certain manufactured goods, substantial price reductions of goods and possible failure of individual companies and/or large segments of China's export industry, which could have a negative impact on the Fund's performance. Events such as these and their consequences are difficult to predict and it is unclear whether further tariffs may be imposed or other escalating actions may be taken in the future. In addition, actions by the U.S. government, such as delisting of certain Chinese companies from U.S. securities exchanges or otherwise restricting their operations in the U.S., may negatively impact the value of such securities held by the Fund.

From time to time, certain companies in which the Fund invests may operate in, or have dealings with, countries subject to sanctions or embargoes imposed by the U.S. Government and the United Nations and/or in countries the U.S. Government identified as state sponsors of terrorism. One or more of these companies may be subject to constraints under U.S. law or regulations that could negatively affect the company's performance. Additionally, developing countries, such as those in Greater China, may subject the Fund's investments to a number of tax rules, and the application of many of those rules may be uncertain. Moreover, China has implemented a number of tax reforms in recent years and may amend or revise its existing tax laws and/or procedures in the future, possibly with

retroactive effect. Changes in applicable Chinese tax law could reduce the after-tax profits of the Fund, directly or indirectly, including by reducing the after-tax profits of companies in China in which the Fund invests. Chinese taxes that may apply to the Fund's investments include income tax or withholding tax on dividends, interest or gains earned by the Fund, business tax and stamp duty. Uncertainties in Chinese tax rules could result in unexpected tax liabilities for the Fund.

FIXED INCOME SECURITIES RISK

Counterparty Credit Risk

The value of the Fund's investments may be adversely affected if a security's credit rating is downgraded; an issuer of an investment held by the Fund fails to pay an obligation on a timely basis, otherwise defaults, or is perceived by other investors to be less creditworthy; or a counterparty to a derivatives or other transaction with the Fund files for bankruptcy, becomes insolvent, or otherwise becomes unable or unwilling to honor its obligation to the Fund.

Credit Risk

Credit risk is the possibility that an issuer may default on a security by failing to pay interest or principal when due. If an issuer defaults, the Fund will lose money.

Many fixed income securities receive credit ratings from services such as S&P and Moody's. These services assign ratings to securities by assessing the likelihood of issuer default. Lower credit ratings correspond to higher credit risk. If a security has not received a rating, the Fund must rely entirely upon the Advisor's credit assessment.

Fixed income securities generally compensate for greater credit risk by paying interest at a higher rate. The difference between the yield of a security and the yield of a U.S. Treasury security with a comparable maturity (the spread) measures the additional interest paid for risk. Spreads may increase generally in response to adverse economic or market conditions. A security's spread may also increase if the security's rating is lowered, or the security is perceived to have an increased credit risk. An increase in the spread will cause the price of the security to decline.

Interest Rate Risk

Prices of fixed income securities rise and fall in response to changes in the interest rate paid by similar securities. Generally, when interest rates rise, prices of fixed income securities fall. However, market factors, such as the demand for particular fixed income securities, may cause the price of certain fixed income securities to fall while the prices of other securities rise or remain unchanged. Interest rate changes have a greater effect on the price of fixed income securities with longer durations. Duration measures the price sensitivity of a fixed income security to changes in interest rates.

Changing interest rates may have unpredictable effects on markets, may result in heightened market volatility and increased redemptions, and may detract from a Fund's performance to the extent the Fund is exposed to such interest rates and/or volatility. An increase in prevailing interest rates typically causes the value of existing debt securities to fall and often has a greater impact on longer-duration debt securities and higher quality debt securities. A general rise in interest rates may cause investors to move out of fixed income securities on a large scale, which could adversely affect the price and liquidity of fixed income securities and could also result in increased redemptions for the Funds. During periods when inflation rates are high or rising, the Funds may be subject to a greater risk of rising interest rates.

In a low or negative interest rate environment, debt securities may trade at, or be issued with, negative yields, which means the purchaser of the security may receive at maturity less than the total amount invested. In addition, in a negative interest rate environment, if a bank charges negative interest, instead of receiving interest on deposits, a depositor must pay the bank fees to keep money with the bank. To the extent the Fund holds a negatively-yielding debt security or has a bank deposit with a negative interest rate, the Fund would generate a negative return on that investment. Cash positions may also subject the Fund to increased counterparty risk to the Fund's bank. Debt market conditions are highly unpredictable and some parts of the market are subject to dislocations.

If low or negative interest rates become more prevalent in the market and/or if low or negative interest rates persist for a sustained period of time, some investors may seek to reallocate assets to other income-producing assets. This may cause the price of such higher yielding instruments to rise, could further reduce the value of instruments with a negative yield, and may limit the Fund's ability to locate fixed income instruments containing the desired risk/return profile. Changing interest rates, including, rates that fall below zero, could have unpredictable effects on the markets and may expose fixed income markets to heightened volatility, increased redemptions, and potential illiquidity. In recent years, the Federal Reserve began implementing increases to the federal funds interest rate and there may be further rate increases. As the federal funds rate rises, interest rates across the financial system also may rise. To the extent interest rates increase substantially and/or rapidly, the Funds may be subject to significant losses.

The low interest rate environment observed in prior years was created in part by actions taken by the Board of Governors of the Federal Reserve System (the "Federal Reserve") to keep the federal funds rate at a low level, including expanding the scope of its repurchase agreement operations, and purchasing large quantities of securities issued or guaranteed by the U.S. government, its agencies or instrumentalities on the open market. In recent years, the Federal Reserve has "tapered" its quantitative easing programs and, in 2022, began implementing increases to the federal funds rate. Further rate increases are expected. As interest rates rise, there is risk that rates across the financial system also may rise. Changes in government intervention may have adverse effects on the Fund's investments, volatility, and illiquidity in debt markets. Interest rate increases could cause the value of any Fund that invests in fixed income securities to decrease to the extent that it invests in fixed income securities. Federal Reserve policy changes may expose fixed-income and related markets to heightened volatility and may reduce liquidity for certain Fund investments, which could cause the value of a Fund's investments and share price to decline. If a Fund invests in derivatives tied to fixed-income markets, the Fund may be more substantially exposed to these risks than a fund that does not invest in derivatives. To the extent a Fund experiences high redemptions because of these policy changes, the Fund may experience increased portfolio turnover, which will increase the costs the Fund incurs and may lower its performance. Furthermore, if rising interest rates cause a Fund to lose enough value, the Fund could also face increased shareholder redemptions, which could force the Fund to liquidate investments at disadvantageous times or prices, therefore adversely affecting the Fund. In addition, decreases in fixed income dealer market-making capacity may persist in the future, potentially leading to decreased liquidity and increased volatility in the fixed income markets.

ETN Investment Risk

Because the return on the ETN is dependent on the issuer's ability or willingness to meet its obligations, the value of the ETN may change due to a change in the issuer's credit rating, despite no change in the underlying reference instrument. The market value of ETN shares may differ from the value of the reference instrument.

This difference in price may be due to the fact that the supply and demand in the market for ETN shares at any point in time is not always identical to the supply and demand in the market for the assets underlying the reference instrument that the ETN seeks to track.

There may be restrictions on the Fund's right to redeem its investment in an ETN, which are generally meant to be held until maturity. The Fund's decision to sell its ETN holdings may be limited by the availability of a secondary market. An investor in an ETN could lose some or all of the amount invested.

DERIVATIVE CONTRACTS RISK

General Risk

The use of derivative contracts involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. First, changes in the value of the derivative contracts in which the Fund invests may not be correlated with changes in the value of the underlying asset or if they are correlated, may move in the opposite direction than originally anticipated.

Second, while some strategies involving derivatives may reduce the risk of loss, they may also reduce potential gains or, in some cases, result in losses by offsetting favorable price movements in portfolio holdings. Third, there is a risk that derivative contracts may be mispriced or improperly valued and, as a result, the Fund may need to make increased cash payments to the counterparty. Fourth, derivative contracts may cause the Fund to realize increased ordinary income or short-term capital gains (which are treated as ordinary income for Federal income tax purposes) and, as a result, may increase taxable distributions to shareholders. Fifth, a common provision in OTC derivative contracts permits the counterparty to terminate any such contract between it and the Fund, if the value of the Fund's total net assets declines below a specified level over a given time period. Factors that may contribute to such a decline (which usually must be substantial) include significant shareholder redemptions and/or a marked decrease in the market value of the Fund's investments. Any such termination of the Fund's OTC derivative contracts may adversely affect the Fund (for example, by increasing losses and/or costs, and/or preventing the Fund from fully implementing its investment strategies). Finally, derivative contracts may also involve other risks described in this SAI, such as stock market, interest rate, credit, currency, liquidity and leverage risks.

When a derivative is used as a hedge against an offsetting position that the Fund also holds, any loss generated by that derivative will be substantially offset by the gains on the hedged security, and vice versa. To the extent the Fund uses a derivative security for purposes other than as a hedge, or, if the Fund hedges imperfectly, the Fund is directly exposed to the risks of that derivative or other instrument and any loss generated by that derivative or other instrument will not be offset by a gain.

Options Risk

When the Fund purchases an option, it runs the risk that it will lose its entire investment in the option in a relatively short period of time, unless the Fund exercises the option or enters into a closing sale transaction with respect to the option during the life of the option. If the price of the underlying security does not rise (in the case of a call) or fall (in the case of a put) to an extent sufficient to cover the option premium and transaction costs, the Fund will lose part or all of its investment in the option. This contrasts with an investment by the Fund in the underlying security, since the Fund will not lose any of its investment in such security if the price does not change.

The use of options also involves the risk of imperfect correlation between movements in option prices and movements in the value of the underlying securities.

The effective use of options also depends on the Fund's ability to terminate option positions at times when the Advisor deems it desirable to do so. Although the Fund will take an option position only if the Advisor believes there is a liquid secondary market for the option, there is no assurance that the Fund will be able to effect closing transactions at any particular time or at an acceptable price.

The Fund generally expects that its options transactions will be conducted on recognized exchanges. In certain instances, however, the Fund may purchase and sell options in the OTC markets. The Fund's ability to terminate options in the OTC market may be more limited than for exchange-traded options and may also involve the risk that securities dealers participating in such transactions would be unable to meet their obligations to the Fund.

The Fund will, however, engage in OTC market transactions only when appropriate exchange-traded transactions are unavailable and when, in the opinion of the Advisor, the pricing mechanism and liquidity of the OTC market is satisfactory and the participants are responsible parties likely to meet their contractual obligations.

If a secondary trading market in options were to become unavailable, the Fund could no longer engage in closing transactions. Lack of investor interest might adversely affect the liquidity of the market for particular options or series of options. A market may discontinue trading of a particular option or options generally. In addition, a market could become temporarily unavailable if unusual events, such as, volume in excess of trading or clearing capability, were to interrupt its normal operations.

A market may at times find it necessary to impose restrictions on particular types of options transactions, such as opening transactions. For example, if an underlying security ceases to meet qualifications imposed by the market or the Options Clearing Corporation, new series of options on that security will no longer be opened to replace expiring series, and opening transactions in existing series may be prohibited. If an options market were to become unavailable, the Fund as a holder of an option would be able to realize profits or limit losses only by

exercising the option, and the Fund, as option writer, would remain obligated under the option until expiration.

Disruptions in the markets for the securities underlying options purchased or sold by the Fund could result in losses on the options. If trading is interrupted in an underlying security, the trading of options on that security is normally halted as well. As a result, the Fund as purchaser or writer of an option will be unable to close out its positions until options trading resumes, and it may be faced with considerable losses if trading in the security reopens at a substantially different price. In addition, the Options Clearing Corporation or other options markets may impose exercise restrictions. If a prohibition on exercise is imposed at the time when trading in the option has also been halted, the Fund as a purchaser or writer of an option will be locked into its position until one of the two restrictions has been lifted. If the Options Clearing Corporation were to determine that the available supply of an underlying security appears insufficient to permit delivery by the writers of all outstanding calls in the event of exercise, it may prohibit indefinitely the exercise of put options by holders who would be unable to deliver the underlying interest. The Fund, as holder of such a put option, could lose its entire investment if the prohibition remained in effect until the put option's expiration and the Fund was unable either to acquire the underlying security or to sell the put option in the market.

Special risks are presented by internationally-traded options. Because of time differences between the U.S. and various foreign countries, and because different holidays are observed in different countries, foreign options markets may be open for trading during hours or on days when U.S. markets are closed. As a result, option premium may not reflect the current prices of the underlying interest in the U.S.

An exchange-listed option may be closed out only on an exchange which provides a secondary market for an option of the same series. There is no assurance that a liquid secondary market on an exchange will exist for any particular option or at any particular time. If no secondary market were to exist, it would be impossible to enter into a closing transaction to close out an option position. As a result, the Fund may be forced to continue to hold, or to purchase at a fixed price, a security on which it has sold an option at a time when the Advisor believes it is inadvisable to do so.

Higher than anticipated trading activity or order flow or other unforeseen events might cause the Options Clearing Corporation or an exchange to institute special trading procedures or restrictions that might restrict the Fund's use of options. The exchanges have established limitations on the maximum number of calls and puts of each class that may be held or written by an investor or group of investors acting in concert. It is possible that the Trust and other clients of the Advisor may be considered such a group. These position limits may restrict the Trust's ability to purchase or sell options on particular securities. Options that are not traded on national securities exchanges may be closed out only with the other party to the option transaction. For that reason, it may be more difficult to close out unlisted options than listed options. Furthermore, unlisted options are not subject to the protection afforded purchasers of listed options by the Options Clearing Corporation.

Liquidity Risk

Positions in futures contracts may be closed out only on an exchange or board of trade which provides a secondary market for such futures. Although the Fund intends to purchase or sell futures only on exchanges or boards of trade where there appears to be an active secondary market, there is no assurance that a liquid secondary market on an exchange or board of trade will exist for any particular contract or at any particular time. If there is not a liquid secondary market at a particular time, it may not be possible to close a futures position at such time and, in the event of adverse price movements, the Fund would continue to be required to make daily cash payments of variation margin. However, in the event financial futures are used to hedge portfolio securities, such securities will not generally be sold until the financial futures can be terminated. In such circumstances, an increase in the price of the portfolio securities, if any, may partially or completely offset losses on the financial futures. In addition to the risks that apply to all options transactions, here are several special risks relating to options on futures contracts. The ability to establish and close out positions in such options will be subject to the development and maintenance of a liquid secondary market. It is not certain that such a market will develop. Although the Fund generally will purchase only those options for which there appears to be an active secondary market, there is no assurance that a liquid secondary market on an exchange will exist for any particular option or at any particular time. In the event no such market exists for particular options, it might not be possible to effect closing transactions in such options, with the result that the Fund would have to exercise the options in order to realize any profit.

Hedging Risk

There are several risks in connection with the use by the Fund of futures contracts and related options as a hedging device. One risk arises because of the imperfect correlation between movements in the prices of the futures contracts and options and movements in the prices of securities that are the subject of the hedge. The Advisor will, however, attempt to reduce this risk by purchasing and selling, to the extent possible, futures contracts and related options on securities and indices, the movements of which will, in its judgment, correlate closely with movements in the prices of the portfolio securities sought to be hedged.

Successful use of futures contracts and options by the Fund for hedging purposes is also subject to the Advisor's ability to predict correctly movements in the direction of the market. It is possible that, where the Fund has purchased puts on futures contracts to hedge its portfolio against a decline in the market, the securities or index on which the puts are purchased may increase in value and the value of securities held in the portfolio may decline. If this occurred, the Fund would lose money on the puts and also experience a decline in value in its portfolio securities. In addition, the prices of futures, for a number of reasons, may not correlate perfectly with movements in the underlying securities or index due to certain market distortions. First, all participants in the futures market are subject to margin deposit requirements. Such requirements may cause investors to close futures contracts through offsetting transactions which could distort the normal relationship between the underlying security or index and futures markets. Second, the margin requirements in the futures markets are less onerous than margin requirements in the securities markets in general, and as a result the futures markets may attract more speculators than the securities markets do. Increased participation by speculators in the futures markets may also cause temporary price distortions. Due to the possibility of price distortion, even a correct forecast of general market trends by the Advisor may still not result in a successful hedging transaction over a very short time period.

Other Risks

The Fund will incur brokerage fees in connection with their futures and options transactions. In addition, while futures contracts and options on futures will be purchased and sold to reduce certain risks, those transactions themselves entail certain other risks. Thus, while the Fund may benefit from the use of futures and related options, unanticipated changes in interest rates or stock price movements may result in a poorer overall performance for the Fund than if it had not entered into any futures contracts or options transactions. Moreover, in the event of an imperfect correlation between the futures position and the portfolio position that is intended to be protected, the desired protection may not be obtained and the Fund may be exposed to risk of loss.

Forward Foreign Currency and Foreign Currency Futures Contracts Risk

Among the risks of using foreign currency futures contracts is the fact that positions in these contracts (and any related options) may be closed out only on an exchange or board of trade which provides a secondary market. Although it is intended that the Fund using foreign currency futures contracts and related options will only purchase or sell them on exchanges or boards of trade where there appears to be an active secondary market, there is no assurance that a secondary market on an exchange or board of trade will exist for any particular contract or option or at any particular time. In such event, it may not be possible to close a futures or related option position and, in the event of adverse price movements, the Fund would continue to be required to make daily cash payments of variation margin on its futures positions.

In addition, it is impossible to forecast with precision the market value of a security at the expiration or maturity of a forward or futures contract. Accordingly, it may be necessary to purchase additional foreign currency on the spot market (and bear the expense of such purchase) if the market value of the security being hedged is less than the amount of foreign currency the Fund is obligated to deliver and if a decision is made to sell the security and make delivery of the foreign currency. Conversely, it may be necessary to sell on the spot market some of the foreign currency received upon the sale of the hedged portfolio security if the market value of such security exceeds the amount of foreign currency the Fund is obligated to deliver.

Swaps

The Funds may enter into swap contracts to invest in a market without owning or taking physical custody of securities in various circumstances, including circumstances where direct investment in the securities is restricted for legal reasons or is otherwise impracticable. Swaps may also be used for hedging purposes or to seek to increase total return. Swap contracts may be structured in different ways. For example, a counterparty may agree to pay a Fund the amount, if any, by which the notional amount of the swap contract would have increased in value had it been invested in the particular stocks (or a group of stocks), plus the dividends that would have been received on those stocks. In these cases, a Fund may agree to pay to the counterparty a floating rate of interest on the notional amount of the swap contract plus the amount, if any, by which that notional amount would have decreased in value had it been invested in such stocks. Therefore, the return to a Fund on the swap contract should be the gain or loss on the notional amount plus dividends on the stocks less the interest paid by the Fund on the notional amount. In other cases, the counterparty and a Fund may each agree to pay the other the difference between the relative investment performances that would have been achieved if the notional amount of the swap contract had been invested in different stocks (or a group of stocks).

The Funds will generally enter into swaps on a net basis, which means that the two payment streams are netted out, with a Fund receiving or paying, as the case may be, only the net amount of the two payments. Payments may be made at the conclusion of a swap contract or periodically during its term. Swaps normally do not involve the delivery of securities or other underlying assets. Accordingly, the risk of loss with respect to swaps is normally limited to the net amount of payments that a Fund is contractually obligated to make. If the other party to a swap defaults, a Fund's risk of loss consists of the net amount of payments that a Fund is contractually entitled to receive, if any.

Regulatory Risk

The regulation of derivatives is a rapidly changing area of law and is subject to modification by government and judicial action. In addition, the SEC, CFTC and the exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the implementation or reduction of speculative position limits, the implementation of higher margin requirements, the establishment of daily price limits and the suspension of trading.

It is not possible to predict fully the effects of current or future regulation. However, it is possible that developments in government regulation of various types of derivative instruments, such as speculative position limits on certain types of derivatives, or limits or restrictions on the counterparties with which the Fund engages in derivative transactions, may limit or prevent the Fund from using or limit the Fund's use of these instruments effectively as a part of its investment strategy, and could adversely affect the Fund's ability to achieve its investment objective. The Trust will continue to monitor developments in the area. New requirements, even if not directly applicable to the Fund, may increase the cost of the Fund's investments and cost of doing business.

OTHER TRANSACTIONS/INVESTMENT RISKS

Government Intervention and Extreme Volatility Risk

In the past, instability in the financial markets led the U.S. Government and other governments to take a number of unprecedented actions designed to support certain financial institutions and segments of the financial markets that experienced extreme volatility, and in some cases lack of liquidity. Federal, state, and other governments, their regulatory agencies, or self-regulatory organizations could take actions that affect the regulation of the instruments in which the Fund invests, or the issuers of such instruments, in ways that are unforeseeable. Legislation or regulation may also change the way in which the Fund itself is regulated. Such legislation or regulation could limit or preclude the Fund's ability to achieve its investment objective.

Reduced liquidity in credit and fixed-income markets may adversely affect many issuers worldwide. Reduced liquidity may result in less money being available to purchase raw materials, goods and services from emerging markets, which may, in turn, bring down the prices of these economic staples. It may also result in emerging market issuers having more difficulty obtaining financing, which may, in turn, cause a decline in their stock prices. If they arise, these issues may have an adverse effect on the Fund.

Leverage Risk

Leverage risk is created when an investment exposes the Fund to a level of risk that exceeds the amount invested. Changes in the value of such an investment magnify the Fund's risk of loss and potential for gain.

Some transactions may give rise to a form of leverage. These transactions may include, among others, derivatives and reverse repurchase agreements, and may expose the Fund to greater risk and increase its costs. When transactions create leverage, adverse changes in the value or level of the underlying asset, reference rate or index can result in a loss substantially greater than the amount invested in the derivatives or other instruments themselves. Certain transactions have the potential for unlimited loss, regardless of the size of the initial investments. Increases and decreases in the value of the securities held by the Fund and therefore in the Fund's NAV will be magnified when the Fund uses leverage because leverage tends to increase the Fund's exposure to market risk, interest rate risk or other risks by, in effect, increasing assets available for investment.

LIBOR Transition Risk

A Fund may invest in financial instruments (including variable or floating rate loans, debt securities, and derivatives such as interest rate futures) that are exposed to LIBOR, which was the offered rate for short-term Eurodollar deposits between major international banks. LIBOR was a common benchmark interest rate index used to make adjustments to variable-rate loans and to determine interest rates for a variety of financial instruments and borrowing arrangements.

The United Kingdom Financial Conduct Authority ceased publication of most LIBOR settings on a representative basis at the end of 2021 and ceased publication of a majority of U.S. dollar LIBOR settings on a representative basis after June 30, 2023. Currently, synthetic U.S. dollar LIBOR rates will be available exclusively for non-U.S. contracts that previously referenced LIBOR until September 2024, but any such rates would be considered non-representative of the underlying market. The transition away from LIBOR could result in increased volatility and uncertainty in markets tied to LIBOR. The elimination of LIBOR may adversely affect the market for, or value of, specific securities or payments linked to LIBOR rates, the availability or terms of borrowing or refinancing, or the effectiveness of hedging strategies. These risks may also apply with respect to changes in connection with other interbank offering rates (e.g., Euribor or SOFR) and a wide range of other index levels, rates and values that are treated as "benchmarks" and are the subject of recent regulatory reform. There is no assurance that the composition or characteristics of any alternative reference rate ("ARR") will be similar to or produce the same value or economic equivalence as LIBOR or that instruments using an alternative rate will have the same volume or liquidity. As a result, the transition process might lead to increased volatility and reduced liquidity in markets that currently rely on LIBOR to determine interest rates; a reduction in the value of some LIBOR-based investments; increased difficulty in borrowing or refinancing and diminished effectiveness of any applicable hedging strategies against instruments whose terms currently include LIBOR; and/or costs incurred in connection with temporary borrowings and closing out positions and entering into new agreements. Additionally, while some "legacy" LIBOR-based instruments may contemplate a scenario where LIBOR is no longer available by providing for an alternative or "fallback" rate-setting methodology, there may be significant uncertainty regarding the effectiveness of any such alternative methodologies to replicate LIBOR. Not all existing LIBOR-based instruments have such fallback provisions and there remains uncertainty regarding the willingness and ability of issuers to add alternative rate-setting provisions in certain existing instruments.

On December 16, 2022, the Federal Reserve Board adopted regulations implementing the Adjustable Interest Rate Act. The regulations provide a statutory fallback mechanism to replace LIBOR, by identifying benchmark rates based on SOFR that replaced LIBOR in certain financial contracts after June 30, 2023. These regulations apply only to contracts governed by U.S. law, among other limitations. The regulations include provisions that (i) provide a safe harbor for selection or use of a replacement benchmark rate selected by the Federal Reserve Board; (ii) clarify who may choose the replacement benchmark rate selected by the Federal Reserve Board; and (iii) ensure that contracts adopting a replacement benchmark rate selected by the Federal Reserve Board will not be interrupted or terminated following the replacement of LIBOR; however there remains significant uncertainty regarding the effectiveness of any such legislation.

INVESTMENT RESTRICTIONS

FUNDAMENTAL INVESTMENT RESTRICTIONS

Each Fund has adopted the following fundamental investment restrictions that may not be changed without approval by a “majority of the outstanding shares” of the Fund which, as used in this SAI, means the vote of the lesser of (a) 67% or more of the shares of the Fund represented at a meeting, if the holders of more than 50% of the outstanding shares of the Fund are present or represented by proxy, or (b) more than 50% of the outstanding shares of the Fund. The investment restrictions pertain to each Fund unless otherwise noted.

Each Fund:

- (1) May not invest 25% or more of its total assets in a particular industry or group of industries. This limitation is not applicable to investments in obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities.
- (2) May not issue senior securities, except to the extent permitted by the 1940 Act, or any rules, exemptions or interpretations thereunder that may be adopted, granted or issued by the Securities and Exchange Commission (“SEC”) and as may be amended from time to time.
- (3) May not borrow money, except to the extent permitted by the 1940 Act, or any rules, exemptions or interpretations thereunder that may be adopted, granted or issued by the SEC and as may be amended from time to time.
- (4) May not purchase or sell commodities, except to the extent permitted by the 1940 Act, or any rules, exemptions or interpretations thereunder that may be adopted, granted or issued by the SEC and as may be amended from time to time.
- (5) May not purchase or sell real estate unless acquired as a result of ownership of securities or other instruments, except to the extent permitted by the 1940 Act, or any rules, exemptions or interpretations thereunder that may be adopted, granted or issued by the SEC and as may be amended from time to time. This restriction does not prevent the Fund from (i) investing in issuers that invest, deal, or otherwise engage in transactions in real estate or interests therein, or investing in securities that are secured by real estate or interests therein, or (ii) making, purchasing or selling real estate mortgage loans.
- (6) May not act as an underwriter, except to the extent the Fund may be deemed to be an underwriter when disposing of securities it owns or when selling its own shares.
- (7) May not make loans, except to the extent permitted by the 1940 Act, or any rules, exemptions or interpretations thereunder that may be adopted, granted or issued by the SEC and as may be amended from time to time. This limitation does not apply to (i) the lending of portfolio securities, (ii) the purchase of debt securities, other debt instruments, loan participations and/or engaging in direct corporate loans in accordance with its investment goals and policies, and (iii) repurchase agreements to the extent the entry into a repurchase agreement is deemed to be a loan.

If a restriction on a Fund's investments is adhered to at the time an investment is made, a subsequent change in the percentage of Fund assets invested in certain securities or other instruments resulting from changes in the value of the Fund's total assets, will not be considered a violation of the restriction, with the exception of the Fund's limitations on borrowing as described herein or unless otherwise noted herein.

With respect to each Fund's fundamental restriction on concentration, to the extent sufficient information is reasonably available, the Fund will consider the investments of underlying investment companies when determining its compliance with this policy.

With respect to each Fund's fundamental restriction on borrowing, the 1940 Act limits the Fund's ability to borrow money, except that the Fund may borrow from any bank provided that immediately after any such borrowing there is an asset coverage of at least 300% for all borrowings by the Fund and provided further, that in the event that such asset coverage shall at any time fall below 300%, the Fund shall, within three days thereafter or such longer period as the SEC may prescribe by rules and regulations, reduce the amount of its borrowings to such an extent that the asset coverage of such borrowing shall be at least 300%.

In addition to borrowings that are subject to 300% asset coverage and are considered by the SEC to be permitted "senior securities," each Fund is also permitted under the 1940 Act to borrow for temporary purposes in an amount not exceeding 5% of the value of its total assets at the time when the loan is made. A loan will be presumed to be for temporary purposes if it is repaid within 60 days and is not extended or renewed.

Regulatory Compliance. Each Fund may follow non-fundamental operational policies that are more restrictive than its fundamental investment limitations, as set forth in the Prospectus and this SAI, in order to comply with applicable laws and regulations, including the provisions of and regulations under the 1940 Act. Each Fund may change these operational policies to reflect changes in the laws and regulations without the approval of its shareholders.

NON-FUNDAMENTAL INVESTMENT RESTRICTIONS

Each Fund's investment objective is non-fundamental and may be changed by the Board without shareholder approval upon 60 days' prior written notice to the Fund's shareholders.

MANAGEMENT

Trustees and Officers

The following tables provide information about the Board and the senior officers of the Trust. The Board is composed of three Trustees, two of whom are not "interested persons" of the Trust, as that term is defined in the 1940 Act (each an "Independent Trustee" and collectively, the "Independent Trustees"). Each Trustee oversees all portfolios of the Trust and serves for an indefinite term (subject to mandatory retirement provisions). Information about each Trustee is provided below and includes each person's: name, address, age (as of the date of the Fund's most recent fiscal year end), present position(s) held with the Trust, principal occupations for the past five years, and total compensation received as a Trustee for the most recent fiscal year. Unless otherwise noted, the business address of each person listed below is c/o Strategy Shares, 36 North New York Avenue, Huntington, NY 11743. Unless otherwise noted, each officer is elected annually by the Board. Each Trustee and several officers also serve in

the same capacity for Mutual Fund and Variable Insurance Trust, an open-end investment company whose series are managed by Rational Advisors, Inc. ("Rational"), and AlphaCentric Prime Meridian Income Fund, a closed-end investment company that is managed by AlphaCentric Advisors, LLC, an affiliate of Rational. Collectively, the Trust, Mutual Fund and Variable Insurance Trust, AlphaCentric Prime Meridian Income Fund, and Mutual Fund Series Trust constitute the "Fund Complex."

Independent Trustees Background

Name, Address and Age	Position with the Trust	Term of Office and Length of Time Served*	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee	Other Directorships Held by Trustee
Tobias Caldwell Year of Birth: 1967	Chairman of the Board and Trustee	Since 2016	Manager, Genovese Family Enterprises, LLC (and affiliates, family office) 1999-present, Managing Member, Bear Properties, LLC (real estate firm) (2006-present).	56	Chairman of the Board of Trustees, Mutual Fund and Variable Insurance Trust since 2016; Lead independent Trustee and Chairman of Audit Committee, Mutual Fund Series Trust since 2006; Trustee of IDX Funds Trust (formerly, M3Sixty Funds Trust) since 2016; Chairman of the Board of AlphaCentric Prime Meridian Income Fund from 2018 to August 2023.
Stephen P. Lachenauer Year of Birth: 1967	Trustee and Chair of the Audit, Risk and Compliance, and Investment Committees	Trustee and Chair of Audit, Risk and Compliance Committees since 2016 Chair of Investment Committee since November 2020	Attorney, private practice since 2011.	56	Chair of the Audit and Risk and Compliance Committees and Trustee since 2016, and Chair of the Investment Committee since November 2020, Mutual Fund and Variable Insurance Trust; Trustee and Chair of the Audit and Risk and Compliance Committees from 2018 to 2023, and Chair of the Investment Committee from 2020 to 2023, AlphaCentric Prime Meridian Income Fund; Trustee, Mutual Fund Series Trust since April 2022.

* The term of office of each Trustee is indefinite.

Interested Trustee Background

Name, Address and Age	Position with the Trust	Term of Office and Length of Time Served*	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee	Other Directorships Held by Trustee
Donald McIntosh** Year of Birth: 1967	Trustee	Since 2016	Internal Audit Supervisor, Santander Bank, since 2021; Commercial Banking Business Control Officer, Santander Bank, 2017-2021.	20	Trustee, Mutual Fund and Variable Insurance Trust since 2016; Trustee, AlphaCentric Prime Meridian Income Fund 2018 to 2023.

* The term of office of each Trustee is indefinite.

** Mr. McIntosh is considered an interested person of the Trust by reason of a financial connection between certain of his family members and management personnel of the Advisor.

Michael Schoonover 53 Palmeras St. Suite 601 San Juan, PR 00901 Year of Birth: 1983	President	Since 2018	Vice President of the Trust, 2018-2021; Chief Operating Officer (“COO”), Catalyst Capital Advisors LLC and Rational Advisors, Inc. since 2017; Portfolio Manager, Catalyst Capital Advisors LLC, 2013 – May 2021; President, MFund Distributors LLC since January 2020; COO, Catalyst International Advisors LLC, since 2019; COO, Insights Media LLC since 2019; COO, MFund Management LLC since 2019; COO, AlphaCentric Advisors LLC since January 2021; Portfolio Manager, Rational Advisors, Inc., 2016–2018.
Alex Merino 53 Palmeras St. Suite 601 San Juan, PR 00901 Year of Birth: 1985	Vice President	Since 2022	Investment Operations Manager, MFund Management LLC since 2022; Investment Operations Analyst, MFund Management LLC, 2020–2021; Tax Senior Associate, PwC Asset & Wealth Management NY Metro, 2016—2019.
James Szilagyi Year of Birth: 1963	Treasurer	Since 2016	Product Manager, Rational Advisors, Inc., since 2016; Product Manager, Catalyst Capital Advisors LLC, 2015—2018.
Frederick J. Schmidt Year of Birth: 1959	Chief Compliance Officer	Since 2016	Director, MFund Services LLC since 2015.
Jennifer A. Bailey Year of Birth: 1968	Secretary	Since 2016	Director, Legal Services, MFund Services LLC since 2012.

* Officers do not receive any compensation from the Trust.

Compensation of the Board

The Trustees are paid a quarterly retainer, and receive compensation for each committee meeting, telephonic Board meeting, and special in-person Board meeting attended. Officers receive no compensation from the Trust. The Trust reimburses each of the Trustees for travel and other expenses incurred in connection with attendance at such meetings. The Trust has no retirement or pension plans.

The following table describes the compensation that the Trust and the Fund Complex paid to the Trustees of the Trust during the fiscal year ended April 30, 2023.

Name of Trustee	Compensation from the Trust	Compensation from the Fund Complex
Tobias Caldwell	\$46,050	\$308,250
Stephen Lachenauer	\$48,050	\$264,250
Donald McIntosh	\$28,150	\$63,750 ¹

¹ Does not include compensation from Mutual Fund Series Trust, of which he does not serve on the Board.

TRUSTEE OWNERSHIP OF SHARES IN THE FUNDS AND IN THE FUND COMPLEX AS OF DECEMBER 31, 2022

Name of Trustee	Dollar Range of Shares Owned in the Day Hagan ETF	Dollar Range of Shares Owned in the Smart Fixed Income ETF	Dollar Range of Shares Owned in the Smart International ETF	Dollar Range of Shares Owned in the Fund Complex
Tobias Caldwell	None	None	None	Over \$100,000
Stephen Lachenauer	\$10,001-\$50,000	\$10,001-\$50,000	None	Over \$100,000
Donald McIntosh	None	None	None	None ¹

¹ Does not include ownership of shares in Mutual Fund Series Trust, of which he does not serve on the Board.

As of December 31, 2022, none of the Trustees (including their immediate family members) owned beneficially or of record securities of the Advisor or the Distributor or any entity directly or indirectly controlling, controlled by, or under common control with the Advisor or Distributor.

Qualifications and Experience of the Trustees

The following provides an overview of the considerations that led the Board to conclude that each individual serving as a Trustee of the Trust should so serve. Generally, no one factor was decisive in the original selection of an individual to join the Board. Among the factors the Board considered when concluding that an individual should serve on the Board were the following: (1) the individual's business and professional experience and accomplishments; (2) the individual's prior experience serving on the boards of public companies, and other complex enterprises and organizations; and (3) how the individual's skills, experience, and attributes would contribute to an appropriate mix of relevant skills and experience on the Board.

In respect of each current Trustee, the individual's substantial professional accomplishments and prior experience, including, in some cases, in fields related to the operations of the Trust, were a significant factor in the determination that the individual should serve as a Trustee of the Trust.

In addition to the information set forth above, the following sets forth additional information about the

qualifications and experience of each of the Trustees that lead to the conclusion that each Trustee should serve as Trustee of the Trust.

Tobias Caldwell

Mr. Caldwell is the manager of a real estate investment firm. Mr. Caldwell has served on the boards of mutual funds for over ten years, including as chair of the audit committee for over ten years. Mr. Caldwell also serves as a Trustee of other registered investment companies in the Fund Complex. His experience in the real estate and investment industries provides the Board with an additional perspective and understanding of investment strategies used by advisors to the funds.

Stephen Lachenauer

Mr. Lachenauer has been an attorney in private practice for over fifteen years, providing advice and counsel to small businesses and individuals on real estate, commercial contracts, general business and financial matters. Mr. Lachenauer's previous experience at large law firms and as an attorney at a large investment bank provides the Board with knowledge of financial and investment regulatory matters. Mr. Lachenauer also serves as a Trustee of other registered investment companies in the Fund Complex.

Donald McIntosh

Mr. McIntosh is a Business Control & Risk Management Officer for a large international financial services company, and he has many years of credit analysis and loan servicing experience. Mr. McIntosh's experience in evaluating companies' financial condition would provide the Board with knowledge about investment strategies used by the advisors of the funds. Mr. McIntosh also serves as a Trustee of other registered investment companies in the Fund Complex.

Board Structure

The Board is responsible for overseeing the management and operations of the Trust. The Board consists of three Trustees. The Chairperson of the Trust, Tobias Caldwell, is an Independent Trustee.

The Board holds four regular meetings each year to consider and address matters involving the Fund. The Board also may hold special meetings to address matters arising between regular meetings. In addition, the Trustees regularly meet outside the presence of management and are advised by independent legal counsel. These meetings may take place in-person or by telephone.

The Board reviews its structure regularly and believes that its leadership structure, including two Independent Trustees is appropriate and in the best interests of the Trust, given its specific characteristics. The Board also believes its leadership structure facilitates the orderly and efficient flow of information to the Trustees from Trust management.

When considering potential nominees to fill vacancies on the Board, and as part of its annual self-evaluation, the Board reviews the mix of skills and other relevant experiences of the Trustees.

Committees of the Board

The Board has three standing committees, the Audit Committee, the Risk and Compliance Committee, and the Investment Committee.

Audit Committee. The Audit Committee is currently comprised of Mr. Caldwell and Mr. Lachenauer. The primary function of the Audit Committee is to assist the full Board in fulfilling its oversight responsibilities to the shareholders and the investment community relating to fund accounting, reporting practices and the quality and integrity of the financial reports. To satisfy these responsibilities, the Audit Committee reviews with the independent auditors the audit plan and results and recommendations following independent audits, reviews the performance of the independent auditors and recommends engagement or discharge of the auditors to the full Board, reviews the independence of the independent auditors, reviews the adequacy of the Fund's internal controls and prepares and submits Committee meeting minutes and supporting documentation to the full Board. The Audit Committee met four times during the fiscal year ended April 30, 2023.

Risk and Compliance Committee. The Risk and Compliance Committee is comprised of each of the Trustees. The Risk and Compliance Committee is responsible for general oversight of the Trust’s compliance with the legal and regulatory requirements of the Trust’s operations. The Risk and Compliance Committee also serves as a means to provide feedback and guidance to the Trust’s Chief Compliance Officer (“CCO”) and assists the Board in identifying and managing risks. The Risk and Compliance Committee met four times during the fiscal year ended April 30, 2023.

Investment Committee. The Investment Committee is comprised of each of the Trustees. The primary purpose of the Investment Committee is to oversee and guide the process by which the Board evaluates the investment performance of each of the Trust’s series. The Investment Committee also considers and evaluates each investment advisor or sub-advisor (including unaffiliated sub-advisors) or portfolio manager framework for identifying, prioritizing, and managing investment risk. The Investment Committee met twice during the fiscal year ended April 30, 2023.

Board Oversight of Risk

An integral part of the Board’s overall responsibility for overseeing the management and operations of the Trust is the Board’s oversight of the risk management of the Trust’s investment programs and business affairs. The Fund is subject to a number of risks, such as investment risk, valuation risk, risk of operational failure or lack of business continuity, and legal, compliance and regulatory risk. The Fund, the Advisor, and other service providers to the Trust have implemented various processes, procedures, and controls to identify risks to the Fund, to lessen the probability of their occurrence, and to mitigate any adverse effect should they occur. Different processes, procedures, and controls are employed with respect to different types of risks.

The Board exercises oversight of the risk management process through the Risk and Compliance Committee and through oversight by the Board itself. The Board holds four regular meetings each year to consider and address matters involving the Fund.

In addition to adopting, and periodically reviewing, policies and procedures designed to address risks to the Fund, the Board requires management of the Advisor and the Trust, including the Trust’s Chief Compliance Officer (“CCO”), to report to the Board and the Risk and Compliance Committee of the Board on a variety of matters, including matters relating to risk management, at regular and special meetings. The Board and the Audit Committee receive regular reports from the Trust’s independent public accountants on internal control and financial reporting matters. On at least a quarterly basis, the Independent Trustees meet with the Trust’s CCO, including outside the presence of management, to discuss issues related to compliance. Furthermore, the Board receives a quarterly report from the Trust’s CCO regarding the operation of the compliance policies and procedures of the Trust and its primary service providers. The Board monitors the Fund’s investment policies and procedures as well as valuation of the Fund’s securities. The Board also receives quarterly reports from the Advisor on the investments and securities trading of the Fund, including their investment performance and asset weightings compared to appropriate benchmarks, as well as reports regarding the valuation of the Fund’s securities. The Board also receives reports from the Trust’s primary service providers regarding their operations as they relate to the Fund.

The Board also considers liquidity risk management issues as part of its general oversight responsibilities and oversees the Fund’s liquidity risk through, among other things, receiving periodic reporting and presentations by the Liquidity Risk Management (“LRM”) Program Administrator that address liquidity matters. As required by Rule 22e-4 under the 1940 Act, the Board, including a majority of the Independent Trustees, has approved the Trust’s LRM Program, which is reasonably designed to assess and manage the Trust’s liquidity risk, and has appointed the LRM Program Administrator that is responsible for administering the LRM Program. The Board also reviews, no less frequently than annually, a written report prepared by the LRM Program Administrator that addresses, among other items, the operation of the program and assesses its adequacy and effectiveness of implementation.

SERVICE

PROVIDERS INVESTMENT ADVISORY SERVICES

Investment Advisor

Donald L. Hagan, LLC, also known as Day Hagan Asset Management, a Florida limited liability company located at 1000 South Tamiami Trail, Sarasota, FL 34236, serves as advisor to the Funds. The Advisor was formed in 2004 and, as of June 30, 2023, has approximately \$1.392 billion in assets under advisement or management for individuals, institutions and financial advisors around the country. Under the terms of the management agreement, the Advisor is responsible for formulating each Fund's investment policies, making ongoing investment decisions and directing portfolio transactions. The Advisor is controlled by Donald Hagan and Arthur Day.

The Management Agreement provides that the Advisor will provide each Fund with investment advice and supervision and will continuously furnish an investment program for the Fund consistent with the investment objectives and policies of the Fund. The Advisor is responsible for the payment of the salaries and expenses of all of its personnel, office rent and the expenses of providing investment advisory and related clerical expenses.

Under the terms of the Management Agreement, the Advisor manages the investment of the assets of each Fund in conformity with the investment objectives and policies of the Fund. It is the responsibility of the Advisor to make investment decisions for each Fund and to provide continuous supervision of the investment portfolio of the Fund.

As full compensation for its services to the Funds, the Advisor receives monthly compensation from each Fund at the annual rate of 0.68% of the Fund's average daily net assets. In consideration of the fees paid with respect to the Funds, the Advisor has agreed to pay all routine expenses of the Funds (including, without limitation, transfer agent fees, administrative fees and expenses, custodian fees, legal fees, accounting fees, any other expenses (including clerical expenses) of issue, sale, repurchase or redemption of shares, expenses of registering or qualifying shares for sale, transfer taxes, all expenses of preparing the Trust's registration statement and prospectus for the Funds, and the cost of printing and delivering to shareholders prospectuses and reports), except the Funds' management fees; taxes; brokerage commissions and trading costs; interest (including borrowing costs and overdraft charges); short sale dividends and interest expenses; acquired fund fees and expenses; and non-routine or extraordinary expenses of the Funds (such as litigation or reorganizational costs), each of which is paid by the Funds. For the fiscal year ended April 30, 2021, the fiscal year ended April 30, 2022, and the fiscal year ended April 30, 2023, the Day Hagan ETF paid \$801,605, \$2,276,860, and \$3,077,462, respectively, to the Advisor pursuant to the Management Agreement. For the fiscal period from September 28, 2021 (commencement of operations) to April 30, 2022, and the fiscal year ended April 30, 2023, the Smart Fixed Income ETF paid \$77,918, and \$1,049,873, respectively, to the Advisor pursuant to the Management Agreement. For the fiscal period from July 1, 2022 (commencement of operations) to April 30, 2023, the Smart International ETF paid \$87,208 to the Advisor pursuant to the Management Agreement.

The Management Agreement with the Fund continues in effect for an initial two-year term and then from year to year as long as its continuation is approved at least annually by the Board, including a majority of the Trustees who are not "interested persons," or by the shareholders of the Fund. The Management Agreement may be terminated at any time upon 60 days' written notice by the Fund or by a majority vote of the outstanding shares or 90 days' written notice by the Advisor and will terminate automatically upon assignment. A discussion of the matters considered by the Board in connection with the renewal of the Management Agreement with respect to the Day Hagan ETF is available in the Fund's Annual Report to Shareholders for the fiscal year ended April 30, 2023. A discussion of the matters considered by the Board in connection with the approval of the Management Agreement with respect to the Smart International ETF is available in the Fund's Semi-Annual Report to Shareholders for the fiscal period ended October 31, 2022.

The Management Agreement provides that the Advisor shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the performance of its duties, except a loss resulting from a breach of fiduciary duty with respect to the receipt of compensation for services or a loss resulting from willful misfeasance, bad faith, or gross negligence on the part of the Advisor in the performance of its duties, or from reckless disregard of its duties and obligations thereunder.

From time to time, the Advisor may use a portion of its reasonable resources and profits to pay for certain administrative services provided by financial institutions for Shares of the Funds.

ADDITIONAL INFORMATION REGARDING PORTFOLIO MANAGERS

Donald Hagan, Arthur Day and Regan Teague are the portfolio managers responsible for the day-to-day management of the Funds. Mr. Hagan is the Lead Portfolio Manager of each Fund.

Other Accounts Under Management

As of April 30, 2023, the number of, and total assets in all registered investment companies, other pooled investment vehicles, and other accounts overseen by the Fund’s portfolio managers were as follows:

Donald Hagan	Total Number of Other Accounts Managed/Total Assets
Registered Investment Companies	4/\$506 million
Other Pooled Investment Vehicles	0
Other Accounts	5,712/\$754 million

Arthur Day	Total Number of Other Accounts Managed/Total Assets
Registered Investment Companies	3/\$484 million
Other Pooled Investment Vehicles	0
Other Accounts	5,712/\$754 million

Regan Teague	Total Number of Other Accounts Managed/Total Assets
Registered Investment Companies	4/\$506 million
Other Pooled Investment Vehicles	0
Other Accounts	5,712/\$754 million

None of the accounts above are subject to performance-based fees.

Ownership of Fund Shares

The tables below show the portfolio managers’ ownership of the Funds’ shares as of April 30, 2023.

Donald Hagan

Fund	Dollar Range of Equity Securities in the Fund
Day Hagan ETF	\$100,001 - \$500,000
Smart Fixed Income ETF	\$50,001 - \$100,000
Smart International ETF	\$100,001 - \$500,000

Arthur Day

Fund	Dollar Range of Equity Securities in the Fund
Day Hagan ETF	\$50,001 - \$100,000
Smart Fixed Income ETF	\$10,001 - \$50,000
Smart International ETF	\$100,001 - \$500,000

Regan Teague

Fund	Dollar Range of Equity Securities in the Fund
Day Hagan ETF	None
Smart Fixed Income ETF	None
Smart International ETF	None

Compensation

Mr. Hagan and Mr. Day's compensation from the Advisor is based on a base salary plus a share of the net income of the Advisor and is paid monthly. They are also entitled to a portion of the proceeds if the Advisor sells all or a portion of the Advisor's business. They do not receive bonuses or participate in a pension plan. They do participate in the Advisor's 401k plan.

Mr. Teague receives a salary plus a bonus based on the profitability of the firm and participates in the Advisor's 401k plan.

Conflicts of Interest

Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other accounts. The management of multiple accounts may result in a portfolio manager devoting unequal time and attention to the management of each account. The management of multiple funds and accounts also may give rise to potential conflicts of interest if the funds and accounts have different objectives, benchmarks, time horizons, and fees as the portfolio manager must allocate his time and investment ideas across multiple funds and accounts.

With respect to securities transactions for the Fund, the Advisor determines which broker to use to execute each order, consistent with the duty to seek best execution of the transaction. The portfolio manager may execute transactions for another fund or account that may adversely impact the value of securities held by the Fund. Securities selected for funds or accounts other than the Fund may outperform the securities selected for the Fund.

The appearance of a conflict of interest may arise where the Advisor has an incentive, such as a performance-based management fee. The management of personal accounts may give rise to potential conflicts of interest; there is no assurance that the Fund's code of ethics will adequately address such conflicts. One of the portfolio manager's numerous responsibilities is to assist in the sale of Fund shares. Because the portfolio manager's compensation is indirectly linked to the sale of Fund shares, they may have an incentive to devote time to marketing efforts designed to increase sales of Fund shares.

The Fund has adopted a code of ethics that, among other things, permits personal trading by employees under conditions where it has been determined that such trades would not adversely impact client accounts. Nevertheless, the management of personal accounts may give rise to potential conflicts of interest, and there is no assurance that these codes of ethics will adequately address such conflicts.

The Fund may invest in affiliated funds advised by the Advisor. The Advisor is subject to conflicts of interest in allocating the Fund's assets among the affiliated funds. The Advisor will receive more revenue when it selects an affiliated fund rather than an unaffiliated fund for inclusion in the Fund's portfolio. This conflict may provide an incentive for the Advisor to invest Fund assets in affiliated funds that perform less well than unaffiliated funds. The Advisor may have an incentive to allocate the Fund's assets to those affiliated funds for which the net advisory fees payable to the Advisor are higher than the fees payable by other affiliated funds.

The Advisor and the Fund have each adopted certain compliance procedures which are designed to address these types of conflicts. However, there is no guarantee that such procedures will detect each and every situation in which a conflict arises.

DISTRIBUTION SERVICES

Distributor

Foreside Fund Services, LLC, located at Three Canal Plaza, Suite 100, Portland, Maine 04101, serves as the distributor in connection with the continuous offering of the Funds' shares. The Distributor is a broker-dealer registered with the SEC under the Securities Exchange Act of 1934 and a member of the Financial Industry Regulatory Authority. The Trust offers Shares of the Funds for sale through the Distributor in Creation Units. The Distributor will not accept purchase or sell orders in quantities less than Creation Units. The Distributor will deliver a Prospectus to Authorized Participants that purchase Creation Units and will maintain records of Creation Unit orders placed and confirmations furnished by it. Pursuant to a Distribution Services Agreement, the Advisor pays the Distributor for distribution-related services.

Distribution Services Agreement

The Distributor has entered into a Distribution Services Agreement with the Advisor pursuant to which it provides the Funds and the Advisor with the distribution support services set forth in a Distribution Agreement between the Funds and the Distributor.

Rule 12b-1 Plan

The Trust has adopted but has yet to implement a Rule 12b-1 Distribution Plan (the "Plan"). Under the Plan, each Fund is authorized to pay an amount up to 0.25% of its average annual daily net assets for certain distribution-related services.

The Plan is designed to compensate financial intermediaries (including the Advisor, and their affiliates) for activities principally intended to result in the sale of Fund shares such as advertising and marketing of shares (including printing and disseminating prospectuses and sales literature to prospective shareholders and financial intermediaries) and providing incentives to financial intermediaries to sell shares. The Plan is also designed to cover the cost of administrative services performed in conjunction with the sale of shares, including, but not limited to, shareholder services, recordkeeping services, and educational services, as well as the costs of implementing and operating the Plan. In accordance with the Plan, the Distributor may enter into agreements with financial intermediaries and dealers to provide these distribution and distribution-related services with respect to the Funds.

The Plan could benefit the Funds by helping the Funds attract and retain assets, thus providing securities and cash for orderly portfolio management.

Under the Plan, the Funds may compensate a financial intermediary more or less than its actual marketing and administrative expenses. In no event will the Funds pay for any expenses of a financial intermediary that exceed the maximum Plan fee.

No distribution fees are currently charged to the Funds and there are no plans to impose these fees. To the extent that the Plan is implemented in the future with respect to a Fund, the Prospectus will be updated to reflect the implementation and the implementation will also be disclosed on the Fund's website. The Board will pre-approve the implementation of the Plan.

FINANCIAL ADMINISTRATION, TRANSFER AGENCY, AND FUND ACCOUNTING SERVICES

Pursuant to a Services Agreement with Citi Fund Services Ohio, Inc., located at 4400 Easton Commons, Suite 200, Columbus, Ohio 43219, Citi provides financial administration, transfer agency, and fund accounting services to the Trust. As financial administrator, Citi performs certain services on behalf of the Trust including but not limited to: (1) preparing the Trust's periodic financial reports on forms prescribed by the SEC and filing those reports with the SEC upon review and approval of the Trust and Trust counsel; (2) calculating Fund expenses and making required disbursements; (3) calculating Fund performance data; and (4) providing certain compliance support services.

As fund accountant, Citi maintains certain financial records of the Trust and provides accounting services to the Fund that include the daily calculation of each Fund's NAV. Citi also performs certain other services on behalf of the Trust including providing financial information for the Trust's federal and state tax returns and financial reports required to be filed with the SEC. As Transfer Agent, Citi issues shares of each Fund in Creation Units to fill purchase orders for Fund shares, maintains records of the issuance and redemption of the Fund's shares, and acts as the Fund's dividend disbursing agent.

For the financial administration and fund accounting services provided to the Trust, the Trust has agreed to pay an annual fee equal to 0.04% of the aggregate net assets of the Funds, subject to certain breakpoints and minimum fee requirements.

Support Services Agreement. Citi has entered into a Support Services Agreement with the Advisor pursuant to which it prepares and provides facts sheets for the Funds and certain information required by the Advisor to determine each Fund's Creation Basket and estimated Cash Amount for each Business Day.

MANAGEMENT AND LEGAL ADMINISTRATION SERVICES

MFund Services LLC ("MFund"), located at 36 North New York Avenue, Huntington, NY 11743, provides the Funds with various management and legal administrative services. For these services, MFund receives a \$30,000 annual fee, plus an annual asset-based fee equal to 0.03% of the first \$1 billion of net assets of the Funds and 0.02% thereafter. In addition, MFund is reimbursed for any reasonable out-of-pocket expenses incurred in the performance of its duties under the Management Services Agreement. Jerry Szilagyi is the managing member of MFund and the controlling member of Rational Advisors, Inc., the investment advisor to other series of the Trust.

Compliance Services

Pursuant to a Compliance Services Agreement, MFund provides chief compliance officer services to the Trust and each of its series. For these services, MFund receives a monthly base fee plus an asset-based fee. In addition, MFund is reimbursed for any reasonable out-of-pocket expenses incurred in the performance of its duties under the Compliance Services Agreement. MFund receives compensation for chief compliance officer services at the contractual rate of \$1,200/month for the first series of the Trust, \$400 for each additional series, \$400 for each advisor, plus 0.0025% of the assets of each series per calendar year. Jerry Szilagyi is the managing member of MFund and the controlling member of Rational Advisors, Inc., the investment advisor to other series of the Trust.

OTHER SERVICE PROVIDERS

Custodian

Pursuant to a Custodial and Agency Services Agreement with the Trust, Citibank, N.A. ("Citibank"), located at 388 Greenwich Street, New York, NY 10048 serves as Custodian for each Fund and safeguards and holds the Fund's cash and securities, settles the Fund's securities transactions and collects income on Fund investments. Under the agreement, Citibank also: (1) provides data required by the Advisor to determine each Fund's Creation Basket and estimated Cash Amount for each Business Day (this services is paid for by the Advisor directly pursuant to the Support Services Agreement between Citi and the Advisor (see "Support Services Agreement," above)); (2) monitors the settlement of securities comprising the Creation Basket and any cash in connection with the purchase and redemption of Creation Units and requests the issuance of related Creation Units; (3) deposits securities comprising the Creation Basket and/or cash received from Authorized Participants in connection with purchases of Creation Units into the Funds' custody and cash accounts; (4) disburses securities comprising the Creation Basket and/or cash from the Funds custody and cash accounts to Authorized Participants in connection with the redemptions of Creation Units; and (5) performs certain other related services (see "Purchase and Redemption of Creation Units," below).

Independent Registered Public Accounting Firm

The Funds' independent registered public accounting firm is Cohen & Company, Ltd., 1350 Euclid Ave., Suite 800, Cleveland, OH 44115. Shareholders will receive annual financial statements, together with a report of independent accountants, and semiannual unaudited financial statements of the Funds. Cohen & Company, Ltd. will report on each Fund's annual financial statements, review certain regulatory reports and the Fund's income tax returns, and perform other professional accounting, auditing, tax and advisory services when engaged to do so by the Fund.

Legal Counsel

Stradley Ronon Stevens & Young, LLP, 2005 Market Street, Suite 2600, Philadelphia, PA 19103-7018, serves

as counsel for the Trust and the Independent Trustees.

SUPPLEMENTAL PAYMENTS TO FINANCIAL INTERMEDIARIES

Financial intermediaries that promote the sale of Fund shares may be paid fees out of the assets of, the Advisor and their affiliates (but not out of Fund assets).

Financial intermediaries who solicit the sale of Fund shares may receive fees for providing distribution-related, recordkeeping or shareholder services such as sponsoring sales, providing sales literature, conducting training seminars for employees, and engineering sales-related computer software programs and systems. Also, these financial intermediaries may be paid cash or promotional incentives, such as reimbursement of certain expenses relating to attendance at informational meetings about the Fund or other special events at recreational-type facilities, or items of material value. These payments will be based upon the amount of Fund shares the financial intermediary sells or may sell and/or upon the type and nature of sales or marketing support furnished by the financial intermediary.

From time to time, the Advisor, and their affiliates, at their expense, may provide additional compensation to financial intermediaries that sell or arrange for the sale of Fund shares. Such compensation may include financial assistance to financial intermediaries that enable the Advisor, and their affiliates to participate in or present at conferences or seminars, sales or training programs for invited employees, client and investor events and other financial intermediary-sponsored events.

The Advisor, and their affiliates also may hold or sponsor, at their expense, sales events, conferences, and programs for employees or associated persons of financial intermediaries in order to facilitate the sale of Fund shares and may pay the travel and lodging expenses of attendees. The Advisor, and their affiliates also may provide, at their expense, meals and entertainment in conjunction with meetings with these financial intermediaries. Other compensation may be offered to the extent not prohibited by applicable laws, regulations or the rules of any self-regulatory agency, such as FINRA.

PURCHASE AND REDEMPTION OF CREATION UNITS

Each Fund only offers and redeems its shares in Creation Units. Each Fund will offer and sell Creation Units through the Distributor on a continuous basis, without a sales load (but subject to transaction fees), at the NAV per share next determined after an order in proper form is received by the Distributor. The NAV of each Fund is expected to be determined as of the close of regular trading on the Exchange (ordinarily 4:00 p.m. Eastern Time) on each Business Day (“NAV Calculation Time”). Each Fund will sell and redeem Creation Units only on a Business Day.

The Trust generally does not offer its shares outside of the U.S.

IN-KIND TRANSACTIONS - GENERALLY

In order to keep costs low and permit each Fund to be as fully invested as possible, shares of the Fund will be purchased and redeemed in Creation Units and generally on an in-kind basis. Accordingly, except where the purchase or redemption will include cash under the circumstances described in this SAI (see “Cash Transactions – Generally,” below), investors will generally be required to purchase Creation Units by making an in-kind deposit of Deposit Instruments, and shareholders redeeming their shares will generally receive an in-kind transfer of Redemption Instruments. The names and quantities of the instruments that constitute the Deposit Instruments and the names and quantities of the instruments that constitute the Redemption Instruments will be specified by the Fund each day, and these instruments may be referred to, in the case of either a purchase or a redemption, as the “Creation Basket.” In addition, under normal circumstances, the Creation Basket will generally correspond pro rata to the securities, assets or other positions held by the Fund on a Trade Date + 1 (“T+1”) settlement basis (including cash positions), except:¹

1. in the case of bonds, for minor differences when it is impossible to break up bonds beyond certain minimum sizes needed for transfer and settlement;

¹ The portfolio used for this purpose will be the same portfolio used to calculate the Fund’s NAV for that Business Day.

2. for minor differences when rounding is necessary to eliminate fractional shares or lots that are not tradable round lots;² or
3. positions that cannot be transferred in-kind will be excluded from the Creation Basket.³

If there is a difference between the NAV attributable to a Creation Unit and the aggregate market value of the Creation Basket exchanged for the Creation Unit (the “Difference”), the party conveying instruments with the lower value will also pay to the other cash equal in value to the Difference.

Each Business Day, before the open of trading on the Exchange (ordinarily 9:30 a.m., Eastern Time), the Fund will cause to be published through the NSCC the names and quantities of the instruments comprising the Creation Basket (based on Fund portfolio information as of the end of the prior Business Day), as well as the estimated Cash Amount (if any, effective through and including the previous Business Day), for that day.

CASH TRANSACTIONS – GENERALLY

Purchases and redemptions of Creation Units may be made in whole or in part on a cash basis, rather than in kind, under certain circumstances, including:

1. to the extent there is a Cash Amount;
2. if, on a given Business Day, a Fund announces before the open of trading that all purchases, all redemptions, or all purchases and redemptions on that day will be made entirely in cash;
3. if, upon receiving a purchase or redemption order from an Authorized Participant, a Fund determines to require the purchase or redemption, as applicable, to be made entirely in cash;
4. if, on a given Business Day, a Fund requires all Authorized Participants purchasing or redeeming Fund shares on that day to deposit or receive (as applicable) cash in lieu of some or all of the Deposit Instruments or Redemption Instruments, respectively, solely because: (i) such instruments are not eligible for transfer through either the Clearing Process (defined below) or DTC Process; or (ii) in the case of a Fund holding foreign instruments, such instruments are not eligible for trading due to local trading restrictions, local restrictions on securities transfers or other similar circumstances; or
5. if a Fund permits an Authorized Participant to deposit or receive (as applicable) cash in lieu of some or all of the Deposit Instruments or Redemption Instruments, respectively, solely because: (i) such instruments are, in the case of the purchase of a Creation Unit, not available in sufficient quantity; (ii) such instruments are not eligible for trading by an Authorized Participant or the investor on whose behalf the Authorized Participant is acting; or (iii) a holder of shares of a Fund holding foreign instruments would be subject to unfavorable income tax treatment if the holder receives redemption proceeds in kind.

CUSTOM TRANSACTIONS

Under certain circumstances, a Fund may utilize custom Creation Baskets, including (i) all cash baskets; (ii) baskets that substitute cash in lieu of certain securities that would otherwise be included in the Fund’s Creation or Basket; (iii) a basket that is different from the initial basket used in transactions on the same Business Day; or (iv) a non-representative basket that consists of a selection of instruments that are already included in the Fund’s portfolio holdings (each, a “Custom Order”). Custom Orders typically clear outside the Continuous Net Settlement System of the NSCC (the “Clearing Process”) and, therefore, like other orders outside the Clearing Process, may need to be transmitted early on the relevant Business Day to be effectuated at that day’s NAV. Custom Orders may be required to be received by the Distributor by 3:00 p.m. Eastern time to be effectuated based on the Fund’s NAV on that Business Day. A Custom Order may be placed when, for example,

² A tradable round lot for a security will be the standard unit of trading in that particular type of security in its primary market.

³ This includes instruments that can be transferred in-kind only with the consent of the counterparty to the extent the Fund does not intend to seek such consents.

an Authorized Participant cannot transact in a security in the in-kind Creation Basket and therefore has additional cash included in a Creation Basket in lieu of such security.

Persons placing or effectuating custom orders should be mindful of time deadlines imposed by intermediaries, which may impact the successful processing of such orders.

Shares of the Fund will only be issued against full payment, as further described in the Prospectus and this SAI.

PROCEDURES FOR PURCHASE OF CREATION UNITS

All orders to purchase Creation Units must be placed with the Distributor by or through an Authorized Participant. An Authorized Participant is a broker-dealer or other participant in the clearing process through the Clearing Process or a DTC Participant and in each case, must have an executed agreement with the Distributor with respect to the creations and redemption of the Fund's Creation Units ("Participant Agreement"). The Participant Agreement must also be accepted by the Transfer Agent.

An investor does not have to be an Authorized Participant, but must place an order to purchase or redeem Creation Units through an Authorized Participant. All shares of a Fund purchased through the creation process will be entered on the records of DTC in the name of Cede & Co. for the account of the applicable DTC Participant.

There may be a limited number of Authorized Participants at any one point in time and only certain of these entities may be eligible to purchase and transmit non-U.S. instruments comprising a Creation Basket. To the extent that your financial institution is not an Authorized Participant, you may have to purchase Creation Units directly through an Authorized Participant or indirectly through your financial institution. If you opt to purchase Creation Units indirectly through your financial institution, you may incur additional transaction fees.

An order to purchase Creation Units of the Fund must be transmitted to the Distributor on a Business Day and received in proper form no later than the NAV Calculation Time (no later than 3:00 p.m., Eastern Time, for Custom Orders if required by the Distributor) in order for the purchase order to be processed at the NAV of the Fund's shares calculated on the date of transmittal ("Transmittal Date"). An order to purchase a Fund's Creation Units is considered to be in "proper form" if all procedures set forth in the Participant Agreement are properly followed. On Business Days that the Exchange closes early, a Fund may require an order for the purchase of Creation Units to be submitted earlier during the day. An Authorized Participant must deliver a Custom Order to the Distributor sufficiently in advance of the NAV Calculation Time in order to help ensure that the order is effected at the NAV calculated on that date.

Orders must be transmitted by the Authorized Participant to the Distributor by telephone or other transmission method acceptable to the Distributor pursuant to the procedures set forth in the applicable Participant Agreement. All orders to purchase Creation Units must be submitted consistent with the processing requirements set forth in the applicable Participant Agreement (see "Placement of Creation Orders Outside the Clearing Process" and "Placement of Creation Orders Using the Clearing Process," below).

An investor must place orders to purchase a Fund's Creation Units in the form required by the Authorized Participant. An Authorized Participant may require an investor to make certain representations or enter into agreements with respect to the placement of an order to purchase a Fund's shares (e.g., to provide for payments of cash, when required).

Severe economic or market disruptions or changes, or telephone or other communication failure may impede the ability to reach the Distributor or an Authorized Participant. If an investor is submitting an order to purchase Creation Units through an Authorized Participant, the investor should ensure that an appropriate amount of time is provided for submission of such order by the Authorized Participant to the Distributor prior to the NAV Calculation Time.

All questions as to the composition of Deposit Instruments and the amount of any cash to be delivered, as applicable, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities or cash, as applicable, will be determined by the Trust, whose determination shall be final and binding. The Authorized Participant shall be solely responsible for any loss, liability, cost, and expense (including

reasonable attorneys' fees) incurred by the Fund or the Distributor related to the cancellation of an order to purchase or redeem Creation Units.

Placement of Purchase Orders Outside the Clearing Process

To settle a purchase order outside the Clearing Process, the Authorized Participant must instruct the transfer of the relevant Deposit Instruments and/or any applicable cash in a timely fashion so as to ensure the timely delivery of the Deposit Instruments and/or any cash on the Settlement Date. The "Settlement Date" for a Fund is generally the second Business Day after an order to purchase or redeem shares is received by the Distributor.

A purchase order shall be deemed received on the Transmittal Date if the order is received by the Distributor in proper form no later than the NAV Calculation Time on the Transmittal Date (no later than 3:00 p.m., Eastern Time, for Custom Orders if required by the Distributor). Purchase orders received on time on the Transmittal Date will be processed at the NAV calculated on the Transmittal Date.

The delivery of any Deposit Instruments must be made by 12:00 p.m., Eastern Time, on the Settlement Date. Any cash, including the applicable transaction fee (see "Transaction Fees on Purchases of Creation Units," below), shall be payable by 2:00 p.m., Eastern Time, on the Settlement Date. If the Custodian does not receive the Deposit Instruments and/or the applicable cash by the designated times on the Settlement Date, the purchase order may be cancelled. A canceled order may be resubmitted the following Business Day based on the Creation Basket and estimated Cash Amount for that Business Day. The delivery of Creation Units will take place no later than the Settlement Date.

Generally, an Authorized Participant shall deliver cash and any Deposit Instruments that are U.S. government or U.S. government agency securities to a Fund through the Federal Reserve System. An Authorized Participant may deliver Deposit Instruments that are DTC eligible domestic equity or fixed income securities through the DTC manual clearing process ("DTC Process"). Shares of a Fund shall settle and clear through the DTC Process. The DTC Process involves the manual line-by-line transfer of multiple securities. Because the DTC Process involves the movement of multiple securities while the Clearing Process (see below) involves the movement of one unitary basket that automatically processes the movement of numerous securities, the DTC will charge a Fund more than the NSCC to settle a purchase of Creation Units.

Foreign securities cannot currently be processed through either the Clearing Process or the DTC Process. With respect to foreign Deposit Instruments, once a purchase order for Creation Units has been placed with the Distributor, the Distributor will inform the Advisor and the Custodian. The Custodian will then inform the appropriate sub-custodians, as applicable. The Authorized Participant must then timely deliver the relevant Deposit Instruments and/or any cash, including the transaction fee, to a Fund's account maintained with the relevant local custodian(s) by the Settlement Date. If applicable, the sub-custodians will confirm to the Custodian that the Deposit Instruments and/or any applicable cash have been delivered, and the Custodian will notify the Advisor of the same.

After the Distributor has received a purchase order and the Custodian has received delivery of the Deposit Instruments and/or any applicable cash, including the transaction fee, delivery of the appropriate number of Fund shares will be made to the book-entry account designated by the Authorized Participant. Except as provided herein, a Creation Unit of a Fund will not be issued until the transfer of good title to the Trust of any Deposit Instruments has been completed and/or the applicable cash has been received.

Placement of Purchase Orders Using the Clearing Process

Authorized Participants that are CNS Participants will be able to use the Clearing Process to purchase a Fund's Creation Units when Deposit Instruments are limited to DTC eligible domestic equity and fixed income securities and a Cash Amount or an all-cash payment. Under certain circumstances, a CNS Participant that tenders a Custom Order to purchase a Fund's Creation Units will be required to process the order outside the Clearing Process because the Clearing Process can only handle non-conforming deposits in specified situations. Additionally, Creation Units created in advance of receipt by the Custodian of all or a portion of the Deposit Instruments must be processed outside the Clearing Process (see "Additional Purchase Procedures," below).

The Clearing System has been specifically enhanced to effect purchases and redemptions of ETF securities such as the Funds' shares. The Clearing Process simplifies the settlement and delivery process by transferring a basket of securities between two parties and treating all of the securities that comprise the basket as a single position. By contrast, the DTC Process, which is available to all Authorized Participants, involves a manual line-by-line movement of each security position. To the extent that the Clearing Process is available for use, the Participant Agreement will authorize the Distributor to transmit through the Custodian to the NSCC, on behalf of the CNS Participant, applicable trade instructions as are necessary to affect a purchase order for a Fund's Creation Units. Pursuant to the trade instruction, the Authorized Participant agrees to deliver the Deposit Instruments and any/or any cash (including the transaction fee) to the Fund, together with such additional information as may be required by the Distributor.

An order to purchase Creation Units through the Clearing Process is deemed received on the Transmittal Date if such order is received by the Distributor in proper form no later than the NAV Calculation Time on the Transmittal Date (no later than 3:00 p.m., Eastern Time, for Custom Orders if required by the Distributor); and these Creation Units will be priced at Transmittal Date NAV. The delivery of any Deposit Instruments must be made by 12:00 p.m., Eastern Time, on the Settlement Date. Any cash, including the applicable transaction fee (see "Transaction Fees on Purchases of Creation Units," below), shall be payable by 2:00 p.m., Eastern Time, on the Settlement Date. If the Custodian does not receive the Deposit Instruments and/or the applicable cash by the designated times on the Settlement Date, the purchase order may be cancelled. A canceled order may be resubmitted the following Business Day based on the Creation Basket and estimated Cash Amount for that Business Day. The delivery of Creation Units will take place no later than the Settlement Date.

After the Distributor has received a purchase order and the Custodian has received delivery of the Deposit Instruments and/or any applicable cash, including the transaction fee, delivery of the appropriate number of Fund shares will be made to the book-entry account designated by the Authorized Participant. Except as provided herein, a Creation Unit of a Fund will not be issued until the transfer of good title to the Trust of any Deposit Instruments has been completed and/or the applicable cash has been received.

Rejection of Purchase Orders

The Distributor may reject a purchase order for Creation Units if the order is not submitted in proper form consistent with the requirements set forth in the Participant Agreement.

The SEC has expressed the view that a suspension of creations that impairs the arbitrage mechanism applicable to the trading of ETF shares in the secondary market is inconsistent with Rule 6c-11 under the 1940 Act. The SEC's position does not prohibit the suspension or rejection of creations in all instances. The Trust reserves the right, to the extent consistent with the provisions of Rule 6c-11 under the 1940 Act and the SEC's position, to reject an order for Creation Units transmitted to it by the Distributor in respect to a Fund, including instances in which: (1) the order is not in proper form; (2) the securities delivered do not conform with the Deposit Instruments for the relevant date; (3) an investor, upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of a Fund; (4) the acceptance of the Deposit Instruments and/or any applicable cash would, in the opinion of counsel to the Trust, be unlawful; (5) the acceptance or receipt of the order for a Creation Unit would, in the opinion of counsel to the Trust, be unlawful; or (6) in the event that circumstances outside the control of a Fund, the Custodian, the Transfer Agent, and/or the Advisor make it for all practical purposes not feasible to process creation orders.

Examples of such circumstances include natural disasters or public service or utility problems such as fires, floods, extreme weather conditions, and power outages resulting in telephone, telecopy, and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, the Distributor, the Custodian, the Transfer Agent, the DTC, the NSCC, the Federal Reserve System, or any other participant in the creation process, and other extraordinary events. The Distributor shall notify an Authorized Participant of the rejection of any order. The Trust, the Transfer Agent, the Custodian, and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Deposit Instruments and/or any cash nor shall either of them incur any liability for the failure to give any such notification. The Trust, the Transfer Agent, the Custodian, and the Distributor shall not be liable for the rejection of any purchase order for Creation Units.

Additional Purchase Procedures

Creation Units may be issued to an Authorized Participant in advance of receipt by the Trust of all or a portion of the applicable Deposit Instruments provided that the Authorized Participant deposits an initial deposit of cash with the Trust having a value greater than the NAV of the requisite Fund shares on the date the order is received. In addition to available Deposit Instruments, cash must be deposited in an amount equal to the sum of the Cash Amount plus 115% of the market value of the Deposit Instruments not delivered (“Additional Cash Deposit”).

An order will be deemed received on the Transmittal Date if: (1) the order is received by the Distributor in proper form no later than the NAV Calculation Time on that date (no later than 3:00 p.m., Eastern Time if required by the Distributor); and (2) federal funds equal to the sum of the Cash Amount, the Additional Cash Deposit, and the applicable transaction fee are received by the Custodian by 12:00 p.m., Eastern Time, on the Business Day following the Transmittal Date.

Pending delivery of the undelivered Deposit Instruments, the Authorized Participant shall be required to deposit additional cash, as needed, to maintain the Additional Cash Deposit at an amount equal to 115% of the value of undelivered Deposit Instruments, which shall be marked to market daily by the Fund until the outstanding securities are received. Under these circumstances, the shares of the Fund shall be delivered no later than the Settlement Date.

If an order is not received in proper form by the NAV Calculation Time on the Transmittal Date (no later than 3:00 p.m., Eastern Time, if required by the Distributor) or the required cash deposit is not timely received on the Settlement Date by the Custodian, then the order may be cancelled or deemed not received and the Authorized Participant effecting the transaction will be liable to the Fund for any losses resulting therefrom.

To the extent that the undelivered Deposit Instruments are not received by 12:00 p.m., Eastern Time, on the Settlement Date, a Fund may utilize the Additional Cash Deposit to buy the missing Deposit Instruments at any time and the Authorized Participant effecting the transaction will be liable to the Fund for the costs incurred by the Fund in connection with such purchases and any shortfall between the cost to the Fund of purchasing such securities and the value of the Additional Cash Deposit. Costs to purchase the outstanding Deposit Instruments shall include, but not be limited to, any applicable transaction fee imposed by the Fund in connection with the purchase of the undelivered Deposit Instruments, the amount by which the actual purchase price of the undelivered Deposit Instruments exceeds the Additional Cash Deposit or the market value of such Deposit Instruments on the day the purchase order was received by the Distributor plus the brokerage and related transaction costs associated with such purchases. A Fund will return the remaining Additional Cash Deposit once the undelivered Deposit Instruments are received by the Custodian or purchased by and deposited into the Fund.

The Participant Agreement may contain further information relating to this collateral process.

Transaction Fees on Purchases of Creation Units

Each Fund charges a transaction fee, which is intended to cover the transfer and other transactional costs it incurs to issue Creation Units. A per transaction fee charge will be charged by each Fund (“Standard Charge”), regardless of the number of Creation Units purchased. Each Fund reserves the right to charge additional transactions fees of up to three (3) times the Standard Charge for: (1) purchase orders processed outside the Clearing Process; (2) purchase orders involve cash in lieu amounts; and (3) cash purchases (“Additional Charges”). Each Fund also reserves the right to adjust the Standard Charge and/or the Additional Charges at any time in order to ensure that the Fund is able to continue to recoup the costs it actually incurs to issue Creation Units. Authorized Participants are responsible for paying the costs to transfer Deposit Instruments to a Fund. Authorized Participants may also charge investors a fee to purchase Creation Units on their behalf.

The Standard Charge and maximum transaction fee for each Fund are \$250 and \$1,000, respectively. An investor purchasing Creation Units outside the Clearing Process may be required to pay higher transaction fees than if the purchase is processed through the Clearing Process.

Risks of Purchasing Creation Units

The proposed method by which a Fund's Creation Units will be purchased and traded may raise certain issues under applicable securities laws. Because new Creation Units of a Fund's shares may be issued and sold on an ongoing basis, a "distribution" of that Fund's shares may be occurring at any time. Certain activities that a shareholder performs as a dealer may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery and liability provisions of the 1933 Act.

For example, a shareholder could be deemed a statutory underwriter if it takes Creation Units from a Fund, breaks them down into the constituent shares and sells the shares directly to customers. A shareholder may also be deemed to be a statutory underwriter if the shareholder chooses to couple the purchase of a supply of new shares of a Fund with an active selling effort involving solicitation of secondary market demand for the shares.

Whether a person is an underwriter depends on all the facts and circumstances pertaining to that person's activities and the examples set forth here are not intended to depict all circumstances under which a shareholder may be deemed to be a statutory underwriter.

Dealers who are not "underwriters" but are participating in a distribution (as opposed to ordinary secondary market transactions), and thus dealing with a Fund's shares as part of an "unsold allotment" within the meaning of Section 4(3)(C) of the 1933 Act, will be unable to rely on the prospectus-delivery exemption provided by Section 4(3) of the 1933 Act.

Pursuant to Rule 153 under the 1933 Act, a prospectus delivery obligation under Section 5(b)(2) of the 1933 Act owed to a member of the Exchange in connection with a sale on the Exchange is satisfied by the fact that a Prospectus is available at the Exchange upon request. This prospectus delivery mechanism is only available with respect to transactions on the Exchange.

REDEMPTION OF CREATION UNITS

Redemption requests must be placed by or through an Authorized Participant. Shares of a Fund may only be redeemed in Creation Units except upon liquidation of the Fund. To redeem shares with a Fund, an investor must accumulate enough shares of that Fund to constitute one or more Creation Units. An investor may accumulate the shares necessary to comprise a Creation Unit of a Fund on the Exchange. However, there is no assurance that there will be sufficient liquidity in the market to enable the purchase of a sufficient number of shares of a Fund to complete a Creation Unit. An investor should expect to incur brokerage commissions and other costs to purchase the required number of shares to complete a Creation Unit.

Creation Units of a Fund may be redeemed on any Business Day at their NAV next calculated after a redemption request in proper form is received by the Distributor. A redemption request is considered to be in "proper form" if all procedures set forth in the Participant Agreement are properly followed.

The redemption of a Fund's Creation Units will be subject to compliance with applicable federal and state securities laws. An Authorized Participant that is not a "qualified institutional buyer" or "QIB" as such term is defined in Rule 144A of the 1933 Act will not be able to receive Redemption Instruments that are restricted securities eligible for resale under Rule 144A. An Authorized Participant may be required by a Fund to provide a written confirmation with respect to QIB status in order to receive Redemption Instruments. An Authorized Participant may request a redeeming investor on whose behalf it is acting to enter into agreements outlining the terms under which cash must be substituted for one or more Redemption Instruments in order to comply with applicable securities laws and other legal restrictions relevant to the investor.

All orders to redeem Creation Units of a Fund must be received by the Distributor in proper form no later than the NAV Calculation on a Business Day (no later than 3:00 p.m., Eastern Time, for orders involving cash in lieu requests by Authorized Participants if required by the Distributor) in order to receive the NAV calculated on that date ("Transmittal Date"). On Business Days that the Exchange closes early, a Fund may require orders for the redemption of a Creation Unit(s) to be submitted earlier during the day. An Authorized Participant must deliver a Custom Order to the Distributor sufficiently in advance of the NAV Calculation Time in order to help ensure that the order is effected at the NAV calculated on the Transmittal Date.

An investor redeeming a Fund's Creation Units should submit the redemption order in the form required by the Authorized Participant selected to process the transaction. An investor intending to redeem a Fund's Creation Units should allow sufficient time to permit a timely submission of the redemption request to the Distributor and transfer of the Creation Units to the Fund.

There may be a limited number of Authorized Participants at any one point in time and only certain of these entities may be eligible to receive foreign securities on your behalf as part of the in-kind redemption process. To the extent that your financial institution is not an Authorized Participant, you may redeem Creation Units directly through an Authorized Participant or indirectly through your financial institution. If you opt to redeem Creation Units indirectly through your financial institution, you may incur additional transaction fees. You should also allow additional time to effect redemptions through your financial intermediary if the financial intermediary is not an Authorized Participant.

Although the Settlement Date for the redemption of Fund shares is generally the second Business Day after an order to redeem shares is received by the Distributor, the Settlement Date may be up to seven days after the Transmittal Date.

Placement of Redemption Orders Outside the Clearing Process

An order to redeem Creation Units is deemed received by the Distributor on the Transmittal Date if: (1) the order is received by the Distributor in proper form no later than the NAV Calculation Time (no later than 3:00 p.m., Eastern Time, for orders involving cash in lieu requests by Authorized Participants if required by the Distributor) on the Transmittal Date; (2) the order is accompanied or followed by the delivery of the requisite Creation Units, which delivery must be made through the DTC to the Custodian no later than 12:00 p.m., Eastern Time, on the Settlement Date; and (3) the order is accompanied or followed by the delivery of any Cash Amount and the applicable transaction fee to the Custodian through the Federal Reserve System no later than 2:00 p.m., Eastern Time, on the Settlement Date.

After a redemption request is received by the Distributor, the Custodian shall initiate procedures for the transfer of the Redemption Instruments and any Cash Amount, less any transaction fee, which is expected to be delivered by the Settlement Date.

The value of the Redemption Instruments and any Cash Amount will be calculated in accordance with the Trust's procedures for calculation of a Fund's NAV as summarized in the Prospectus and this SAI. Therefore, if a redemption in proper form is submitted to the Distributor by an Authorized Participant no later than the NAV Calculation Time on the Transmittal Date (no later than 3:00 p.m., Eastern Time, for orders involving cash in lieu requests from Authorized Participants if required by the Distributor), and the requisite number of Fund shares are timely delivered to the Custodian no later than 12:00 P.M. on the Settlement Date, then the value of the Redemption Instruments and any Cash Amount will be determined by the Fund Accountant as of the Transmittal Date. If a redemption order is submitted to the Distributor on the Transmission Date not later than the NAV Calculation Time on the Transmittal Date (no later than 3:00 p.m., Eastern Time, for Custom Orders if required by the Distributor) but either: (1) the requisite number of shares of Fund shares are not timely delivered or (2) the redemption order is not submitted in proper form, then the redemption order will not be deemed received as of the Transmittal Date. In such case, the value of the Redemption Instruments and any Cash Amount will be computed as of the Business Day that an order in proper form is received by the Distributor.

Placement of Redemption Orders Using the Clearing Process

Shareholders redeeming Creation Units pursuant to Custom Orders may be required to settle their redemptions outside of the Clearing Process. Redemptions of Creation Units in advance of receipt by the Custodian of all Fund shares (see "Additional Redemption Procedures," below) must be processed outside of the Clearing Process.

An order to redeem Creation Units using the Clearing Process is deemed received on the Transmittal Date if such order is received by the Distributor in proper form no later than the NAV Calculation Time on such Transmittal Date. An order deemed received after the NAV Calculation Time on the Transmittal date (after 3:00 p.m., Eastern Time, for orders involving cash in lieu requests from Authorized Participants if required by the

Distributor) will be effected at the NAV calculated on the next Business Day. The Redemption Instruments and any Cash Amount, less the transaction fee, will be transmitted by the Settlement Date.

If a redemption order is submitted to the Distributor not later than the NAV Calculation Time on the Transmittal Date (no later than 3:00 p.m., Eastern Time, for Custom Orders if required by the Distributor) but either: (1) the requisite number of shares of Fund shares are not timely delivered or (2) the redemption order is not submitted in proper form, then the redemption order will not be deemed received as of the Transmittal Date. In such case, the value of the Redemption Instruments and any Cash Amount will be computed as of the Business Day that an order in proper form is received by the Distributor.

Additional Redemption Procedures

Creations Units may be redeemed in advance of receipt by the Trust of all or a portion of Fund shares provided that the Authorized Participant deposits an initial deposit of cash with the Trust in an amount equal to the sum of any Cash Amount plus 115% of the market value of the missing Fund shares not delivered (“Redemption Deposit”).

An order will be deemed received on the Transmittal Date if: (1) the Distributor received the order in proper form no later than the NAV Calculation Time on that date (no later than 3:00 p.m., Eastern Time, if required by the Distributor); and (2) the federal funds equal to the sum of any Cash Amount, the Redemption Deposit, and the applicable transaction fee are received by the Custodian by 12:00 p.m., Eastern Time, on the Business Day following the Transmittal Date. Pending delivery of the undelivered Fund shares, the Authorized Participant shall be required to deposit additional cash, as needed, to maintain the Redemption Deposit at an amount equal to 115% of the value of undelivered Fund shares, which shall be marked to market daily by the Fund until the outstanding shares are delivered. Under these circumstances, the Redemption Instruments, and any Cash Amount, less the applicable transaction fee, shall be delivered no later than the Settlement Date.

If an order is not received in proper form by the NAV Calculation Time on the Transmittal Date (no later than 3:00 p.m., Eastern Time, if required by the Distributor) or the required cash deposit is not timely received on the next Business Day following the date the order was received by the Distributor, then the order may be cancelled and deemed not received and the Authorized Participant affecting the transaction will be liable to the Funds for any losses resulting therefrom.

To the extent that the undelivered Fund shares are not received by 12:00 p.m., Eastern Time, the Fund may use the Redemption Deposit to purchase the undelivered shares at any time and the Authorized Participant shall be liable to a Fund for the costs incurred by the Fund in connection with such purchases and any shortfall between the cost to the Fund to acquire the shares and the value of the Redemption Deposit. Costs to purchase the outstanding Fund shares shall include, but not be limited to, the amount by which the actual purchase price of the undelivered Fund shares exceeds the Redemption Deposit or the market value of such shares on the day the purchase order was received by the Distributor plus the brokerage and related transaction costs associated with such purchases. The Fund will return the remaining Redemption Deposit once the undelivered shares are received by the Custodian.

The Participant Agreement may contain further information relating to this collateral process.

Transaction Fees on Redemptions of Creation Units

Each Fund charges a transaction fee, which is intended to cover the transfer and other transactional costs it incurs to redeem Creation Units. A transaction fee will be charged by each Fund to Authorized Participants per redemption (“Standard Redemption Fee”). Each Fund reserves the right to charge additional transactions fees not to exceed three (3) times the Standard Redemption Fee for: (1) orders processed outside of the Clearing Process; (2) orders involving cash in lieu amounts; and (3) cash redemptions (“Additional Redemption Charges”). Each Fund also reserves the right to adjust the Standard Charge and/or the Additional Redemption Charges at any time in order to ensure that the Fund is able to continue to recoup the costs it actually incurs to issue Creation Units. Authorized Participants are responsible for paying the costs to transfer the Redemption

Instruments from the Fund. Authorized Participants may charge investors a fee to redeem Creation Units on their behalf.

The standard transaction fee and maximum transaction fee for the Fund are \$250 and \$1,000, respectively.

Suspension of Redemption Rights

The right of redemption may be suspended with respect to a Fund for: (1) any period during which the Exchange is closed (other than customary weekend and holidays); (2) any period during which trading on the Exchange is suspended or restricted; (3) any period which an emergency exists as a result of which disposal of Fund shares or determination of the Fund's NAV is not reasonably practicable; or (4) such other periods as the SEC may permit.

BROKERAGE TRANSACTIONS

While changes to a Fund's investment portfolio will generally be implemented through the issuance and redemption of the Fund's Creation Units in exchange for a Creation Basket, there may be occasions wherein the Advisor will purchase or sell securities directly on behalf of the Fund. To the extent that a Fund issues or redeems Creation Units partly or solely for cash, the Advisor may have to execute portfolio transactions on behalf of the Fund. The Day Hagan ETF paid \$22,304, \$71,875 and \$86,504 in brokerage commissions for the fiscal year ended April 30, 2021, the fiscal year ended April 30, 2022, and the fiscal year ended April 30, 2023, respectively. The Smart Fixed Income ETF paid \$6,734 and \$15,300 in brokerage commissions for the fiscal period from September 28, 2021 (commencement of operations) to April 30, 2022, and for the fiscal year ended April 30, 2023, respectively. The Smart International ETF paid \$7,737 in brokerage commissions for the fiscal period from July 1, 2022 (commencement of operations) to April 30, 2023.

TRADE ALLOCATION

Investment decisions for the Funds and other clients of the Advisor are made with a view to achieving their respective investment objectives and after consideration of such factors as their current holdings, availability of cash for investment, and the size of their investments generally.

A security may be bought or sold by the Advisor for only one client or in different amounts and at different times for more than one but less than all clients. Likewise, a particular security may be bought for one or more clients when one or more other clients are selling the security. In addition, purchases or sales of the same security may be made for two or more clients of the Advisor on the same day. To the extent that multiple clients are purchasing or selling a specific security at the same time, such transactions will be allocated among the clients in a manner believed by the Advisor to be equitable to each. In some cases, this procedure could have an adverse effect on the price or amount of the securities purchased or sold by the Funds. Purchase and sale orders for the Fund may be combined with those of other clients of the Advisor in the interest of achieving the most favorable net results for the Funds.

BROKERAGE ALLOCATION

The Advisor may place orders for the purchase and sale of portfolio securities for the Funds through numerous brokers and dealers. In so doing, it uses its best efforts to obtain for the Funds the best price and execution available. In seeking the best price and execution, the Advisor, having in mind a Fund's best interests, considers all factors it deems relevant, including, by way of illustration, price, the size of the transaction, the nature of the market for the security, the amount of the commission, the timing of the transaction taking into account market prices and trends, the reputation, experience, and financial stability of the broker-dealer involved, and the quality of service rendered by the broker-dealer in other transactions.

Transactions on U.S. stock exchanges and other agency transactions involve the payment by a Fund of negotiated brokerage commissions. Such commissions vary among brokers. Also, a particular broker may charge different commissions according to such factors as the difficulty and size of the transaction. Transactions in foreign securities often involve the payment of fixed brokerage commissions, which are generally higher than those in the U.S. There is generally no stated commission in the case of securities traded in the over-the-counter markets,

but the price paid by a Fund usually includes an undisclosed dealer commission or mark-up. Purchases and sales of fixed income securities (for instance, money market instruments and bonds, notes, and bills) usually are principal transactions. In a principal transaction, the party from whom a Fund purchases, or to whom the Fund sells, is acting on its own behalf (and not as the agent of some other party such as its customers). These securities normally are purchased directly from the issuer or from an underwriter or market maker for the securities. The prices of securities purchased from dealers serving as market makers reflect the spread between the bid and asked price. In underwritten offerings, the price paid by a Fund includes a disclosed, fixed commission or discount retained by the underwriter or dealer.

SOFT DOLLAR PRACTICES

It has for many years been a common practice in the investment advisory business for advisors of investment companies and other institutional investors to receive research, statistical, and quotation services from broker-dealers that execute portfolio transactions for their clients. Consistent with this practice, the Advisor may receive research, statistical, and quotation services from broker-dealers with which it places the Funds' portfolio transactions. These services, which in some cases may also be purchased for cash, include general economic and security market reviews, industry and company reviews, evaluations of securities, and recommendations as to the purchase and sale of securities. Some of these services are of value to the Advisor and its affiliates in advising various of its clients (including the Funds), although not all of these services are necessarily useful and of value in managing the Funds. The investment advisory fee paid by a Fund to the Advisor is not reduced because the Advisor and its affiliates receive such services.

As permitted by Section 28(e) of the 1934 Act and by the Trust's Management Agreement with the Advisor, the Advisor may cause a Fund to pay a broker-dealer that provides the brokerage and research services described above an amount of disclosed commission for effecting a securities transaction for the Fund in excess of the commission which another broker-dealer may charge for effecting that transaction. The Advisor's authority to cause a Fund to pay any such greater commissions is also subject to such policies as the Trustees may adopt from time to time.

ADDITIONAL INFORMATION ABOUT THE TRUST

SHAREHOLDER RIGHTS

All shareholders are entitled to one vote for the Fund share held on the record date for any action requiring a vote by the shareholders. Shareholders of the Trust will vote in the aggregate and not by series except as otherwise expressly required by law or when the Trustees determine that the matter to be voted upon affects only the interests of the shareholders of a particular series of the Trust.

Each share of a Fund represents a pro rata interest in the assets of the Fund. Fund shares have no preemptive, exchange, subscription or conversion rights and there are no restrictions on the transfer of Fund shares. Each Fund share participates pro rata in all dividends and distributions of the Fund and in the net distributable assets upon liquidation.

The Trust is not required to hold annual meetings of shareholders for the purpose of electing Trustees except that (1) the Trust is required to hold a shareholder meeting for the election of Trustees at such time as less than a majority of the Trustees holding office have been elected by shareholders and (2) if, as a result of a vacancy on the Board, less than two-thirds of the Trustees holding office have been elected by the shareholders, that vacancy may only be filled by a vote of the shareholders. Except as set forth above, a Trustee may continue to hold office and may appoint successor Trustees.

The Declaration of Trust provides a process for the bringing of derivative actions by shareholders for claims beyond the process otherwise required by law. This derivative actions process is intended to permit legitimate inquiries and claims while avoiding the time, expense, distraction, and other harm that can be caused to a Fund or its shareholders as a result of spurious shareholder demands and derivative actions. Prior to bringing a

derivative action, a pre-suit demand by the complaining shareholder must first be made on the Board of Trustees, unless such action is excused because a majority of the members of the Board have a material personal financial interest in the action at issue. Following receipt of the demand, the Trustees must be afforded a reasonable amount of time to investigate and consider the demand.

Under the Declaration of Trust, the Trustees have the power to liquidate any series of the Trust without shareholder approval. While the Trustees have no present intent to exercise this power, they may do so if a series fails to reach a viable size within a reasonable amount of time or for such other reasons as may be determined by the Board.

The rights of shareholders cannot be modified without a majority vote of the Shareholders.

FEES PAID FOR SERVICES

As described above under “Service Providers—Investment Advisory Services—Investment Advisor,” the Advisor receives compensation from each Fund at the annual rate of 0.68% of the Fund’s average daily net assets. In consideration of such fees, the Advisor pays all routine expenses of the Funds. The following tables show the amounts that the Advisor paid to the Funds’ other service providers for administration, transfer agency, and compliance services for the fiscal periods shown below.

Day Hagan ETF

	Fiscal Year Ended April 30, 2021	Fiscal Year Ended April 30, 2022	Fiscal Year Ended April 30, 2023
Administration Fee Paid to Citi	\$14,822	\$15,570	\$15,840
Management and Legal Administration Fee Paid to MFund	\$65,675	\$130,843	\$167,208
Fund Accounting Fee Paid to Citi	\$38,566	\$103,679	\$140,449
Compliance Services Fees Paid to MFund	\$21,941	\$23,519	\$22,967

Smart Fixed Income ETF

	Fiscal Period from September 28, 2021 (commencement of operations) to April 30, 2022	Fiscal Year Ended April 30, 2023
Administration Fee Paid to Citi	\$7,387	\$12,605
Management and Legal Fee Paid to MFund	\$21,147	\$38,857
Fund Accounting Fee Paid to Citi	\$6,117	\$23,989
Compliance Services Fees Paid to MFund	\$7,727	\$11,587

Smart International ETF

	Fiscal Period from July 1, 2022 (commencement of operations) to April 30, 2023
Administration Fee Paid to Citi	\$8,605
Management and Legal Fee Paid to MFund	\$24,552
Fund Accounting Fee Paid to Citi	\$6,679
Compliance Services Fees Paid to MFund	\$8,213

PRINCIPAL HOLDERS OF SECURITIES

From time to time, certain shareholders, including Authorized Participants, may own, of record, beneficially, or both, more than 25% of a Fund's shares and those shareholders may be able to control the outcome of a shareholder vote.

As of August 1, 2023, the Trustees and officers of the Trust in the aggregate owned less than 1% of the outstanding shares of beneficial interest of each Fund.

Although the Trust does not have information concerning the beneficial ownership of shares held in the names of the Depository Trust Company (DTC) participants, as of August 1, 2023, the name, address and percentage ownership of each DTC participant that owned of record 5% or more of the outstanding shares of each Fund were as follows:

Shareholder Name and Address	Percentage Owned
Cede & Co. 55 Water Street, 25 th Floor New York, NY, 10041	100%

BOOK ENTRY ONLY SYSTEM

The information below supplements disclosure in the Prospectus regarding the book entry system. This information should be read in conjunction with the disclosure included in the Prospectus.

DTC acts as securities depository for the Funds' shares. Shares of the Funds are represented by securities registered in the name of DTC or its nominee, Cede & Co., and deposited with, or on behalf of, DTC. Generally, certificates will not be issued for shares.

DTC is a limited-purpose trust company that was created to hold securities of the DTC Participants and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the Exchange and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers, and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the "Indirect Participants").

Beneficial ownership of the Funds' shares is limited to DTC Participants, Indirect Participants, and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in a Fund's shares (owners of such beneficial interests are referred to herein as "Beneficial Owners") is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of a Fund's shares. The Trust recognizes DTC or its nominee as the record owner of a Fund's shares for all purposes. Beneficial Owners of a Fund's shares are not entitled to have Fund shares registered in their names and will not receive or be entitled to physical delivery of share certificates. Each

Beneficial Owner must rely on the procedures of DTC and any DTC Participant and/or Indirect Participant through which such Beneficial Owner holds its interests, to exercise any rights of a holder of a Fund's shares.

Conveyance of all notices, statements, and other communications to Beneficial Owners is affected as follows. DTC will make available to the Trust upon request and for a fee a listing of the Funds' shares held by each DTC Participant. The Trust shall obtain from each such DTC Participant the number of Beneficial Owners holding the Funds' shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement, or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners.

In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of the Funds' shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in the Funds as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of the Funds' shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a "street name," and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspect of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in the Funds' shares, or for maintaining, supervising, or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may determine to discontinue providing its service with respect to a Fund at any time by giving reasonable notice to the Fund and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Fund shall take action either to find a replacement for DTC to perform its functions at a comparable cost or, if such replacement is unavailable, to issue and deliver printed certificates representing ownership of the Fund's shares, unless the Trust makes other arrangements with respect thereto satisfactory to the Exchange. The DTC Participants' rules and policies are made publicly available through its website at www.dtcc.com.

VOTING PROXIES OF FUND PORTFOLIO SECURITIES

The Board has delegated responsibilities for decisions regarding proxy voting for securities held by the Funds to the Advisor. The Advisor may further delegate such proxy voting to a third-party proxy voting service provider. The Advisor will vote such proxies in accordance with their proxy policies and procedures. In some instances, the Advisor may be asked to cast a proxy vote that presents a conflict between its interests and the interests of a Fund's shareholders. In such a case, the Trust's policy requires that the Advisor abstain from making a voting decision and to forward all necessary proxy voting materials to the Trust to enable the Board to make a voting decision. When the Board is required to make a proxy voting decision, only the Trustees without a conflict of interest with regard to the security in question or the matter to be voted upon shall be permitted to participate in the decision of how a Fund's vote will be cast. The Advisor has developed a detailed proxy voting policy that has been approved by the Board. A copy of the proxy voting policies and procedures are attached hereto as Appendix 2.

Information on how each Fund voted proxies for the most recent year ended June 30, relating to portfolio securities is available without charge, upon request, by calling 1-800-594-7930 or on the SEC's Internet site at www.sec.gov. In addition, a copy of the Funds' proxy voting policies and procedures is also available by calling 1-800-594-7930 and will be sent within three business days of receipt of a request.

PORTFOLIO HOLDINGS DISCLOSURE PRACTICES

The Board has adopted policies and procedures for the public and nonpublic disclosure of the Funds' portfolio securities.

Each day a Fund is open for business, before the opening of regular trading on the Exchange, the Fund will publicly disclose on the Fund's website at www.dhfunds.com the Fund's full portfolio holdings that will form the basis of the next calculation of current NAV, which are based on the Fund's portfolio holdings as of the close of business on the prior Business Day. In addition, each Business Day, a portfolio composition file, which displays the names and quantities of the instruments comprising the Creation Basket(s), as well as the estimated Cash Amount (if any), for that day, is publicly disseminated prior to the opening of the Exchange via the NSCC.

In addition, as a general matter, no information concerning the portfolio holdings of a Fund may be disclosed to any unaffiliated third party except (1) to service providers that require such information in the course of performing their duties (for example, the Fund's custodian, administrator, the Advisor, any sub-advisor, independent public accountants, attorneys, officers and trustees) and are subject to a duty of confidentiality including a duty not to trade on non-public information, and (2) pursuant to certain exceptions that serve a legitimate business purpose. These exceptions may include: (1) disclosure of portfolio holdings only after such information has been publicly disclosed on the Fund's website, in marketing materials or through filings with the SEC as described below and (2) to third-party vendors, that (a) agree to not distribute the portfolio holdings or results of the analysis to third parties, other departments or persons who are likely to use the information for purposes of purchasing or selling the Fund before the portfolio holdings or results of the analysis become publicly available; and (b) sign a written confidentiality agreement. The confidentiality agreement must provide, but is not limited to, that the recipient of the portfolio holdings information agrees to limit access to the portfolio holdings information to its employees who, on a need to know basis are (1) authorized to have access to the portfolio holdings information and (2) subject to confidentiality obligations, including duties not to trade on non-public information, no less restrictive than the confidentiality obligations contained in the confidentiality agreement.

Each Fund's portfolio holdings are currently disclosed to the public through filings with the SEC. Each Fund discloses its portfolio holdings by mailing the annual and semi-annual reports to shareholders approximately two months after the end of the fiscal year and semi-annual period, respectively. In addition, each Fund's portfolio holdings are publicly available on the SEC's EDGAR website in the Fund's reports on Form N-CSR two months after the end of each semi-annual period and on Form N-PORT two months after each quarter.

Neither the Funds nor the Advisor may enter into any arrangement providing for the disclosure of non-public portfolio holding information for the receipt of compensation or benefit of any kind. Any exceptions to the policies and procedures may only be made by the consent of the Trust's chief compliance officer upon a determination that such disclosure serves a legitimate business purpose and is in the best interests of the Funds and will be reported to the Board at the Board's next regularly scheduled meeting.

CODE OF ETHICS

The Trust, the Advisor, and the Distributor have adopted codes of ethics under Rule 17j-1(c) of the 1940 Act. The purpose of each code is to avoid potential conflicts of interest and to prevent fraud, deception or misconduct with respect to the Funds. Such codes of ethics permit personnel covered by the codes to invest in securities that may be purchased or held by the Funds, subject to the restrictions of the codes. The codes are filed as exhibits to the Trust's registration statement.

PORTFOLIO TURNOVER

The portfolio turnover rate of the Fund is defined by the SEC as the ratio of the lesser of annual sales or purchases to the monthly average value of the portfolio, excluding from both the numerator and the denominator securities with maturities at the time of acquisition of one year or less. Portfolio turnover generally involves some expense to the Fund, including brokerage commissions or dealer mark-ups and other transactions costs on the sale of securities and reinvestment in other securities. For the fiscal year ended April 30, 2021, the fiscal year ended April 30, 2022, and the fiscal year ended April 30, 2023, the portfolio turnover rates for the Day Hagan ETF were 84%, 111% and 207%, respectively. For the fiscal period from September 28, 2021 (commencement of operations) to April 30, 2022, and the fiscal year ended April 20,

2023, the portfolio turnover rate for the Smart Fixed Income ETF was 85% and 174%, respectively. For the fiscal period from July 1, 2022 (commencement of operations) to April 30, 2023, the portfolio turnover rate for the Smart International ETF was 231%. The significant increase in the turnover rate of each the Day Hagan ETF and the Smart Fixed Income ETF during the April 30, 2023 fiscal year was due to (i) the Fund's models' buy and sell signals and (ii) the volatility during the market downturn in early 2022 and the rally from October 2023 caused the sector allocations to shift.

DETERMINATION OF NET ASSET VALUE

Each Fund calculates its NAV per share as of the close of the Exchange (normally 4:00 p.m. Eastern Time) on each Business Day. The NAV per share is calculated by dividing the value of the net assets of a Fund (e.g. value of total assets less total liabilities) by the total number of shares outstanding.

To calculate each Fund's NAV per share, the Trust follows valuation procedures approved by the Board. Pursuant to these procedures, the Trust relies on certain security pricing services to provide current market values for each Fund's portfolio securities. These security pricing services value equity securities (including foreign equity securities) traded on a securities exchange at the last reported sales price on the principal exchange. Equity securities quoted by NASDAQ are valued at the NASDAQ Official Closing Price. If there is no reported sale on the principal exchange and in the case of over-the-counter securities, equity securities are valued at a bid price estimated by the security pricing service. Debt securities traded on a national securities exchange or in the over-the-counter market are valued at the last reported sales price on the principal exchange. If there is no reported sale on the principal exchange, and for all other debt securities, including zero-coupon securities, debt securities are valued at a bid price estimated by the security pricing service. Foreign securities quoted in foreign currencies are translated in U.S. dollars at the foreign exchange rate in effect as of the close of the Exchange (generally 4:00 p.m., Eastern Time) on the day the value of the foreign security is determined.

Options contracts are generally valued at the mean of the bid and asked price as reported on the highest-volume exchange (in terms of the number of option contracts traded for that issue) on which such options are traded. Short-term investments with remaining maturities of 60 days or less at the time of purchase may be valued at amortized cost. Investments in other open-end investment companies are valued at NAV (except ETFs, which are valued consistent with the pricing process for equity securities). In certain limited circumstances such as when a security's closing price versus the prior day's closing price exceeds a defined variance tolerance, or when a security's closing price is unchanged as compared to the prior day's closing price, a financial intermediary's good faith determination of the fair value of a security or option may be used instead of its current market value, even if the security's market price is readily available.

In cases where market prices for portfolio securities are not readily available, a Pricing Committee established and appointed by the Trustees determines in good faith, subject to Trust procedures, the fair value of portfolio securities held by a Fund.

TAXES

This following information is a summary of certain key federal income tax considerations affecting each Fund and its shareholders and is in addition to the information provided in the Prospectus. No attempt has been made to present a complete explanation of the federal, state, local or foreign tax treatment of the Fund or the tax implications to its shareholders. The discussions here and in the Prospectus are not intended as substitutes for careful tax planning.

FEDERAL INCOME TAXATION

Each Fund is treated as a separate corporation for federal income tax purposes. Each Fund has elected to be treated, and intends to qualify each year, as a regulated investment company (a "RIC") under Subchapter M of the Code. Qualification as a RIC requires, among other things, that the Fund:

- (1) derive in each taxable year at least 90% of its gross income from: (a) dividends, interest, payments with respect to certain securities loans, and gains from the sales or other disposition of stock, securities or foreign currencies, or other income (including but not limited to gain from options, futures, and forward contracts) derived with respect to its business of investing in such stock, securities or foreign currencies; and (b) net income derived from interests in certain publicly traded partnerships that are treated as partnerships for U.S. federal income tax purposes and that derive less than 90% of their gross income from the items described in (a) above (each a “Qualified Publicly Traded Partnership”); and
- (2) diversify its holdings so that, at the end of each quarter of each taxable year: (a) at least 50% of the value of the Fund’s total assets is represented by (I) cash and cash items, U.S. Government securities, the securities of other regulated investment companies and (II) other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the value of the Fund’s total assets and not more than 10% of the outstanding voting securities of such issuer and (b) not more than 25% of the value of the Fund’s total assets is invested in the securities (other than U.S. Government securities and the securities of other regulated investment companies) of (I) any one issuer, (II) any two or more issuers that the Fund controls and that are determined to be engaged in the same or similar trades or businesses or related trades or businesses or (III) any one or more Qualified Publicly Traded Partnerships.

As a RIC, each Fund will not be subject to federal income tax on its “net investment income” (i.e., its investment company taxable income, as that term is defined in the Code, determined without regard to the deduction for dividends paid) and “net capital gain” (the excess of the Fund’s net long-term capital gain over net short-term capital loss), if any, that it distributes in each taxable year to its shareholders, provided that it distributes at least 90% of the sum of its investment company taxable income for such taxable year and its net tax-exempt interest income for such taxable year. However, the Fund will be subject to federal corporate income tax (currently at a maximum rate of 35%) on any undistributed income other than tax-exempt income.

If a Fund were to fail to qualify as a regulated investment company accorded special tax treatment in any taxable year, the Fund would be subject to tax on its income at corporate rates, and all distributions from earnings and profits, including any distribution of net tax-exempt income and net long-term capital gains, would be taxable to shareholders as ordinary income. In addition, the Fund could be required to recognize net unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying as a regulated investment company that is accorded special tax treatment.

If a Fund fails to distribute in a calendar year substantially all of its ordinary income for such year and substantially all of its net capital gains for the year ending October 31 (or later if the Fund is permitted so to elect and so elects), plus any retained amount from the prior year, the Fund will be subject to a 4% excise tax on the under-distributed amounts. A dividend paid to shareholders by the Fund in January is generally deemed to have been paid by the Fund on December 31 of the preceding year, if the dividend was declared and payable to shareholders of record on a date in October, November, or December of that preceding year. The Fund intends generally to make distributions sufficient to avoid imposition of the 4% excise tax, although there can be no assurance that it will be able to do so.

FUND DISTRIBUTIONS

Distributions from a Fund (other than exempt-interest dividends, as discussed below) will be taxable to shareholders as ordinary income to the extent derived from the Fund’s investment income and net short-term gains. Distributions of net capital gains (that is, the excess of net gains from capital assets held more than one year over net losses from capital assets held by the Fund for not more than one year) will be taxable to shareholders as such, regardless of how long a shareholder has held the shares in the Fund. Distributions are taxable to shareholders even if they are paid from income or gains earned by the Fund before a shareholder’s investment (and thus were included in the price the shareholder paid). Distributions from capital gains are

generally made after applying any available capital loss carryovers. Distributions reinvested in additional shares of the Fund through a dividend reinvestment service will be taxable to the same extent as if the distributions had been received in cash.

Individuals, trusts and estates whose income exceeds certain threshold amounts will be subject to a 3.8% Medicare contribution tax on “net investment income.” Net investment income includes any ordinary dividends and capital gain distributions from the Fund as well as any capital gains recognized on the sale or exchange of Fund shares.

Distributions of investment income properly designated by a Fund as derived from “qualified dividend income” are taxed at the rates applicable to long-term capital gains. Long-term capital gain distributions paid to certain high-income taxpayers will be subject to a regular tax rate of 20%. High income taxpayers, for this purpose, are defined as individuals and married couples filing jointly whose taxable income exceeds \$441,450 and \$496,600, respectively, per year.

In order for some portion of the dividends received by the Fund shareholder to be “qualified dividend income,” the Fund must meet holding period and other requirements with respect to some portion of the dividend-paying stocks in its portfolio and the shareholder must meet holding period and other requirements with respect to the Fund’s shares. Generally, dividends paid by REITs do not qualify for the lower tax rates that apply to certain other “qualified investment income.” A dividend will not be treated as qualified dividend income (at either the Fund or shareholder level): (1) if the dividend is received with respect to any share of stock held for fewer than 61 days during the 120-day period beginning on the date that is 60 days before the date on which such share becomes ex-dividend with respect to such dividend (or, in the case of certain preferred stock, 91 days during the 180-day period beginning 90 days before such date); (2) to the extent that the recipient is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property; (3) if the recipient elects to have the dividend income treated as investment income for purposes of the limitation on deductibility of investment interest, or (4) if the dividend is received from a foreign corporation that is (a) not eligible for the benefits of a comprehensive income tax treaty with the U.S. (with the exception of dividends paid on stock of such a foreign corporation readily tradable on an established securities market in the U.S.) or (b) treated as a foreign personal holding company, foreign investment company, or passive foreign investment company.

In general, distributions of investment income designated by the Funds as derived from qualified dividend income will be treated as qualified dividend income by non-corporate taxpayers provided the shareholder meets the holding period and other requirements described above with respect to the Fund’s shares. If the aggregate qualified dividends received by the Fund during any taxable year are 95% or more of its gross income, then 100% of the Fund’s dividends (other than properly designated capital gain dividends) will be eligible to be treated as qualified dividend income. For this purpose, the only gain included in the term “gross income” is the excess of net short-term capital gain over net long-term capital loss.

Dividends of net investment income received by corporate shareholders of the Funds will qualify for the 70% dividends received deduction generally available to corporations to the extent of the amount of qualifying dividends received by the Fund from domestic corporations for the taxable year. A dividend received by the Fund will not be treated as a qualifying dividend: (1) if the stock on which the dividend is paid is considered to be “debt-financed” (generally, acquired with borrowed funds); (2) if it has been received with respect to any share of stock that the Fund has held for less than 46 days (91 days in the case of certain preferred stock) during the 90-day period beginning on the date that is 45 days before the date on which such share becomes ex-dividend with respect to such dividend (during the 180-day period beginning 90 days before such date in the case of certain preferred stock); or (3) to the extent that the Fund is under an obligation (pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property. Moreover, the dividends received deduction may be disallowed or reduced: (1) if the corporate shareholder fails to satisfy the foregoing requirements with respect to its shares of the Fund; or (2) by application of the Code.

If a Fund distributes amounts in excess of the Fund’s “earnings and profits” (which provide a measure of the Fund’s dividend paying capacity for tax purposes), such excess distributions to shareholders will be treated as a return of capital to the extent of a shareholder’s basis in his or her shares, and thereafter as gain from the sale or exchange of a capital asset. A return of capital is not taxable to a shareholder but has the effect of reducing the shareholder’s basis in the relevant shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition by a shareholder of his or her shares. However, because the Fund’s expenses attributable to earning tax exempt income do not reduce the Fund’s current earnings and profits, a portion of any distribution in excess of the Fund’s net tax exempt and taxable income may be considered paid out of the Fund’s earnings and profits

and may therefore be treated as a taxable dividend (even though that portion economically represents a return of the Fund's capital).

Dividends and distributions on a Fund's shares are generally subject to federal income tax as described herein to the extent they do not exceed the Fund's realized income and gains, even though such dividends and distributions may economically represent a return of a particular shareholder's investment. Such distributions are likely to occur in respect of shares purchased at a time when the Fund's NAV reflects gains that are either unrealized or realized but not distributed.

QUALIFIED REIT DIVIDENDS

Under 2017 legislation commonly known as the "Tax Cuts and Jobs Act," "qualified REIT dividends" (i.e., ordinary REIT dividends other than capital gain dividends and portions of REIT dividends designated as qualified dividend income) are treated as eligible for a 20% deduction by noncorporate taxpayers. The Fund may choose to report the special character of qualified REIT dividends to its shareholders, provided both the Fund and the shareholder meet certain holding period requirements. The amount of a RIC's dividends eligible for the 20% deduction for a taxable year is limited to the excess of the RIC's qualified REIT dividends for the taxable year over allocable expenses. A noncorporate shareholder receiving such dividends would treat them as eligible for the 20% deduction, provided the shareholder meets certain holding period requirements for its shares in the RIC (i.e., generally, RIC shares must be held by the shareholder for more than 45 days during the 91-day period beginning on the date that is 45 days before the date on which the shares become ex-dividend with respect to such dividend).

CAPITAL LOSS CARRYOVERS

The capital losses of a Fund, if any, do not flow through to shareholders. Rather, the Fund may use its capital losses, subject to applicable limitations, to offset its capital gains without being required to pay taxes on or distribute to shareholders such gains that are offset by the losses. If the Fund has a "net capital loss" (that is, capital losses in excess of capital gains), the excess (if any) of the Fund's net short-term capital losses over its net long-term capital gains is treated as a short-term capital loss arising on the first day of the Fund's next taxable year, and the excess (if any) of the Fund's net long-term capital losses over its net short-term capital gains is treated as a long-term capital loss arising on the first day of the Fund's next taxable year. Any such net capital losses of the Fund that are not used to offset capital gains may be carried forward indefinitely to reduce any future capital gains realized by the Fund in succeeding taxable years. The amount of capital losses that can be carried forward and used in any single year is subject to an annual limitation if there is a more than 50% "change in ownership" of the Fund. An ownership change generally results when shareholders owning 5% or more of the Fund increase their aggregate holdings by more than 50% over a three-year lookback period. An ownership change could result in capital loss carryovers being used at a slower rate, thereby reducing the Fund's ability to offset capital gains with those losses. An increase in the amount of taxable gains distributed to the Fund's shareholders could result from an ownership change. The Fund undertakes no obligation to avoid or prevent an ownership change, which can occur in the normal course of shareholder purchases and redemptions or as a result of engaging in a tax-free reorganization with another fund. Moreover, because of circumstances beyond the Fund's control, there can be no assurance that the Fund will not experience, or has not already experienced, an ownership change. Additionally, if the Fund engages in a tax-free reorganization with another fund, the effect of these and other rules not discussed herein may be to disallow or postpone the use by the Fund of its capital loss carryovers (including any current year losses and built-in losses when realized) to offset its own gains or those of the other fund, or vice versa, thereby reducing the tax benefits Fund shareholders would otherwise have enjoyed from use of such capital loss carryovers. As of April 30, 2023, the Day Hagan Smart Sector ETF had \$63,646,245 in short-term capital loss carryforwards and \$2,349,880 in long-term capital loss carryforwards. As of April 30, 2023, the Smart Sector Fixed Income ETF had \$2,543,357 in short-term capital loss carryforwards and no long-term capital loss carryforwards. As of April 30, 2023, the Smart Sector International ETF had \$160,855 in short-term capital loss carryforwards and no long-term capital loss carryforwards. These capital loss carryforwards do not expire.

HEDGING TRANSACTIONS

Certain investment and hedging activities of the Funds, including transactions in options, futures contracts, forward contracts, foreign currencies, foreign securities, or other similar transactions, will be subject to special tax rules. In a given case, these rules may accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's assets, convert long-term capital gains into short-term capital gains or convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing, and character of the Fund's income and distributions to shareholders. Income earned as a result of these transactions would, in general, not be eligible for the dividends received deduction or for treatment as exempt-interest dividends when distributed to shareholders. The Fund will endeavor to make any available elections pertaining to such transactions in a manner believed to be in the best interests of the Fund.

Certain of the Funds' hedging activities (including its transactions, if any, in foreign currencies or foreign currency-denominated instruments) are likely to produce a difference between its book income and its taxable income. If the Fund's book income exceeds its taxable income the distribution (if any) of such excess will be treated as: (1) a dividend to the extent of the Fund's remaining earnings and profits (including earnings and profits arising from tax-exempt income); (2) thereafter as a return of capital to the extent of the recipient's basis in the shares; and (3) thereafter as gain from the sale or exchange of a capital asset. If the Fund's book income is less than its taxable income, the Fund could be required to make distributions exceeding book income to qualify as a regulated investment company that is accorded special tax treatment.

FOREIGN CURRENCY-DENOMINATED SECURITIES AND RELATED HEDGING TRANSACTIONS

The Funds' transactions in foreign currency-denominated debt securities, certain foreign currency options, futures contracts, and forward contracts may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned.

FOREIGN INVESTMENTS

If a Fund purchases foreign securities, its investment income may be subject to foreign withholding or other taxes that could reduce the return on these securities. Tax treaties between the U.S. and foreign countries, however, may reduce or eliminate the amount of foreign taxes to which the Fund would be subject. The effective rate of foreign tax cannot be predicted since the amount of Fund assets to be invested within various countries is uncertain. However, the Fund intends to operate so as to qualify for treaty-reduced tax rates when applicable.

Distributions from a Fund may be based on estimates of book income for the year. Book income generally consists solely of the coupon income generated by the portfolio, whereas tax-basis income includes gains or losses attributable to currency fluctuation. Due to differences in the book and tax treatment of fixed income securities denominated in foreign currencies, it is difficult to project currency effects on an interim basis.

Therefore, to the extent that currency fluctuations cannot be anticipated, a portion of distributions to shareholders could later be designated as a return of capital, rather than income, for income tax purposes, which may be of particular concern to simple trusts.

FOREIGN TAX CREDIT

Investment by a Fund in "passive foreign investment companies" could subject the Fund to a U.S. federal income tax or other charge on the proceeds from the sale of its investment in such a company; however, this tax can be avoided by making an election to mark such investments to market annually or to treat the passive foreign investment company as a "qualified electing fund."

A "passive foreign investment company" is any foreign corporation: (1) 75 percent or more of the income of which for the taxable year is passive income; or (2) the average percentage of the assets of which (generally by value, but by adjusted tax basis in certain cases) produce or are held for the production of passive income is at

least 50 percent. Generally, passive income for this purpose means dividends, interest (including income equivalent to interest), royalties, rents, annuities, the excess of gain over losses from certain property transactions and commodities transactions, and foreign currency gains. Passive income for this purpose does not include rents and royalties received by the foreign corporation from active business and certain income received from related persons. The Fund's investments in foreign securities may be subject to withholding taxes at the source on dividends or interest payments.

SALE OR REDEMPTION OF SHARES

The sale, exchange or redemption of the Funds' shares may give rise to a gain or loss. In general, any gain or loss realized upon a taxable disposition of shares will be treated as long-term capital gain or loss if the shares have been held for more than 12 months. Otherwise the gain or loss on the sale, exchange, or redemption of the Fund's shares will be treated as short-term capital gain or loss. However, if a shareholder sells the Fund's shares at a loss within six months of purchase, any loss will be disallowed for Federal income tax purposes to the extent of any exempt-interest dividends received on such shares. In addition, any loss (not already disallowed as provided in the preceding sentence) realized upon a taxable disposition of the Fund's shares held for six months or less will be treated as long-term, rather than short-term, to the extent of any long-term capital gain distributions received by the shareholder with respect to the Fund's shares. All or a portion of any loss realized upon a taxable disposition of the Fund's shares will be disallowed if other shares of the same Fund are purchased within 30 days before or after the disposition. In such a case, the basis of the newly purchased Fund shares will be adjusted to reflect the disallowed loss.

IN-KIND PURCHASE AND REDEMPTION OF CREATION UNITS

To the extent that a Fund sells shares in exchange for securities and/or cash, the investor will recognize a gain or loss equal to the difference between the market value of the Creation Unit at the time and the investor's aggregate basis in the securities surrendered and/or the amount of any cash paid for the Creation Unit. An investor who redeems a Creation Unit for securities or securities and cash will generally recognize a gain or loss equal to the difference between the investor's basis in the Creation Unit and the aggregate market value of the securities and/or cash received for the Creation Unit. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of primarily securities for a Creation Unit cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Under current federal tax laws, any capital gain or loss realized upon redemption of a Creation Unit is generally treated as long-term capital gain or loss if the shares have been held for more than 12 months and as short-term capital gain or loss if the shares have been held for 12 months or less.

If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Creation Units of the Fund you purchased and sold and at what price.

If a Fund redeems Creation Units in cash, it may recognize more capital gains than it will if it redeems Creation Units in-kind.

INVESTMENTS IN PARTNERSHIPS AND QPTPS

For purposes of the Income Requirement, income derived by a fund from a partnership that is not a QPTP will be treated as qualifying income only to the extent such income is attributable to items of income of the partnership that would be qualifying income if realized directly by the fund. While the rules are not entirely clear with respect to a fund investing in a partnership outside a master feeder structure, for purposes of testing whether a fund satisfies the Asset Diversification Test, the fund generally is treated as owning a pro rata share of the underlying assets of a partnership. See, "Taxation of the Fund." In contrast, different rules apply to a partnership that is a QPTP. A QPTP is a partnership (a) the interests in which are traded on an established securities market, (b) that is treated as a partnership for federal income tax purposes, and (c) that derives less than 90% of its income from sources that satisfy the Income Requirement (e.g., because it invests in commodities). All of the

net income derived by a fund from an interest in a QPTP will be treated as qualifying income but the fund may not invest more than 25% of its total assets in one or more QPTPs. However, there can be no assurance that a partnership classified as a QPTP in one year will qualify as a QPTP in the next year. Any such failure to annually qualify as a QPTP might, in turn, cause a fund to fail to qualify as a regulated investment company. Although, in general, the passive loss rules of the Code do not apply to RICs, such rules do apply to a fund with respect to items attributable to an interest in a QPTP. Fund investments in partnerships, including in QPTPs, may result in the fund being subject to state, local or foreign income, franchise or withholding tax liabilities.

If an MLP is treated as a partnership for U.S. federal income tax purposes (whether or not a QPTP), all or portion of the dividends received by a fund from the MLP likely will be treated as a return of capital for U.S. federal income tax purposes because of accelerated deductions available with respect to the activities of such MLPs. Further, because of these accelerated deductions, on the disposition of interests in such an MLP, a fund likely will realize taxable income in excess of economic gain with respect to those MLP interests (or if the fund does not dispose of the MLP, the fund could realize taxable income in excess of cash flow with respect to the MLP in a later period), and the fund must take such income into account in determining whether the fund has satisfied its Distribution Requirement. A fund may have to borrow or liquidate securities to satisfy its Distribution Requirement and to meet its redemption requests, even though investment considerations might otherwise make it undesirable for the fund to sell securities or borrow money at such time. In addition, any gain recognized, either upon the sale of a fund's MLP interest or sale by the MLP of property held by it, including in excess of economic gain thereon, treated as so-called "recapture income," will be treated as ordinary income. Therefore, to the extent a fund invests in MLPs, fund shareholders might receive greater amounts of distributions from the fund taxable as ordinary income than they otherwise would in the absence of such MLP investments.

Recent legislation (which by its terms became effective for taxable years beginning after December 31, 2017) generally requires that taxes, penalties, and interest associated with an audit of a partnership be assessed and collected at the partnership level. Therefore, an adverse federal income tax audit of a partnership that the Fund invests in (including MLPs taxed as partnerships) could result in the Fund being required to pay federal income tax. The Fund may have little input in any audit asserted against a partnership and may be contractually or legally obligated to make payments in regard to deficiencies asserted without the ability to put forward an independent defense. Accordingly, even if a partnership in which the Fund invests were to remain classified as a partnership (instead of as a corporation), it could be required to pay additional taxes, interest and penalties as a result of an audit adjustment, and the Fund, as a direct or indirect partner of such partnership, could be required to bear the economic burden of those taxes, interest and penalties, which would reduce the value of Fund shares.

Although MLPs are generally expected to be treated as partnerships for U.S. federal income tax purposes, some MLPs may be treated as PFICs or "regular" corporations for U.S. federal income tax purposes. The treatment of particular MLPs for U.S. federal income tax purposes will affect the extent to which a fund can invest in MLPs and will impact the amount, character, and timing of income recognized by the Fund.

BACKUP WITHHOLDING

By law, a portion of your taxable dividends and sales proceeds may be withheld unless you:

- provide your correct social security or taxpayer identification number,
- certify that this number is correct,
- certify that you are not subject to backup withholding, and
- certify that you are a U.S. person (including a U.S. resident alien).

Withholding is also imposed if the IRS requires it. When withholding is required, the amount will be 24% of any distributions or proceeds paid. Backup withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability, provided the appropriate information is furnished to the IRS. Certain payees and payments are exempt from backup withholding and information

reporting. The special U.S. tax certification requirements applicable to non-U.S. investors to avoid backup withholding are described under the “Non-U.S. Investors” heading, below.

SECURITIES ISSUED OR PURCHASED AT A DISCOUNT

A Fund’s investment in securities issued at a discount and certain other obligations will (and investments in securities purchased at a discount may) require the Fund to accrue and distribute income not yet received. In order to generate sufficient cash to make the requisite distributions, the Fund may be required to sell securities in its portfolio that it otherwise would have continued to hold.

SHARES PURCHASED THROUGH TAX-QUALIFIED PLANS

Special tax rules apply to investments purchased through defined contribution plans and other tax-qualified plans. Shareholders should consult their tax adviser to determine the suitability of shares of a Fund as an investment through such plans and the precise effect of an investment on their particular tax situation.

UNRELATED BUSINESS TAXABLE INCOME

Under current law, each Fund generally serves to block unrelated business taxable income (“UBTI”) from being realized by its tax-exempt shareholders. Notwithstanding the foregoing, a tax-exempt shareholder could realize UBTI by virtue of its investment in the Fund if either: (1) the Fund invests in REITs that hold residual interests in real estate mortgage investment conduits (“REMICs”); or (2) shares in the Fund constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of Code Section 514(b).

If a charitable remainder trust (as defined in Code Section 664) realizes any UBTI for a taxable year, it will be subject to an excise tax equal to the amount of the UBTI.

FINANCIAL STATEMENTS

The Funds’ most recent financial statements are incorporated herein by reference to the Funds’ Annual Report to Shareholders for the fiscal year or period ended April 30, 2023, a copy of which may be obtained without charge by calling 1-800-594-7930.

APPENDIX 1

INVESTMENT RATINGS

The NRSROs that may be utilized by the Funds with regard to portfolio investments for the Funds include Moody's, S&P, Fitch, and A.M. Best. Set forth below is a description of the relevant ratings of each such NRSRO. The NRSROs that may be utilized by the Funds and the description of each NRSRO's ratings is as of the date of this SAI and may subsequently change.

A.M. BEST

LONG-TERM DEBT RATINGS

Investment Grade

Aaa: Exceptional

aa: Very Strong

a: Strong

bbb: Adequate

Non-Investment Grade

Bb: Speculative

b: Very Speculative

ccc, cc, c: Extremely Speculative

d: In Default

SHORT-TERM DEBT RATINGS

Investment Grade

AMB-1+: Strongest

AMB-1: Outstanding

AMB-2: Satisfactory

AMB-3: Adequate

Non-Investment Grade

AMB-4: Speculative

D: In Default

FITCH

LONG-TERM DEBT RATINGS

Investment grade

AAA: the best quality companies, reliable and stable

AA: quality companies, a bit higher risk than AAA

A: economic situation can affect finance

BBB: medium class companies, which are satisfactory at the moment

Non-investment grade

BB: more prone to changes in the economy

B: financial situation varies noticeably

CCC: currently vulnerable and dependent on favorable economic conditions to meet its commitments

CC: highly vulnerable, very speculative bonds

C: highly vulnerable, perhaps in bankruptcy or in arrears but still continuing to pay out on

obligations **D:** has defaulted on obligations and Fitch believes that it will generally default on most or

all obligations **NR:** not publicly rated

SHORT-TERM DEBT RATINGS

Fitch's short-term ratings indicate the potential level of default within a 12-month period.

F1+ : best quality grade, indicating exceptionally strong capacity of obligor to meet its financial commitment

F1: best quality grade, indicating strong capacity of obligor to meet its financial commitment
F2: good quality grade with satisfactory capacity of obligor to meet its financial commitment
F3: fair quality grade with adequate capacity of obligor to meet its financial commitment but near term adverse conditions could impact the obligor's commitments
B: of speculative nature and obligor has minimal capacity to meet its commitment and vulnerability to short term adverse changes in financial and economic conditions
C: possibility of default is high and the financial commitment of the obligor are dependent upon sustained, favorable business and economic conditions
D: the obligor is in default as it has failed on its financial commitments.

Fitch also uses intermediate +/- modifiers for each category between AA and CCC (e.g., AA+, AA, AA-, A+, A, A-, BBB+, BBB, BBB-, etc.).

MOODY'S

GLOBAL LONG-TERM RATING SCALE

Aaa: Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

Aa: Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A: Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.

Baa: Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Ba: Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

B: Obligations rated B are considered speculative and are subject to high credit risk.

Caa: Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.

Ca: Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C: Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. Additionally, a "(hyb)" indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms.

Moody's differentiates structured finance ratings from fundamental ratings (i.e., ratings on nonfinancial corporate, financial institution, and public sector entities) on the global long-term scale by adding (sf) to all structured finance ratings. The (sf) indicator was introduced on August 11, 2010 and explained in a special comment entitled, "Moody's Structured Finance Rating Scale." The addition of (sf) to structured finance ratings should eliminate any presumption that such ratings and fundamental ratings at the same letter grade level will behave the same. The (sf) indicator for structured finance security ratings indicates that otherwise similarly rated structured finance and fundamental securities may have different risk characteristics.

GLOBAL SHORT-TERM RATING SCALE

P-1 Issuers (or supporting institutions) rated Prime-1: have a superior ability to repay short-term debt obligations.

P-2 Issuers (or supporting institutions) rated Prime-2: have a strong ability to repay short-term debt obligations.

P-3 Issuers (or supporting institutions) rated Prime-3: have an acceptable ability to repay short-term obligations.

NP Issuers (or supporting institutions) rated Not Prime: do not fall within any of the Prime rating categories.

US MUNICIPAL SHORT-TERM DEBT OBLIGATION RATINGS

MIG 1: This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2: This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3: This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established. **SG** This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

S&P GLOBAL RATINGS (“S&P”)

AAA: An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA: An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A: An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB: An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB; B; CCC; CC; and C: Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB: An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B: An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC: An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC An obligation rated 'CC' is currently highly vulnerable to nonpayment.

C: A 'C' rating is assigned to obligations that are currently highly vulnerable to nonpayment, obligations that have payment arrearages allowed by the terms of the documents, or obligations of an issuer that is the subject of a bankruptcy petition or similar action which have not experienced a payment default. Among others, the 'C' rating may be assigned to subordinated debt, preferred stock or other obligations on which cash payments have been suspended in accordance with the instrument's terms or when preferred stock is the subject of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

D: An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within five business days, irrespective of any grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of similar action if payments on an obligation are jeopardized. An obligation's rating is lowered to 'D' upon completion of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par. **NR:** This indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular obligation as a matter of policy.

*The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show

relative standing within the major rating categories.

APPENDIX 2

DAY HAGAN ASSET MANAGEMENT PROXY VOTING POLICIES AND PROCEDURES (Adopted September 16, 2009)

Pursuant to the recent adoption by the Securities and Exchange Commission (the “Commission”) of Rule 206(4)-6 (17 CFR 275.206(4)-6) and amendments to Rule 204-2 (17 CFR 275.204-2) under the Investment Advisers Act of 1940 (the “Act”), it is a fraudulent, deceptive, or manipulative act, practice or course of business, within the meaning of Section 206(4) of the Act, for an investment adviser to exercise voting authority with respect to client securities, unless (i) the adviser has adopted and implemented written policies and procedures that are reasonably designed to ensure that the adviser votes proxies in the best interests of its clients, (ii) the adviser describes its proxy voting procedures to its clients and provides copies on request, and (iii) the adviser discloses to clients how they may obtain information on how the adviser voted their proxies.

In order to fulfill its responsibilities under the Act, **Day Hagan Asset Management** (hereinafter “we” or “our”) has adopted the following policies and procedures for proxy voting with regard to companies in investment portfolios of our clients.

KEY OBJECTIVES

The key objectives of these policies and procedures recognize that a company’s management is entrusted with the day-to-day operations and longer term strategic planning of the company, subject to the oversight of the company’s board of directors. While “ordinary business matters” are primarily the responsibility of management and should be approved solely by the corporation’s board of directors, these objectives also recognize that the company’s shareholders must have final say over how management and directors are performing, and how shareholders’ rights and ownership interests are handled, especially when matters could have substantial economic implications to the shareholders.

Therefore, we will pay particular attention to the following matters in exercising our proxy voting responsibilities as a fiduciary for our clients:

Accountability. Each company should have effective means in place to hold those entrusted with running a company’s business accountable for their actions. Management of a company should be accountable to its board of directors and the board should be accountable to shareholders.

Alignment of Management and Shareholder Interests. Each company should endeavor to align the interests of management and the board of directors with the interests of the company’s shareholders. For example, we generally believe that compensation should be designed to reward management for doing a good job of creating value for the shareholders of the company.

Transparency. Promotion of timely disclosure of important information about a company’s business operations and financial performance enables investors to evaluate the performance of a company and to make informed decisions about the purchase and sale of a company’s securities.

DECISION METHODS

No set of proxy voting guidelines can anticipate all situations that may arise. In special cases, we may seek insight from our managers and analysts on how a particular proxy proposal may impact the financial prospects of a company and vote accordingly.

We believe that we invest in companies with strong management. Therefore, we will tend to vote proxies consistent with management’s recommendations. However, we will vote contrary to management’s recommendations if we believe those recommendations are not consistent with increasing shareholder value.

SUMMARY OF PROXY VOTING GUIDELINES

Election of the Board of Directors

We believe that good corporate governance generally starts with a board composed primarily of independent directors, unfettered by significant ties to management, all of whose members are elected annually. We also believe that turnover in board composition promotes independent board action, fresh approaches to governance, and generally has a positive impact on shareholder value. We will generally vote in favor of non-incumbent independent directors.

The election of a company's board of directors is one of the most fundamental rights held by shareholders. Because a classified board structure prevents shareholders from electing a full slate of directors annually, we will generally support efforts to declassify boards or other measures that permit shareholders to remove a majority of directors at any time and will generally oppose efforts to adopt classified board structures.

Approval of Independent Auditors

We believe that the relationship between a company and its auditors should be limited primarily to the audit engagement, although it may include certain closely related activities that do not raise an appearance of impaired independence.

We will evaluate on a case-by-case basis instances in which the audit firm has a substantial non-audit relationship with a company to determine whether we believe independence has been, or could be, compromised.

Equity-based compensation plans

We believe that appropriately designed equity-based compensation plans, approved by shareholders, can be an effective way to align the interests of shareholders and the interests of directors, management, and employees by providing incentives to increase shareholder value. Conversely, we are opposed to plans that substantially dilute ownership interests in the company, provide participants with excessive awards, or have inherently objectionable structural features.

We will generally support measures intended to increase stock ownership by executives and the use of employee stock purchase plans to increase company stock ownership by employees. These may include:

1. Requiring senior executives to hold stock in a company.
2. Requiring stock acquired through option exercise to be held for a certain period of time.

These are guidelines, and we consider other factors, such as the nature of the industry and size of the company, when assessing a plan's impact on ownership interests.

Corporate Structure

We view the exercise of shareholders' rights, including the rights to act by written consent, to call special meetings and to remove directors, to be fundamental to good corporate governance.

Because classes of common stock with unequal voting rights limit the rights of certain shareholders, we generally believe that shareholders should have voting power equal to their equity interest in the company and should be able to approve or reject changes to a company's by-laws by a simple majority vote.

We will generally support the ability of shareholders to cumulate their votes for the election of directors.

Shareholder Rights Plans

While we recognize that there are arguments both in favor of and against shareholder rights plans, also known as poison pills, such measures may tend to entrench current management, which we generally consider to have a negative impact on shareholder value. Therefore, while we will evaluate such plans on a case by case basis, we will generally oppose such plans.

CLIENT INFORMATION

A copy of these Proxy Voting Policies and Procedures is available to our clients, without charge, upon request, by calling 1-800-594-7930. We will send a copy of these Proxy Voting Policies and Procedures within three business days of receipt of a request, by first-class mail or other means designed to ensure equally prompt delivery.

In addition, we will provide each client, without charge, upon request, information regarding the proxy votes cast by us with regard to the client's securities.
